INVESTMENT OBJECTIVE

The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets) by tracking closely the performance of the Markit iBoxx GBP Non-Gilts Overall TR Index, the Fund's benchmark index. The Fund is passively managed and the investment adviser has discretion to select the Fund's investments and in doing so may take into consideration the Benchmark Index. The Fund invests in fixed income securities (such as bonds) that make up the benchmark index and, at the time of purchase, comply with the credit rating requirements of the benchmark index. The benchmark index measures the performance of fixed income securities denominated in Sterling issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) but excludes gilts (i.e. bonds) issued by the UK government. These may include fixed income securities which pay income according to a fixed rate of interest and will be investment grade (i.e. meet a specified level of...

INVESTMENT OBJECTIVE

The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) by tracking closely the performance of the FTSE World Asia-Pacific ex-Japan Index, the Fund's benchmark index. The Fund invests in equity securities (e.g. shares) of companies that make up the benchmark index. The benchmark index measures the performance of equity securities of leading companies listed in the Asia Pacific region excluding Japan. The benchmark index is a free float-adjusted market capitalisation weighted index. Free float-adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the benchmark index. Free float-adjusted market capitalisation is the share price of a company multiplied by the number of shares readily available in the market.

INVESTMENT OBJECTIVE

The investment Adviser uses an investment process based on macroeconomic research to identify global investment themes and opportunities. The Investment Adviser uses a flexible asset allocation approach, using a broad range of asset classes, instruments and techniques. Allocations may vary significantly and exposure to certain asset classes, markets, sectors or currencies may be concentrated from time to time, in response to market conditions and opportunities. The Fund is expected to have an annualised volatility of 10%.

INVESTMENT OBJECTIVE

The objective of this fund is to maintain capital and to provide a return in line with money market rates, before charges. The fund will generally invest in short term deposits, certificates of deposit, government bonds (predominantly UK) issued in pounds sterling (a type of loan which pays interest) and Repos. Repos are an agreement between two parties to sell or buy an asset and later reverse the trade at an agreed date and price. In stressed market conditions, the fund may be invested up to 100% in government and public securities issued by a single issuer. The maximum maturity of the instruments the fund invests in is 397 days but the fund must maintain a weighted average maturity of less than 60 days. The bonds that the fund invests in must be investment grade (rated as lower risk). Investment grade bonds are bonds that have achieved a higher credit rating from a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time. The fund may use derivatives (contracts which have a value linked to the price of...

INVESTMENT OBJECTIVE

The objective of this fund is to provide a mixture of income and growth (if the income is reinvested) by tracking the performance of the Barclays World Government Ex UK Inflation Linked Bonds TR Hedged GBP Index. The fund will invest between 80% and 100% in bonds (a type of loan which pays interest) included in the Index. These bonds will have a pre-set rate of income (either set at a fixed level or varying in a predetermined way). The fund's investments will closely match those that make up the Index and this will be achieved through investing in a sample selection of the bonds in the Index. The bonds are issued in the relevant national currency by governments around the world (excluding the UK). The interest and capital returns on these bonds will be linked to local inflation rates. The bonds that the fund invests in will be a mixture of investment grade bonds (rated as lower risk) and sub-investment grade bonds (rated as higher risk). The mix will closely match that of the Index. Investment and sub-investment grade bonds are bonds that have been given a credit rating by a rating...

INVESTMENT OBJECTIVE

The Fund's investment objective is to deliver over the long term (at least 7 years), the capital growth and income of the FTSE® 350 Total Return GBP Index (the "Index"). This is carried out principally by matching the performance of the Index, which is made up of the largest 350 companies by market capitalisation listed on the London Stock Exchange.
