This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

ASI UK Ethical Equity Fund, a Sterling denominated sub fund of the Aberdeen Standard OEIC II, Platform 1 Accumulation Shares (ISIN: GB00B6Y80X40). This fund is managed by Aberdeen Standard Fund Managers Limited.

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

To generate growth over the long term (5 years or more) by investing in UK equities (company shares) which meet the ethical criteria set out in the investment manager's Ethical Investment Policy.

Performance Target: To achieve the return of the FTSE All-Share Index, plus 2% per annum over rolling five year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

Investment Policy

Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities of companies listed, incorporated, or domiciled in the UK or companies that derive a significant proportion of their revenues or profits from UK operations or have a significant proportion of their assets there.
- The fund may also invest in other funds (including those managed by Aberdeen Standard Investments), money-market instruments, and cash.
- All investments will comply with the Ethical Investment Policy. The fund uses negative criteria to avoid investing in companies that operate to a degree in certain areas, including but not limited to those deriving revenue from animal testing, weaponry, pornography and gambling services. In addition to excluding such companies which operate in certain industries and activities, the fund will seek to include companies whose business activities are regarded as making a positive contribution in terms of preserving the environment or improving the quality and safety of human life. In making an assessment of whether business activities make a positive contribution, the investment manager will make reference to the UN Global Compact to define the areas where the fund seeks to invest in companies with positive business practices and services. The areas include human rights, labour rights, environmental safeguards and combating bribery and corruption. Please refer to the Ethical Investment Policy for further detail.

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- A concentrated portfolio may be more volatile and less liquid than a more broadly diversified one. The fund's investments are concentrated in a particular country or sector.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.
- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile

Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix at sector and stock level.
- Their primary focus is on stock selection using research techniques to select individual holdings. The research process is focused on identifying companies where the management team have a different view than that of the market, and which align with their views regarding future economic and business conditions.
- In seeking to achieve the Performance Target, the FTSE All-Share Index is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ('tracking error') between the returns of the fund and the index is not ordinarily expected to exceed 12%. Due to the ethical nature of the management process, there are a material number of stocks and sectors in the FTSE All-Share Index that the fund is unable to invest, which means the fund's performance profile may deviate significantly from that of the FTSE All Share Index.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares.

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

and change substantially in short periods of time.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing charges	0.90%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The Ongoing Charges figure reflects the amount based on the expenses within the annual report for each financial year. This figure may vary from year to year. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.

Where the Fund invests in an open-ended collective investment scheme which is operated or managed by the ACD/the Manager or an associate of the ACD/the Manager, no additional annual management charge will be incurred by the Fund on such an investment.

The annual report for each financial year will include detail on the exact charges made.

The Ongoing Charge figure is as at 29/02/2020.

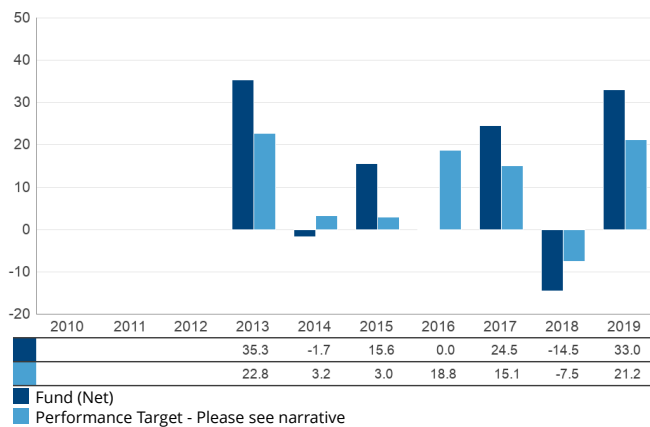

A switching charge may be applied in accordance with the Prospectus. For more information about charges please see Prospectus.

Further information on the charges can be found in the Prospectus.

FIXED INCOME

AXA Global Strategic Bond Fund

A Sub-Fund of AXA Fixed Interest Investment ICVC

Share class : AXA Global Strategic Bond Fund Z Accumulation GBP Quarterly (ISIN : GB00BMZCH470)

This Sub-Fund is managed by AXA Investment Managers UK Limited, part of the AXA IM Group

Objective and Investment Policy

Investment Objective

The aim of the Fund is to generate income and growth over the medium term (being a period of five years or more).

Investment Policy

The Fund invests at least 80% of its assets in a mix of investment grade bonds (meaning bonds with a Standard & Poor's rating of at least BBB- or such equivalent rating by Moody's or Fitch), sub-investment grade bonds and securitisation vehicles (such as mortgage-backed and asset-backed securities, collateralised debt obligations (CDOs) and collateralised loan obligations (CLOs)), issued in or hedged back to Sterling. The fund manager seeks to reduce the risk of defaults through its analysis and selection of bonds (with particular emphasis on industry and issuer). The Fund may also invest in other transferable securities, contingent convertible bonds, units in collective investment schemes (including those operated by the ACD), cash, cash-like instruments and deposits.

The Fund may use derivatives for investment purposes as well as for Efficient Portfolio Management. The Fund does not have a benchmark. The IA Sterling Strategic Bond sector may be used by investors to compare the Fund's performance. Where the bonds are denominated in a currency other than Sterling, the Fund aims to reduce the risk of movements in exchange rates between such currency and Sterling through the use of derivatives (financial instruments which derive their value from the value of other assets). The Fund may also use derivatives in an attempt to reduce the overall risks of its investments, reduce the costs of investing or generate capital or income (known as Efficient Portfolio Management – EPM). The Fund avoids investing in bonds issued by companies presenting excessive degrees of environmental, social and governance (ESG) risk. The fund manager applies AXA IM Group's sector specific investment guidelines relating to responsible investment to the Fund, according to which the fund manager aims at applying specific sectorial exclusions (such as soft commodities, palm oil, controversial weapons and climate risks). The fund manager also applies the AXA IM's ESG Standards policy. This policy excludes investment in

companies based on: their contribution to climate change; tobacco production; manufacture of controversial weapons; human rights; anti-corruption and other ESG factors. Further, in selecting investments, the fund manager will take into account: (i) the issuer's ESG score (using an internal ESG scoring system as detailed in the AXA IM's ESG Standards policy); and (ii) its own analysis of the global bond universe. The fund manager will use the ESG score and analysis as one factor within its broader analysis of the issuer to make selections which are expected to generate sustained growth and returns over time. It is, however, just one component of the fund manager's investment process and ESG scores are not the principal driver of investment decision making.

The Fund is actively managed. It is not managed in reference to any benchmark.

Income

Income from investments in the Fund will be rolled up into the value of your shares if you hold accumulation shares.

Fund Currency

The reference currency of the Fund is Sterling.

Investment Horizon

This Fund may not be suitable for investors who plan to withdraw their contribution within five years.

Processing of subscription and redemption orders

Your orders to buy, sell or transfer shares in the Fund, must be received by the Administrator by 12 noon on any working day to receive that day's Fund price. Please note that if your order is placed by an intermediary or Financial Adviser, they may require extra processing time. The Net Asset Value of this Fund is calculated on a daily basis.

Minimum initial investment: £100,000

Minimum subsequent investment: £5,000

Risk and Reward Profile

The risk category is based on simulated performance or performance of funds of this type and may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean risk free.

Why is this Fund in this category?

The capital of the Sub-Fund is not guaranteed. The Sub-Fund is invested in financial markets and uses techniques and instruments which are subject to some levels of variation, which may result in gains or losses.

