Class I accumulation shares, GBP [ISIN: GB00BMMV5G59]

A sub-fund of Artemis Investment Funds ICVC.

The fund is managed by Artemis Fund Managers Limited.

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and risks of investing in the fund. You are advised to read it so you can make an informed decision about whether to invest.

OBJECTIVES AND INVESTMENT POLICY

Objective	To grow capital over a five year period. There is no guarantee that the fund will achieve a positive return over a five-year period or any other time period and your capital is at risk.	
Investment policy	What the fund invests in	<ul style="list-style-type: none"> At least 80% in shares of US companies, either directly or indirectly through derivatives. Up to 20% in shares, or derivatives of shares, of companies in other countries, bonds, cash, near cash, other transferable securities, other funds (up to 10%) managed by Artemis and third party funds, and money market instruments.
	Use of derivatives	<p>The fund may use derivatives:</p> <ul style="list-style-type: none"> for investment purposes to achieve the fund objective, including taking long and short positions to produce additional income or growth for efficient portfolio management purposes to reduce risk and manage the fund efficiently to create leverage.
	Industries the fund invests in	<ul style="list-style-type: none"> Any
	Other limitations specific to this fund	<ul style="list-style-type: none"> Total derivatives (longs plus shorts) are likely to represent a significant proportion of the fund's gross exposure to companies, which will typically lie in a range of +100% to +200% of net asset value. Net exposure (longs minus shorts) to companies will typically lie in the range of +85% to +110% depending on market conditions. A significant proportion of the fund will be held in cash due to the level of derivative use. To allow the fund to manage counterparty risk, it may also invest its cash in government bonds, generally of less than one year maturity.
Investment strategy	<ul style="list-style-type: none"> The fund is actively managed. The manager uses multiple sources of information, both to generate ideas and to assist in validating and testing candidate companies for investment. This is complemented by techniques such as data mining (examining large databases of information) and financial analysis. External research is also used in order to tap into knowledge already available and to look for different views. The manager carries out a significant amount of analysis of wider economic trends is carried out in order to understand cyclical and long-term trends and the outlook. The manager derives alpha by seeking to exploit market inefficiencies by buying shares in companies believed to be undervalued and by shorting shares believed to be overvalued. 	
Benchmarks	<ul style="list-style-type: none"> S&P 500 TR A widely-used indicator of the performance of 500 large publicly-traded US companies, some of which the fund invests in. It acts as a 'comparator benchmark' against which the fund's performance can be compared. Management of the fund is not restricted by this benchmark. IA North America NR A group of other asset managers' funds that invest in similar asset types as this fund, collated by the Investment Association. It acts as a 'comparator benchmark' against which the fund's performance can be compared. Management of the fund is not restricted by this benchmark. 	
Other information	<ul style="list-style-type: none"> Dealing frequency: Open Monday to Friday except on UK public holidays. Instructions received before 12 noon UK time will be processed at 12 noon on the same day. Distribution policy: This is an accumulation class. Income received is reinvested in the value of the fund. 	

RISK AND REWARD PROFILE

- The fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the fund.
- The risk category has been calculated using historic data and may not be a reliable indicator of the fund's future risk profile.
- A risk indicator of “1” does not mean that the investment is “risk free”.

The risk indicator may not fully take into account the following risks and the following may affect fund performance:

- Market volatility risk:** The value of the fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- Currency risk:** The fund's assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the fund's value.
- Derivatives risk:** The fund may invest in derivatives with the aim of profiting from falling ('shorting') as well as rising prices. Should the asset's value vary in an unexpected way, the fund value will reduce.
- Cash risk:** The fund may hold a large amount of cash. If it does so when markets are rising, the fund's returns could be less than if the cash was fully invested in other types of assets.

Please refer to the fund's prospectus for full details of these and other risks which are applicable to this fund.

CHARGES FOR THE FUND

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	0.890%
Charges taken from the fund under certain specific conditions	
Performance fee	20.00% of the share class outperformance against the S&P 500 TR GBP. See the prospectus for more details. In the fund's last financial year the actual performance fee was 0.00% of the fund.

