## INVESTMENT OBJECTIVE

The objective of the Fund is to maximise total return, consistent with preservation of capital and prudent investment management, primarily through investment directly in debt securities issued by corporate, government, supranational institutions and local regional agencies or by gaining exposure indirectly through the use of derivatives, as well as any other security. The Fund will invest internationally although at least 80 % of its assets shall be invested in Sterling denominated (or hedged back to Sterling) debt securities.

## INVESTMENT OBJECTIVE

The Fund aims to provide an above average income return from its equity investments (i.e. shares), compared to the income produced by European equity markets (excluding the UK) as represented by FTSE World Europe Ex UK Index, without sacrificing capital growth (i.e. the value of the assets held by the Fund) over the long term (5 or more consecutive years beginning at the point of investment). The Fund invests at least 70% of its total assets in the equity securities (e.g. shares) of companies domiciled in, or the main business of which is in Europe, excluding the United Kingdom. The investment adviser (IA) may use derivatives (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective.

## INVESTMENT OBJECTIVE

Aims to provide a growing level of income which is higher than that of the FTSE All-Share Index, together with capital growth over the medium to long term (meaning 3-5 years). Capital in the Fund is at risk and there is no guarantee that the objective will be achieved over that, or any, time period.

## INVESTMENT OBJECTIVE

The Fund aims to provide a high income. Performance target: To outperform the IA Sterling Strategic Bond sector average, after the deduction of charges, over any 5 year period. The Fund invests at least 80% of its assets in a global portfolio of bonds of any quality, including high yield (non-investment grade) bonds, issued by governments, companies or any other type of issuer. Where investments are made in assets in currencies other than Sterling, the Fund will seek to hedge at least 80% of those assets back to Sterling to largely remove the risk of currency exchange rate movements. In certain market conditions, the Fund may invest more than 35% of its assets in government bonds issued by any one body. The investment manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently. The Fund is actively managed with reference to the IA Sterling Strategic Bond sector average, which is based on a peer group of broadly similar funds,...

## INVESTMENT OBJECTIVE

The aim of the Fund is to provide both income, that is money paid out from an investment as interest, and capital growth, that is to increase the value of your investment. The Fund aims to outperform the average of the IA Global Bonds sector over any 5 year period, after any charges have been taken out of the Fund. However, there is no certainty this will be achieved.

## TOP HOLDINGS

Sorry, this data is not yet available for this fund.

## INVESTMENT OBJECTIVE

We aim to preserve your capital and pay an income by delivering a greater total return than the Bank of England's Base Rate + 0.5%, after fees, over any rolling three-year period. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (interest payments). We use the Bank of England's Base Rate + 0.5% as a target for our fund's return because we aim to provide a return in excess of what you would receive in a UK savings account. This is an investment product, not a cash savings account. Your capital is at risk.

## INVESTMENT OBJECTIVE

The Fund aims to provide income, combined with prospects for investment growth over the long term. It looks to provide an income yield higher than the S&P 500 Index over rolling 3-year periods, after the deduction of charges. The Fund is actively managed, and invests at least 75% of its assets in the shares of companies domiciled in the United States of America (US), or which have significant US business operations. The Fund selects companies that exhibit above average income generation potential, as well as those considered to offer opportunities more by way of share price or dividend growth. These companies may be chosen from any industry or economic sector, and whilst there is no restriction on size, investment tends to focus on larger companies, such as those included in the S&P 500 Index. The S&P 500 Index is a US stock market index, the constituents of which represent around 500 of the largest companies listed on the New York Stock Exchange or NASDAQ. The income yield of this index (calculated using dividends declared by its constituent companies) provides a suitable target...