Additional Risks

Counterparty Risk: failure by any counterparty to a transaction (e.g. derivatives) with the Fund to meet its obligations may adversely affect the value of the Fund. The Fund may receive assets from the counterparty to protect against any such adverse effect but there is a risk that the value of such assets at the time of the failure would be insufficient to cover the loss to the Fund.

Derivatives: derivatives can be more volatile than the underlying asset and may result in greater fluctuations to the Fund's value. In the case of derivatives not traded on an exchange they may be subject to additional counterparty and liquidity risk.

Geopolitical Risk: investments issued or traded on markets in different countries may involve the application of different standards and rules (including local tax policies and restrictions on investments and movement of currency), which may be subject to change. The Fund's value may therefore be impacted by those standards/rules (and any changes to them) as well as the political and economic circumstances of the country/region in which the Fund is invested.

Interest Rate Risk: fluctuations in interest rates will change the value of bonds, impacting the value of the Fund. Generally, when interest rates rise, the value of the bonds fall and vice versa. The valuation of bonds will also

change according to market perceptions of future movements in interest rates.

Securitised assets or CDO assets risk: Securitised assets or CDO assets (CLO, ABS, RMBS, CMBS, CDO, etc.) are subject to credit, liquidity, market value, interest rate and certain other risks. Such financial instruments require complex legal and financial structuring and any related investment risk is heavily correlated with the quality of underlying assets which may be of various types (leveraged loans, bank loans, bank debt, debt securities, etc.), economic sectors and geographical zones.

Emerging Market Risks: emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. As a result, investments in such countries may cause greater fluctuations in the Fund's value than investments in more developed countries.

Liquidity Risk: some investments may trade infrequently and in small volumes. As a result, the fund manager may not be able to sell at a preferred time or volume or at a price close to the last quoted valuation. The fund manager may be forced to sell a number of such investments as a result of a large redemption of shares in the Fund. Depending on market conditions, this could lead to a significant drop in the Fund's value and in extreme circumstances lead the Fund to be unable to meet its redemptions.

Credit Risk: the risk that an issuer of bonds will default on its obligations to pay income or repay capital, resulting in a decrease in Fund value. The value of a bond (and, subsequently, the Fund) is also affected by changes in market perceptions of the risk of future default. The risk of default for high yield bonds may be greater.

Risks linked to investment in sovereign debt: Where bonds are issued by countries and governments (sovereign debt), the governmental entity that controls the repayment of sovereign debt may not be able or willing to repay the capital and/or interest when due in accordance with the terms of such debt. In the event of a default of the sovereign issuer, a Fund may suffer significant loss.

High yield bonds risk: These bonds are issued by companies or governments with lower credit ratings and as such are at greater risk of default or rating downgrades than investment grade bonds.

Contingent convertible bonds ("CoCos"): these financial instruments become loss absorbing upon certain triggering events, which could cause the permanent write-down to zero of principal investment and/or accrued

FIXED INCOME

AXA Global Strategic Bond Fund

interest, or a conversion to equity that may coincide with the share price of the underlying equity being low. It is possible in certain circumstances for interest payments on certain CoCos to be cancelled in full or in part by the issuer, without prior notice to bondholders.

Further explanation of the risks associated with an investment in this Fund can be found in the prospectus.

Charges

The charges you pay are used to pay the cost of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

FIXED INCOME

AXA Sterling Credit Short Duration Bond Fund

A Sub-Fund of AXA Fixed Interest Investment ICVC

Share class : AXA Sterling Credit Short Duration Bond Fund Z (G) Accumulation GBP (ISIN : GB00B5L2N222)

This Sub-Fund is managed by AXA Investment Managers UK Limited, part of the AXA IM Group

Objective and Investment Policy

Investment Objective

The aim of the Fund is to provide income combined with any capital growth.

Investment Policy

The Fund aims to deliver income combined with any capital growth by investing primarily (meaning at least 70% of its assets) in sterling-denominated investment grade bonds with a bias towards shorter maturities (where the full repayment of the bond by the company is expected to be less than five years). The fund manager seeks to reduce the effect of credit risk through diversification and its analysis and selection of bonds.

The Fund does not have a benchmark. ICE BofAML British Pound 3-Month Deposit Bid Rate Average Index (L5BP) may be used by investors to compare the Fund's performance. Where bonds are denominated in a currency other than Sterling, the Fund aims to reduce the risk of movements in exchange rates between such currency and Sterling through the use of derivatives (financial instruments which derive their value from the value of other assets). The Fund may also invest in other transferable securities (including, but not limited to, high yield debt securities, investment grade debt securities, convertibles, tbbills), cash, deposits, units in collective investment schemes (including those that are operated by the ACD) and money market instruments. The Fund may use derivatives for investment purposes as well as for Efficient Portfolio Management. Use may be made of stock lending, borrowing, cash holdings, hedging and other investment techniques permitted in the applicable Financial Conduct Authority Rules.

The Fund is actively managed. It is not managed in reference to any benchmark.

Income

Income from investments in the Fund will be rolled up into the value of your shares if you hold accumulation shares.

Fund Currency

The reference currency of the Fund is Sterling.

Investment Horizon

This Fund may not be suitable for investors who plan to withdraw their contribution within three years.

Processing of subscription and redemption orders

Your orders to buy, sell or transfer shares in the Fund, must be received by the Administrator by 12 noon on any working day to receive that day's Fund price. Also this Fund has another Valuation Point on the last business day of each month and therefore an additional dealing cut off at 4.30pm on that day only. Please note that if your order is placed by an intermediary or Financial Adviser, they may require extra processing time.

The Net Asset Value of this Fund is calculated on a daily basis.

Minimum initial investment: £100,000

Minimum subsequent investment: £5,000

Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean risk free.

Why is this Fund in this category?

The capital of the Sub-Fund is not guaranteed. The Sub-Fund is invested in financial markets and uses techniques and instruments which are subject to low levels of variation under normal market conditions but, which may still result in losses.

Additional Risks

Counterparty Risk: failure by any counterparty to a transaction (e.g. derivatives) with the Fund to meet its obligations may adversely affect the value of the Fund. The Fund may receive assets from the counterparty to protect against any such adverse effect but there is a risk that the value of such assets at the time of the failure would be insufficient to cover the loss to the Fund.

Derivatives: derivatives can be more volatile than the underlying asset and may result in greater fluctuations to the Fund's value. In the case of derivatives not traded on an exchange they may be subject to additional counterparty and liquidity risk.

Interest Rate Risk: fluctuations in interest rates will change the value of bonds, impacting the value of the Fund. Generally, when interest rates rise, the value of the bonds fall and vice versa. The valuation of bonds will also change according to market perceptions of future movements in interest rates.

Liquidity Risk: some investments may trade infrequently and in small volumes. As a result the Fund manager may not be able to sell at a preferred time or volume or at a price close to the last quoted valuation. The Fund manager may be forced to sell a number of such investments as a result of a large redemption of shares in the Fund. Depending on market conditions, this could lead to a significant drop in the Fund's value and in extreme circumstances lead the Fund to be unable to meet its redemptions.

Credit Risk: the risk that an issuer of bonds will default on its obligations to pay income or repay capital, resulting in a decrease in Fund value. The value of a bond (and, subsequently, the Fund) is also affected by changes in market perceptions of the risk of future default. Investment grade issuers are regarded as less likely to default than issuers of high yield bonds.

Further explanation of the risks associated with an investment in this Fund can be found in the prospectus.

- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund’s ranking on the Risk and Reward Indicator.

- Please note that even the lowest risk class can lose you money and that extreme adverse market circumstances can mean you suffer severe losses in all cases.
- The Fund is classified in the category above because it invests in company shares which generally provide higher rewards and higher risks than other investments such as bonds or cash. Where no share price history is available for any part of the last five years (and thus no returns), the returns of the Fund’s sector are used in its place to calculate the Risk and Reward Indicator.
- The indicator does not take into account the following relevant material risks:
 - Investment markets can go down as well as up and market conditions can change rapidly. The value of an investment in the Fund, and any income from it, can fall as well as rise and you may not get back the amount invested.
 - The Fund has exposure to foreign currencies and changes in the rates of exchange will cause the value of any investment, and income from it, to fall as well as rise and you may not get back the amount invested.
 - Custody of assets, particularly in emerging markets, involves a risk of loss if the custodian becomes insolvent or breaches duties of care.
 - The Fund invests in emerging markets where difficulties in trading could arise, resulting in a negative impact on the value of your investment.
 - The Fund invests according to responsible investment criteria and with reference to the ten principles of the United Nations Global Compact for business. This means the Fund will not invest in certain sectors and companies and, therefore, the universe of available investments will be more limited than other funds that do not apply such criteria/ exclusions. The Fund therefore may have different returns than a fund which has no such restrictions.
- Where possible, charges are taken from the Fund’s revenue. Where there is insufficient revenue, the remainder will be taken from capital. This will reduce the capital value of the Fund.
- The process for the UK to exit the European Union introduces elements of political uncertainty and may have practical consequences for the Fund. Developments will be closely monitored.
- Infectious viruses may pose significant threats to human health and may be highly disruptive to global economies and markets. The economic and market disruptions caused by infectious viruses could impact the value of the investments of the Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Key Investor Information

The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

BMO Responsible Global Equity Fund

Share Class: 2 Acc, a Fund of BMO Investment Funds (UK) ICVC V (ISIN GB0033145045)
This Fund is managed by BMO Fund Management Ltd.

Objectives and investment policy

The objective is to provide long-term capital growth.

The Manager seeks to achieve this by investing mainly in global equities (ordinary shares in companies from anywhere in the world). The Manager invests only in assets which meet the Fund's ethical screening criteria. The ethical screening applied to the Fund means that a number of the largest companies are screened out on ethical grounds.

While the Manager will invest mainly in equities, it may also invest in other investments such as derivatives (an investment contract between the Fund and a counterparty the value of which is derived from one or more underlying equities) to hedge positions or to gain exposure to companies to manage the portfolio efficiently.

Hedging is an investment technique that may be used to protect the value of the Fund from adverse price movements in equities or currencies other than the Fund's accounting currency, which is sterling. The Fund does not normally hedge currency exposure.

Investment is concentrated in companies in any market whose products and operations are considered to be making a positive contribution to society and seeks to avoid companies which, on balance, do particular harm (including those involved in the sale of armaments) or operate irresponsibly (for example with regard to the environment or human rights).

The Fund is actively managed. The Manager believes that an appropriate comparator benchmark for reviewing fund performance is the MSCI World index, given the investment policy of the Fund and the approach taken by the manager. The Fund is not constrained by this benchmark and has significant freedom to invest in a portfolio that is materially different to the benchmark's own composition.

Any income earned by this share class will be reinvested back into the share class to help boost the value of the share.

There is no minimum holding period for this Fund. However, it may not be appropriate for investors who plan to withdraw their money in under 5 years.

You may buy or sell shares daily on demand (but not weekends or UK bank holidays or other days when the Fund is not open for dealing). Orders to buy or sell must be received by 12 noon (UK time) to receive the price calculated at that day's valuation point.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk

Typically higher rewards, higher risk

Historical data may not be a reliable indicator of the Fund's future risk and reward profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean 'risk free'. The value of your investment may fall as well as rise.

The category is based on the rate at which the value of the investments held by the Fund have moved up and down in the past.

The indicator does not adequately reflect the following risks of investing in particular assets, which may impact on future investment return:

Derivative Risk: derivative values rise and fall at a greater rate than equities and debt instruments. Loses can be greater than the initial investment.

Liquidity Risk: the ability to buy and sell assets at a favourable price may be affected by a low level of counterparties willing to enter into a transaction with the Fund.

Ethical Screening Risk: the screening out of sectors or companies on ethical grounds may mean the Fund is more sensitive to price swings than an equivalent unscreened fund.

Currency Risk: your investment may be adversely affected by changes in currency exchange rates.

Emerging Markets Risk: this Fund invests in emerging markets which are less developed and have additional legal and political risks.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

BMO UK Property Feeder Fund

Share Class: 2 Acc, (ISIN GB00BWZMHM55).
This Fund is managed by BMO Fund Management Ltd.

Objectives and investment policy

The investment objective of the Fund is to provide income and capital growth.

The Fund will invest all or substantially all of its assets in the shares of the BMO UK Property Fund ICVC. To the extent that the Fund is not fully invested in the BMO UK Property Fund ICVC the Fund will hold its remaining assets in cash. The BMO UK Property Fund ICVC is a property authorised investment fund which invests mainly in a diversified portfolio of commercial property.

Any income earned by this unit class will be reinvested back into the unit class to grow the value of your investment.

There is no minimum holding period for this Fund. However, it may not be appropriate for investors who plan to withdraw their money in under 5 years.

You may buy or sell units daily on demand (but not weekends or UK bank holidays or other days when the Fund is not open for dealing). Orders to buy or sell must be received by 12 noon (UK time) to receive the price calculated at that day's valuation point.

Risk and reward profile

Historical data may not be a reliable indicator of the Fund's future risk and reward profile. The value of your investment may fall as well as rise.

You need to be aware of the following risks before investing:

Property Risk: the value of such investments is likely to reflect valuations of property assets as determined by professional valuers. Such valuations are the opinion of the valuer at a particular time, may not be supported by recent transactions and are liable to revision, up or down.

Fund Liquidity Risk: the ability of the Fund to meet redemptions within normal settlement terms depends on the readily realisable assets held in the Fund. If properties have to be sold quickly this could result in lower prices being obtained for them.

Liquidity Risk: the ability to buy and sell assets at a favourable price may be affected by a low level of counterparties willing to enter into a transaction with the Fund.

Restricted Diversification: investments are concentrated in direct property in the UK. These investments are limited to a relatively narrow segment of the economy. Performance may differ in direction and degree from that of the stock market.

UK RESPONSIBLE INCOME FUND

Class I Inc ISIN: GB0005030373
Fund Currency: GBP Share Class Currency: GBP

Janus Henderson
— INVESTORS —

A sub-fund of Janus Henderson Sustainable/Responsible Funds, a UK OEIC managed by Henderson Investment Funds Limited.

Objective and investment policy

Objective

The Fund aims to provide an income with the potential for capital growth over the long term (5 years or more).

Investment policy

The Fund invests at least 80% of its assets in shares (also known as equities) of companies, of any size, in the UK. Companies will be incorporated, headquartered, or deriving significant revenue from, the UK.

The Fund may also hold cash.

The investment manager may use derivatives (complex financial instruments) to reduce risk, to manage the Fund more efficiently, or to generate additional income for the Fund.

The Fund is actively managed with reference to the FTSE All Share Index, which is broadly representative of the companies in which it may invest, as this can provide a useful comparator for assessing the Fund's performance. The investment manager has discretion to choose investments for the Fund with weightings different to the index or not in the index.

As an additional means of assessing the performance of the Fund, the IA UK Equity Income sector average, which is based on a peer group of broadly similar funds, may also provide a useful comparator.

Strategy

The investment manager adopts a flexible and pragmatic investment process, designed with the intention of achieving its objective in a variety

of market conditions. The investment process focuses on UK companies with good cash flow and growing dividends, as well as seeking only to invest in companies with a high level of environmental, social and governance (ESG) integrity, which avoids investing in companies involved in such areas as gambling, alcohol production, the military, nuclear energy, and tobacco.

Distribution policy The Fund offers accumulation shares (shares in which net income is retained within the price) and income shares (shares in which net income may be paid out to investors).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any business day, as defined in the Fund Prospectus.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.janushenderson.com.

Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 6 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in net asset value in the past 5 years than those in lower categories. The lowest category does not mean risk free.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

Equities Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.

Smaller Companies Shares of small and mid-size companies can be more volatile than shares of larger companies, and at times it may be difficult to value or to sell shares at desired times and prices, increasing the risk of losses.

Country or Region If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.

Sustainable Investment The Fund follows a sustainable investment approach, which may cause it to be overweight and/or underweight in certain sectors and thus perform differently than funds that have a similar objective but which do not integrate sustainable investment criteria when selecting securities.

Derivatives The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Charges to Capital Some or all of the ongoing charges may be taken from capital, which may erode capital or reduce potential for capital growth.

Counterparties The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund. For more information please see the Fund Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge 0.00%

Exit Charge 0.00%**

* The charges shown are maximum figures. In some cases you may pay less.

** Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Charges taken from the Fund over a year

Ongoing Charges 0.84%

The ongoing charges are based on last year's expenses for the year ending 31 March 2019. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

For more information please see the Fund Prospectus.

Past performance

The past performance is calculated in GBP.

The Fund and the share class were launched in June 1995.

Past performance is not a guide to future performance.

The past performance shown in the chart takes into account all charges except one-off charges.

The Fund does not aim to track the performance of the index.

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Legal & General Cash Trust Class I Accumulation - ISIN: GB00B0CNHB64

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited.

OBJECTIVES AND INVESTMENT POLICY

- The objective of this Fund is to maintain capital and to provide a return in line with money market rates, before charges.
 - The Fund will generally invest in short term deposits, certificates of deposit, government bonds (predominantly UK) issued in pounds sterling (a type of loan which pays interest) and Repos. Repos are an agreement between two parties to sell or buy an asset and later reverse the trade at an agreed date and price.
 - In stressed market conditions, the Fund may be invested up to 100% in government and public securities issued by a single issuer.
 - The maximum maturity of the instruments the Fund invests in is 397 days but the Fund must maintain a weighted average maturity of less than 60 days.
 - The bonds that the Fund invests in must be investment grade (rated as lower risk). Investment grade bonds are bonds that have achieved a higher credit rating from a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
 - The Fund may also invest in other fixed income securities, other money market instruments and collective investment schemes.
- Other information:**
- The Fund is actively managed as the Manager uses their expertise to pick investments to achieve the Fund's objective.
 - There is no representative target or constraining benchmark available for this Fund.
 - The Fund is a short-term variable net asset value money market fund.
 - Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in sterling (British pounds).
 - This Fund is designed for investors looking to preserve their money from an investment in deposits and short term instruments.
 - This Fund may be appropriate for investors looking to invest for a short period of time.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

Lower risk ← Higher risk
Potentially lower rewards Potentially higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 1 as it invests in instruments which are very liquid, have short maturities which have a high credit rating and are considered lower risk than longer maturing securities.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.

Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- This Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the Fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depository.
- The Fund has money on deposit with companies such as banks or other financial institutions and invests in bonds which are issued by the government. If these companies or the government experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the Fund may fall.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- When interest rates are low and if the Fund's income is not enough to pay charges, the Fund's capital will be used instead. This may cause the value of the Fund to fall.
- We may take some or all of the ongoing charges from the Fund's capital rather than the Fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested.	
The price for buying and selling units is subject to a Dilution Adjustment See opposite.	
Charges taken from the fund over a year	
Ongoing charge	0.15%
Charges taken from the fund under certain specific conditions	
Performance fee	None

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at October 2020. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken from the income of the Fund.

Other costs:

- **Dilution Adjustment:** on any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'. This can vary but as an example for this Fund we estimate 0.00% for purchases and 0.00% for sales at 01 December 2020. The amount of the dilution adjustment may differ in future.
- For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in Sterling (British Pounds).
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 1992.
- This unit class launched in 2005.
- To assess the performance of the Fund, it can be compared to the IA sector, Short Term Money Market (referred to as the "Comparator" in the chart opposite).
- **Please note that performance up to 2015 shown in this graph was achieved under a different investment approach which no longer applies. Performance after 2015 is under the current investment approach, which started on 28 April 2016.**

LIONTRUST

SUSTAINABLE FUTURE CAUTIOUS MANAGED FUND

KEY INVESTOR INFORMATION DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Sustainable Future Cautious Managed Fund is a sub-fund of the Liontrust Sustainable Future ICVC and categorised as a UCITS scheme. This document is based upon Retail class units (2 Inc Class) (ISIN: GB00BMN90304). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- The Fund aims to deliver capital growth over the long term (5 years or more).

Policy

- The Fund is actively managed without reference to any benchmark meaning that the Investment Adviser has full discretion over the composition of the Fund's portfolio, subject to the stated investment objectives and policies.
- The Fund will invest globally. All investments will be expected to conform to our social and environmental criteria as set out on the Liontrust website (liontrust.co.uk).
- Allocations to equities, fixed income, and cash will vary over time depending on market circumstances. Asset allocation limits will remain in line with the IA Mixed Investments (40-85% shares) Sector.
- Asset allocation ranges:
 - Equity – 40-60 %
 - Fixed income – 20-50%
 - Cash – 0-20%
- The Fund may also invest in collective investment schemes including other Liontrust Funds (up to 10% of Fund assets), other transferable securities, money market instruments, warrants and deposits.
- The Fund is permitted to use derivatives for the purposes of efficient portfolio management and for investment purposes.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk.

Investment process

- The Fund can invest in equities, bonds and cash.
- For equities, the process starts with a thematic approach in identifying the key structural trends that will shape the global economy of the future. We currently invest in three transformative trends (Better Resource Efficiency, Improved Health and Greater Safety and Resilience) and 20 themes within these. The team then invests in well-run companies whose products and operations capitalise on these transformative changes.
- While themes are at the heart of idea generation, there are three further criteria all holdings have to satisfy:
 - Broader sustainability: While a company might have significant exposure to a theme, the team has to check how sustainable the rest of its activities are.
 - Business fundamentals: The team assesses a company's ability to generate high returns on equity.
 - Financial modelling and valuation: This information is used to construct financial models detailing the revenue, margin and earnings progression the company is likely to deliver over the next five years.
- For the fixed income process, macroeconomic analysis determines the managers' top-down view of the world and this helps shape portfolio construction and appetite for risk. After this, the managers aim to focus on high-quality issuers and believe this can reduce bond specific risk. Assessment of quality is a distinctive part of their process, combining traditional credit analysis with a detailed sustainability assessment based on their proprietary model.
- The managers seek the best-value bonds from high-quality issuers across the capital structure, along the maturity curve and issued in primary credit markets (UK, US and Europe).
- The Fund's asset allocation is based on long-term risk/return profiles of equities, bonds and cash. The managers then tactically adjust these exposures within predefined ranges to enhance overall investment returns. Tactical positioning is driven by analysis of leading economic indicators and then an assessment of asset class valuations relative to both their own history and to each other.

Risk and reward profile

Lower Risk
Typically lower rewards

Higher Risk
Typically higher rewards

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 4 primarily because of its exposure to a diversified portfolio of equities and debt instruments.
- Fluctuations in interest rates are likely to affect the value of the bonds and other fixed-interest securities held by the Fund. If long-term interest rates rise, the value of your shares is likely to fall.
- The Fund can invest in derivatives. Derivatives are used to protect against currencies, credit and interest rates move or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions.
- The Fund has holdings which are denominated in currencies other than Sterling and may be affected by movements in exchange rates. Consequently the value of an investment may rise or fall in line with the exchange rates.
- Investments in emerging markets may involve a higher element of risk due to less well regulated markets and political and economic instability.
- Counterparty risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.

- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

LIONTRUST

SUSTAINABLE FUTURE GLOBAL GROWTH FUND

KEY INVESTOR INFORMATION DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Sustainable Future Global Growth Fund is a sub-fund of the Liontrust Sustainable Future ICVC and categorised as a UCITS scheme. This document is based upon Retail class units (2 Acc Class) (ISIN: GB0030030067). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- The Fund aims to deliver capital growth over the long term (5 years or more).

Policy

- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund will invest in companies globally. All investments will be expected to conform to our social and environmental criteria as set out on the Liontrust website (liontrust.co.uk).
- The Fund will typically invest 95% (minimum 90%) of its assets in equities or equity related derivatives but may also invest in collective investment schemes (up to 10% of Fund assets), corporate debt securities, other transferable securities, money market instruments, warrants, cash and deposits.
- Investments in emerging market securities will be limited to 20%.
- The Fund is permitted to use derivatives for the purposes of efficient portfolio management and for investment purposes.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

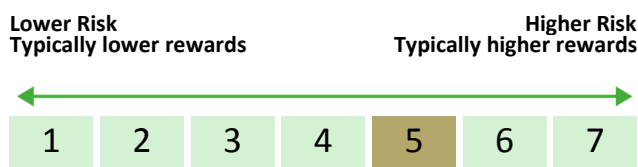

How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk.

Investment process

- The process starts with a thematic approach in identifying the key structural trends that will shape the global economy of the future. We currently invest in three transformative trends (Better Resource Efficiency; Improved Health; and Greater Safety and Resilience) and 20 themes within these trends such as technological and medical advancements.
- The team then invests in well run companies whose products and operations capitalise on these transformative changes.
- While themes are at the heart of the investment idea generation, there are three further criteria all potential holdings have to satisfy:
 - Broader sustainability of the company: While a company might have significant exposure to a theme, the team has to check how sustainable the rest of its activities are.
 - Business fundamentals: The team assesses a company's ability to generate high returns on equity. This includes analysis of the competitive dynamics facing the business and the resilience of its advantages versus competitors.
 - Financial modelling and valuation assessment: This information is used to construct financial models detailing the revenue, margin and earnings progression the company is likely to deliver over the next five years.
- Among the team's key differentiators is the fact that all the sustainable elements are integrated within a single team. Every team member is responsible for all aspects of financial and ESG relating to an investment decision. This means the team engages with companies across a broad range of issues relating to stages in their process, including screening criteria, sustainable investment themes and company specific ESG issues.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.

- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 5 primarily due to its exposure to global equities.
- The SRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - any company which has high overseas earnings may carry a higher currency risk;
 - any overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- The Fund may, under certain circumstances, make use of derivative instruments but it is not intended that their use will materially affect volatility.
- Counterparty risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

Key Investor Information

This document provides you with key investor information about the Compartment. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in the Compartment. You are advised to read it so that you can make an informed decision about whether to invest.

Pictet - Global Environmental Opportunities

(the "Compartment") is a compartment of Pictet (the "Fund").

I dy GBP (the "Share Class") - ISIN LU0503632878

The Fund is managed by Pictet Asset Management (Europe) S.A. (the "Management Company"), part of the Pictet group

Objectives and investment policy

OBJECTIVE

To increase the value of your investment.

REFERENCE INDEX

MSCI ACWI (EUR). Used for performance objective and performance measurement.

PORTFOLIO ASSETS

The Compartment mainly invests in equities of companies in clean energy and water, agriculture, forestry and other areas of the environmental value chain. The Compartment may invest worldwide, including in emerging markets and Mainland China.

DERIVATIVES AND STRUCTURED PRODUCTS

The Compartment may use derivatives to reduce various risks (hedging) and for efficient portfolio management, and may use structured products to gain exposure to portfolio assets.

COMPARTMENT CURRENCY

EUR

INVESTMENT PROCESS

In actively managing the Compartment, the investment manager uses a combination of market and fundamental company analysis to select securities that it believes offer favourable growth prospects at a reasonable price. The portfolio composition is not constrained relative to the benchmark, so the similarity of the Compartment's performance to that of the benchmark may vary.

Terms to understand

Derivatives Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

Emerging markets Markets of less economically developed nations, such as some nations in Asia, Africa, Eastern Europe and Latin America.

Equities Securities that represent a share in the business results of a company.

Structured products Securities similar to derivatives, but with defined risk or performance characteristics.

Other characteristics

Designed for investors who understand the risks of this Compartment and plan to invest for 5 year(s) or more. This is a distribution share class, meaning that it intends to pay income to the holder. Orders to buy, switch or redeem shares are ordinarily processed on any day that is a full bank business day in Luxembourg.

Risk and reward profile

Lower Risk					Higher Risk	
1	2	3	4	5	6	7
Typically lower reward						Typically higher reward

The Share Class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Compartment's investments and strategy. The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Share Class. It is not a target or a guarantee and may change over time. The lowest category does not mean a risk-free investment. The Compartment offers no capital guarantee or asset protection measures. The Compartment may be exposed to the following risks which are not adequately captured by the synthetic risk indicator and may negatively impact its value:

- **Financial Derivatives risk:** the leverage resulting from derivatives amplifies losses in certain market conditions.
- **Counterparty risk:** losses occur when a counterparty does not honour its obligations related to contracts such as over-the-counter derivatives.
- **Investments in emerging markets** are generally more sensitive to risk events, such as changes in the economic, political, fiscal and legal environment, as well as fraud.
- **Investments in Mainland China** may be subject to capital restrictions and trading quotas (e.g. QFII and RQFII regimes). The Compartment may encounter difficulties or delays in enforcing its rights in the event of disputes.
- **Chinese "Stock Connect"** trading programmes may be subject to additional risks related to ownership rights, clearing & settlement, trading quotas and operational issues.
- **Operational risk:** losses resulting from human errors, system failures, incorrect valuation and safekeeping of assets.

Further information can be found in the prospectus.

Charges

The charges you pay are used to cover the costs of running the Compartment, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry, conversion and exit charges shown are maximum figures. In some cases you may pay less. You can find this out from your financial adviser or fund distributor.

The **ongoing charges** figure is based on expenses for the period ending on 31 October 2020. This figure may vary from year to year. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Compartment when buying or selling units/shares in another collective investment undertaking.

For more information on charges, please refer to the "Fund Expenses" section of the Fund's prospectus available on assetmanagement.pictet

Rathbone Ethical Bond Fund (I-class)

Fund Manager: Rathbone Unit Trust Management Limited

Accumulation units ISIN: GB00B77DQT14

Income units ISIN: GB00B7FQJT36

Objectives and investment policy

We aim to deliver a greater total return than the Investment Association (IA) Sterling Corporate Bond sector, after fees, over any rolling five-year period. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (interest payments). We use the IA Sterling Corporate Bond sector as a target for our fund's return because we aim to achieve a better return than the average of funds that are similar to ours.

We will invest at least 80% of our fund in corporate bonds with an investment-grade rating (AAA to BBB-), based on the average of the three largest rating agencies (Standard & Poor's, Moody's and Fitch). We can invest up to 20% of our fund in corporate bonds with a credit rating below BBB- or with no rating at all. Up to 10% of the fund can be invested directly in contingent convertible bonds. These specialist bonds, typically issued by banks and insurers, are forcibly replaced with shares if the issuer experiences heavy losses. At least 80% of the portfolio will be invested in sterling bonds or in overseas assets whose value we have hedged back to sterling. Hedging means we buy a financial instrument to swap the value of these assets into sterling to protect our investment from changes in the price of foreign currencies.

We actively manage our fund, which means we can choose what we invest in as long as it's in line with the investment objective and policy. Because of this, our funds performance can diverge significantly from its benchmarks over shorter periods of time and therefore isn't appropriate for investors who plan to withdraw their money within five years.

Our fund's ethical and sustainability criteria are applied by Rathbone Greenbank Investments, an ethical research division of our company, which cannot be influenced by our fund managers. Companies are assessed against positive and negative social and environmental criteria.

For us to invest in a company, it must satisfy at least one of the following: strong employment practices, sustainable environmental practices or community engagement and commitment to human rights.

We do not invest in companies engaged in the following:

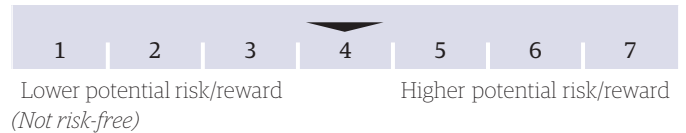

- Alcohol manufacturing
- Human rights abuses
- Poor employment practices
- Animal welfare violations
- Pornography
- Gambling
- Carbon-intensive industries
- Alcohol retail
- Nuclear power
- Polluting the environment
- Armaments
- Tobacco manufacturing

Our fund is designed for investors with a basic knowledge of bonds who seek income and growth. You should intend to invest for longer than five years, understand the risks of our fund and have the ability to bear a capital loss.

You can buy and sell units on each business day of the fund between 9am and 5pm.

The fund offers accumulation units (units in which any income payable by the fund is reinvested) and income units (units in which any income received in the fund will be paid to the unitholder).

Risk and reward profile

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

The risk indicator for this fund reflects the following:

- The emphasis on income helps the manager to maintain a moderate risk profile for the fund.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your units.

During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

Counterparty risk: A company that we deal with may renege on its obligations, costing you money.

Currency risk: We own assets valued in a currency other than sterling. Changes in the price of foreign currencies can result in gains or losses, even if underlying asset prices stay the same.

Credit risk: Bonds that we own can become more or less creditworthy and will fluctuate in value resulting in gains or losses. Bonds that we own may fail to meet their legal obligations, such as missing an interest payment. This is known as a 'default' and will result in a loss.

Derivatives risk: Sometimes we use financial contracts to reduce risk. There is a chance that these derivatives won't work in the way we intended, which could result in unexpected gains or losses.

Liquidity risk: Some assets held in this fund can be hard to sell, especially in times of market stress. This could mean that if we had a lot of money redeemed from our fund in a short period of time, we might not be able to meet our obligations. In this circumstance, we are able to suspend our fund until we could find a buyer for these assets. This would result in you being unable to access your money.

Management risk: People make the investment decisions for our fund. If they make unfavourable decisions, you could lose money.

Operational risk: We rely on complex systems to ensure that trades are completed, our fund's assets are accounted for and that you can buy or sell our fund. If our systems fail, you could be inconvenienced or lose money.

Interest rate risk: Most bonds pay us a fixed amount over an agreed period of time. If interest rates rise these bonds become less valuable and we may be locked into an unfavourable investment. If interest rates fall these bonds become more valuable.

Charges for this fund

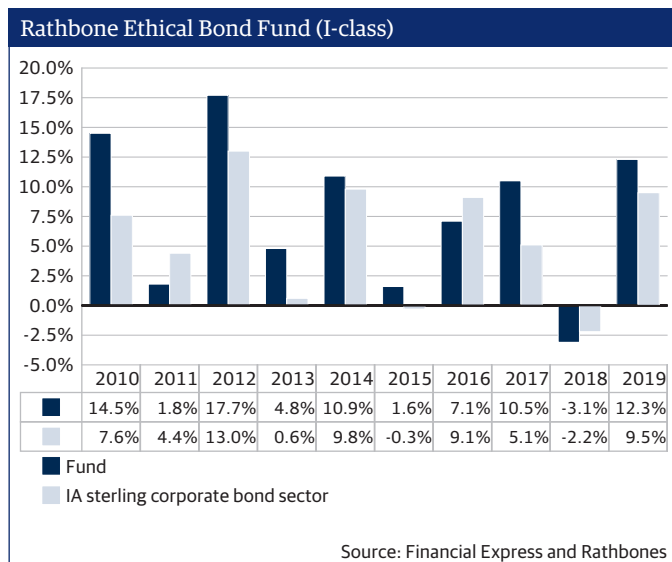

The fund manager receives an annual fee, which is included in the ongoing charges shown below. You may be eligible for lower entry charges than the maximum shown; ask your financial adviser. Ongoing charges are the same for all investors in the same class. The charges shown below are based on actual fees and expenses for the year ending 31 March 2020.

One-off charges taken before or after you invest:	
Entry charge	none
Exit charge	none
Charges taken from the fund over a year:	
Ongoing charges	0.66% (Acc units); 0.66% (Inc units)
Charges taken from the fund under specific conditions:	
Performance fee	none

For more information about charges, please see the "Charges" section of the fund's Prospectus, available by calling the Information Line or emailing rutm@rathbones.com.

Past performance

Basis of performance: bid to bid, net income reinvested.
Fund inception: 14 May 2002. I-class units were launched 1st March 2012. Performance is based on the prices for R-class units prior to that date.

Past performance should not be seen as an indication of future performance.

Royal London Cash Plus Fund (Accumulation - Class Y Shares)

A sub-fund of Royal London Bond Funds ICVC ISIN: GB00BMNR1H58
Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective The Fund's investment objective is to achieve a total return over rolling 12-month periods by mainly investing in cash and cash equivalents and government securities.

The Fund's performance target is to outperform, before the deduction of charges, the Bank of England Sterling Overnight Interbank Average (SONIA) by 0.50% per annum over rolling 12-month periods.

Policy A minimum of 50% of the Fund will be invested in a combination of money market instrument, including cash, time deposits, certificates of deposit and commercial paper and floating rate notes. Government bonds are also included in this segment of the Fund. In exceptional circumstances the Fund may invest up to 100% in money market instruments.

The Fund will also invest in a range of securities, including corporate bonds and supranational & agency bonds, asset backed securities and/or transferable securities. The Fund may also make use of reverse repurchase agreements. The Fund may also hold a small amount of its portfolio in derivatives.

Money market instruments used by the Fund will have a minimum rating of A-1, P-1 or F1. Bonds must have a minimum rating of AA-, Aa3 or AA-. Assets may exceed 397 days to maturity. There are no weighted average maturity or weighted average life constraints on the Fund.

The Fund's holdings are also subject to predefined ethical criteria. The Fund's manager will not consider the bonds or other securities of companies or other organisations that generate more than 10% of their turnover from either one or a combination of the following: Armaments, Tobacco or Fossil Fuels.

Full details of the Fund's ethical criteria are available on request and can be found on our website.

For more information on investment terms used in this document please refer to the glossary on our website:

<https://www.rlam.co.uk/Home/Intermediaries/Supplementary-links/Glossary/>.

Recommendation Investors who seek income or a short-term investment option.

Concepts to understand

Bonds Securities that represent an obligation to repay a debt, with interest. Investment grade bonds are high quality bonds that are viewed as being highly likely to make all scheduled payments of interest and principal. Low quality bonds carry higher risk but also typically pay higher rates of interest.

Derivative A financial instrument whose price is dependent upon or derived from one or more underlying asset.

Efficient Portfolio Management An investment technique that allows the use of derivatives for at least one of the following purposes: to increase the value of the Fund; to protect the value of the Fund or to reduce the risks of certain investments.

Money market instruments Investments that pay interest, have a short duration and are designed to maintain a stable value.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so.

Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

The fund is shown in risk category 1 because its share price has shown a very low level of volatility historically. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Counterparty Risk Market counterparties could become unable to make interest payments or repay debt. As such the value of the Fund will fall in the event of a counterparty default. In general investments that pay a higher level of income usually reflect a lower counterparty credit rating because of the increased risk of default.

Interest Rate Risk Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

For more about fund risks, see the "Risk Factors" section in the Prospectus (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/)

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:

Entry charge None

Exit charge None

Charges taken from the fund over a year:

Ongoing charge 0.15%

Charges taken from the fund under specific conditions:

Performance fee None

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

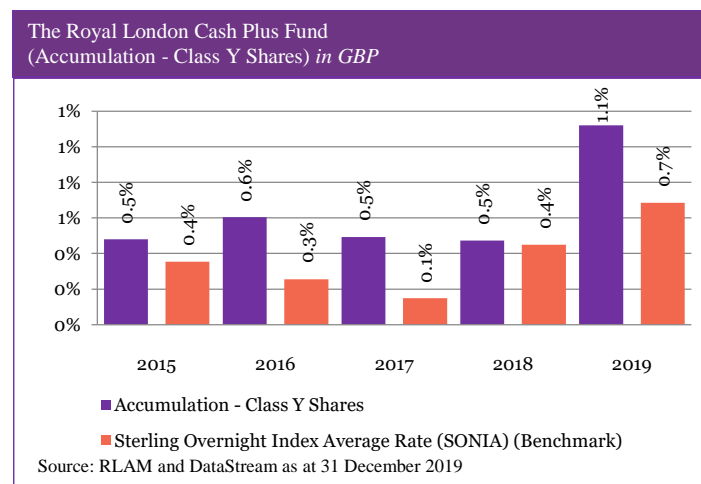

Ongoing charge is based on the Fund Management Fee (FMF), which is the periodic fee paid to the ACD to cover the expenses of the Fund. This figure does not include portfolio transaction costs. Ongoing charges are the same for all investors in the share class.

For more about charges, see the expenses section in the full Prospectus and supplement (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/)

Past performance

The graph shows fund performance over the past 5 years where available. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.

The Fund was launched on 15 June 2011 and the share class on 12 June 2014.

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance.

Royal London Ethical Bond Fund (Accumulation - Class M Shares)

A sub-fund of Royal London Bond Funds II ICVC ISIN: GB00BJ4KSX76
Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective The Fund's investment objective is to achieve a total return over the medium term (3-5 years) by investing at least 80% in sterling-denominated corporate bonds, which meet predetermined ethical criteria.

The Fund's performance target is to outperform the Markit iBoxx Sterling Non-Gilt Overall All Maturity Index (the "Index") over a rolling 5-year period. For further information on the Fund's index, please refer to the Prospectus.

The Fund is actively managed.

Policy At least 80% of the Fund will be invested in corporate bonds denominated in sterling or hedged back to sterling, which will generally be fixed-rate issues (bonds paying interest at an unchanging rate, rather than on an adjustable basis).

The remainder of the Fund's assets may be invested in a range of securities, including government bonds, index-linked bonds, securitisations, supranational bonds, agency bonds, preference shares, floating-rate notes, asset-backed securities and bonds denominated in currencies other than sterling.

A limited amount of the Fund's assets may be invested in other transferable securities and money market instruments. The Fund may also invest hold a small amount of its portfolio in derivatives (investments that derive their value from another closely related underlying investment) for the purposes of efficient portfolio management.

Cash is unlikely to exceed 5% of assets.

For more information on investment terms used in this document please refer to the glossary on our website:

<https://www.rlam.co.uk/Home/Intermediaries/Supplementary-links/Glossary/>.

Recommendation The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Concepts to understand

Bonds are defined as fixed-income investments issued as debt by companies and public bodies to raise finance. Investors in bonds receive a previously agreed, non-variable interest payment until the investment matures. Corporate bonds are those issued by companies to raise finance.

Total Return A total return is a combination of capital growth and income. Capital growth is defined as the rise in an investment's value over time and income as the payment an investment generates, such as dividends or bond coupons.

Rolling 5 Year Period A rolling 5-year period is any period of five years, no matter which day you start on.

Hedged Hedging reduces risk by protecting an investment with another related investment.

Efficient Portfolio Management A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

Typically lower rewards

Typically higher rewards

The fund is shown in risk category 4 because its simulated price has shown a medium level of volatility historically. The Fund was formed by merger and the SRRI was calculated using historic data from the merging fund and may not be a reliable indicator of the future risk profile of the fund. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Credit Risk Issuers of certain fixed income securities could become unable to make income or capital payments on their debt. As such the value of a security will fall in the event of a rating downgrade or default of the issuer. In general fixed income securities that pay a higher level of income usually have a lower credit rating because of the increased risk of default.

Interest Rate Risk Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Liquidity Risk In difficult market conditions the value of certain fund investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.

For more about fund risks, see the "Risk Factors" section in the Prospectus (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/)

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:

-----------------	------

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

The ongoing charges figure shown is an estimate of the charges because the share class only launched on 12 April 2019. The annual report for each financial year will include details on the exact charges made.

Royal London Sustainable Diversified Trust (Accumulation - Class C Shares)

ISIN: GB00B79LTQ12
Managed by RLUM Limited

Objectives and investment policy

Objective The Fund's investment objective is to achieve capital growth over the medium term (3-5 years) by investing in a diverse range of asset classes, primarily in the UK that are deemed to make a positive contribution to society. Investments in the Fund will adhere to the Manager's ethical and sustainable investment policy. The Fund is actively managed.

Policy Up to 60% of the Fund will be invested in companies. These will be businesses that are listed on stock exchanges in their respective countries. Approximately 40% of assets will be invested in sterling-denominated corporate bonds. The Fund is required to keep at least 30% of its assets in bonds and cash. The Fund focuses on the sustainability of the products and services of the companies it invests in, as well as their standards of environmental, social & governance (ESG) management, alongside financial analysis. For further details of the Manager's ethical and sustainable investment policy please refer to the Prospectus. Investors can view the current policy at <https://www.royallondon.com/existing-customers/yourproducts/manage-your-isa-or-unit-trust/rlum-isa-overview/>.

The Fund may invest up to 10% in other investment funds, known as collective investment schemes. Typically only a small portion of assets will be invested in cash. The Fund may also invest a small amount of its portfolio in derivatives (investments that derive their value from another closely related underlying investment) for investment purposes and efficient portfolio management (EPM).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within five years. You should aim to keep your units for at least five years, although you can sell them at any time.

Concepts to understand

Bonds are defined as fixed-income investments issued as debt by companies and public bodies to raise finance. Investors in bonds receive a previously agreed, non-variable interest payment until the investment matures. Corporate bonds are those issued by companies to raise finance.

Capital Growth The rise in an investment's value over time.

Environmental, social and governance A list of predefined criteria that determines how a company operates in terms of sustainability and overall corporate governance.

Efficient Portfolio Management A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

Typically higher rewards

The fund is shown in risk category 4 because its unit price has shown a medium level of volatility historically. Bonds issued by corporations are typically more volatile than bonds issued by governments.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Concentration Risk Funds which invest in a smaller number of securities can carry more risk than funds spread across a larger number of companies. To the extent that the Fund has exposure to an issuer, geographical area or type of security that is heavily affected by an event, either positive or negative, its value may rise or fall.

Credit Risk Issuers of certain fixed income securities could become unable to make income or capital payments on their debt. As such the value of a security will fall in the event of a rating downgrade or default of the issuer. In general fixed income securities that pay a higher level of income usually have a lower credit rating because of the increased risk of default.

Interest Rate Risk Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Exchange Rate Risk Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.

Liquidity Risk In difficult market conditions the value of certain fund investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.

Derivative Risk Investing in derivatives, including commodity derivatives, carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the Fund being leveraged (where economic exposure, and thus the potential for loss by the Fund exceeds the amount it has invested) and in these market conditions leverage may magnify losses.

For full details of the Fund's risks, please see the prospectus which may be obtained from (www.rlum.co.uk/Home/Individual-Investor/Fund-Performance--Prices/)

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:

Entry charge	None
--------------	------

Exit charge	None
-------------	------

Charges taken from the fund over a year:

Ongoing charge	0.77%
----------------	-------

Charges taken from the fund under specific conditions:

Performance fee	None
-----------------	------

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

The ongoing charges figure is based on expenses as at 31 December 2019. This figure may vary from year to year and does not include portfolio transaction costs. Ongoing charges are the same for all investors.

For more information about charges please see the Fund's prospectus, available at (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/)

Royal London Sustainable Managed Income Trust (Accumulation - Class C Shares)

ISIN: GB00B8HNKY10
Managed by RLUM Limited

Objectives and investment policy

Objective The Fund's investment objective is to achieve an income over a 12-month period that consistently exceeds typical cash deposit rates (measured by SONIA), paid out on a monthly basis, by predominantly investing in sterling-denominated bonds that are deemed to make a positive contribution to society.

Investments in the Fund will adhere to the Manager's ethical and sustainable investment policy. The Fund is actively managed.

Policy Typically, 80% of the Fund's assets will be invested in a diversified portfolio of sterling-denominated bonds or bonds hedged back to sterling (there is no formal restriction).

The remainder of the Fund's assets may be invested in a range of securities, including government bonds, index-linked bonds, securitisations, supranational bonds, agency bonds, preference shares, floating-rate notes, asset-backed securities and bonds denominated in currencies other than sterling.

The Fund focuses on the sustainability of the products and services of the companies it invests in, as well as their standards of environmental, social & governance (ESG) management, alongside financial analysis. For further details of the Manager's ethical and sustainable investment policy please refer to the Prospectus. Investors can view the current policy at <https://www.royallondon.com/existing-customers/yourproducts/manage-your-isa-or-unit-trust/rlum-isa-overview/>.

The Fund may invest up to 10% in other investment funds, known as collective investment schemes. Typically only a small portion of assets will be invested in cash.

The Fund may also invest a small amount of its portfolio in derivatives (investments that derive their value from another closely related underlying investment) for investment purposes and efficient portfolio management (EPM).

For more information on investment terms used in this document please refer to the glossary on our website: <https://www.rlam.co.uk/Home/Intermediaries/Supplementary-links/Glossary/>.

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within five years. You should aim to keep your units for at least five years, although you can sell them at any time.

Concepts to understand

Income Income is defined as the payment an investment generates, such as dividends or bond coupons.

Bonds are defined as fixed-income investments issued as debt by companies and public bodies to raise finance. Investors in bonds receive a previously agreed, non-variable interest payment until the investment matures. Corporate bonds are those issued by companies to raise finance.

Environmental, social and governance A list of predefined criteria that determines how a company operates in terms of sustainability and overall corporate governance.

Efficient Portfolio Management A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Risk and reward profile

Typically lower rewards

Typically higher rewards

The fund is shown in risk category 3 because its unit price has shown a medium to low level of volatility historically. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments.

This Fund invests in bonds but doesn't invest in shares.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe. The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Concentration Risk Funds which invest in a smaller number of securities can carry more risk than funds spread across a larger number of companies. To the extent that the Fund has exposure to an issuer, geographical area or type of security that is heavily affected by an event, either positive or negative, its value may rise or fall.

Credit Risk Issuers of certain fixed income securities could become unable to make income or capital payments on their debt. As such the value of a security will fall in the event of a rating downgrade or default of the issuer. In general fixed income securities that pay a higher level of income usually have a lower credit rating because of the increased risk of default.

Interest Rate Risk Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Liquidity Risk In difficult market conditions the value of certain fund investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.

Derivative Risk Investing in derivatives, including commodity derivatives, carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the Fund being leveraged (where economic exposure, and thus the potential for loss by the Fund exceeds the amount it has invested) and in these market conditions leverage may magnify losses.

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Objectives and investment policy

Objective: The Fund aims to achieve capital growth over the long term (at least five years).

Policy: The Fund invests in shares of companies around the world.

The Fund may invest in both developed and emerging market countries. Emerging market countries are those which are not classified as developed markets by MSCI or FTSE, or which are categorised by the World Bank as middle or low-income, or which are not members of the Organisation for Economic Co-operation and Development.

The Fund invests in shares of high quality companies which are positioned to benefit from, and contribute to, the sustainable development of the countries in which they operate.

Investment decisions around high quality companies are based on three key points:

- Quality of management including integrity, attitude to environmental and social impacts, corporate management, long term performance and risk.
- Quality of the company including its social usefulness, their environmental impacts and efficiency and responsible business practices.
- Quality of the company's finances and their financial performance.

Sustainability is a key part of the approach.

The Fund may invest up to 10% in other funds.

The Fund may use derivatives to reduce risk or to manage the Fund more efficiently.

Strategy: The Manager's investment strategy is founded on the principle of stewardship, allocating capital to good quality companies with sound growth prospects and strong management teams. The Manager's investment style is inherently long-term and conservative, seeking to buy and hold high quality companies that can deliver acceptable returns over the long-term (at least five years).

Benchmark: The Fund's performance is compared against the value of the MSCI AC World Index and the Fund is included in the Investment Association's Global Sector.

The Fund's manager may use its discretion when deciding which investments should be held by the Fund.

The Fund is actively managed; investment of the Fund's assets is not constrained by the benchmark composition or sector requirements and the Fund's manager has discretion within the Fund's investment policy to invest in assets without regard to the benchmark.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

You will not receive any income from your investment. Any income will be rolled up into the value of shares in the Fund.

You can buy and sell shares in the Fund on any business day. As long as we receive your instruction before 12 noon (UK time), shares will be bought at that day's price.

Risk and reward profile

Lower Risk ← Higher Risk
Potentially Lower Rewards Potentially Higher Rewards

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment but describes how much the value of the Share Class has gone up and down in the past. Where a Share Class has not yet launched, the SRRI is calculated using representative data.
- The SRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the Share Class.
- We cannot guarantee that the rating of the Share Class will remain the same; it may change over time.
- Even the lowest rating 1 does not mean a risk free investment.
- On a scale of 1 (less risky) to 7 (more risky), this Share Class has a rating of 5 due to its past performance (or representative data) and the

nature of its investments. Shares with a rating of 5 might have higher risks, but also higher returns.

- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss.
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

Material risks not adequately captured by the SRRI:

- **Emerging market risk:** Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.
- **Currency risk:** the Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

For further information on risks, please refer to the Risk Factors section in the Company's prospectus.