- The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. The charges reduce the potential growth of your investment.
- The ongoing charges figure is an estimate rather than a historic figure because this better reflects the expected future charges. The charges may vary from year to year. The exact charges made for each financial year are contained in the fund's annual report.
- The benchmark used to calculate the performance fee is provided by an administrator on the ESMA register of benchmarks which includes details of all authorised, registered, recognised and endorsed EU and third country benchmark administrators together with their regulator.
- The annual management charge is taken from income.

For more information about charges, please see the fund's prospectus, which is available at www.artemisfunds.com or www.fundinfo.com.

PAST PERFORMANCE

- Past performance is net of all charges except any costs incurred when investors buy or sell the fund.
- This class may have charges or a hedging approach different from those in the IA sector benchmark.
- How the fund has performed in the past is not a guide to how it will perform in the future.
- Performance is calculated in sterling.
- Fund launch date: 19 September 2014.
- Class launch date: 19 September 2014.

ASI Global Smaller Companies Fund, a Sterling denominated sub fund of the Aberdeen Standard OEIC II, Platform 1 Accumulation Shares (ISIN: GB00B7KVX245). This fund is managed by Aberdeen Standard Fund Managers Limited.

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

To generate growth over the long term (5 years or more) by investing in Global small-capitalisation equities (company shares).

Performance Target: To achieve the return of the MSCI AC Country World Small Cap Index, plus 3% per annum (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

Performance Comparator: Investment Association Global Equity Sector Average.

The ACD believes this is an appropriate target/comparator for the fund based on the investment policy of the fund and the constituents of the index/sector.

Investment Policy

Portfolio Securities

- The fund will invest at least 70% in small-capitalisation equities and equity related securities of companies listed on global stock exchanges.
- Small capitalisation companies are defined as any stock included in the MSCI AC Country World Small Cap Index or, if not included within the index, any stock having a market capitalisation smaller than that of the stock with the largest market capitalisation in such index.
- The fund may also invest in mid and larger capitalisation companies listed on global stock exchanges.
- The fund may also invest in other funds (including those managed by Aberdeen Standard Investments) and money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix at country, sector and stock level.
- Their primary focus is on stock selection using the management team's quality, growth and momentum approach. It aims to identify companies that exhibit a range of high quality characteristics, operate in growing markets and display positive business

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 5 because of the extent to which the following risk factors apply:

- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.
- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- The shares of small and mid-cap companies may be less liquid and more volatile than those of larger companies.

All investment involves risk. This fund offers no guarantee against

momentum.

- In seeking to achieve the Performance Target, the MSCI AC Country World Small Cap Index is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ('tracking error') between the returns of the fund and the index is not ordinarily expected to exceed 10%. Due to the active nature of the management process, the fund's performance profile may deviate significantly from that of the MSCI AC Country World Small Cap Index.

- Please note: The fund's ability to buy and sell small and mid-capitalisation shares and the associated costs can be affected during periods of market stress. In certain circumstances investors in the fund may not be able to sell their investment when they want to.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares.

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The Ongoing Charges figure reflects the amount based on the expenses within the annual report for each financial year. This figure may vary from year to year. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.

Where the Fund invests in an open-ended collective investment scheme which is operated or managed by the ACD/the Manager or an associate of the ACD/the Manager, no additional annual management charge will be incurred by the Fund on such an investment.

The annual report for each financial year will include detail on the exact charges made.

The Ongoing Charge figure is as at 28/02/2019.

A switching charge may be applied in accordance with the Prospectus. For more information about charges please see Prospectus.

Further information on the charges can be found in the Prospectus.

Baillie Gifford Japanese Fund - Class B Shares

Accumulation Shares - ISIN GB0006011133 (also representative of Income Shares ISIN GB0006010945)

This Fund is a sub-fund of Baillie Gifford Overseas Growth Funds ICVC which is an Investment Company with Variable Capital. Baillie Gifford & Co Limited is the Authorised Corporate Director of the Fund and is wholly owned by Baillie Gifford & Co.

Objectives and investment policy

Objective

- The Fund aims to outperform (after deduction of costs) the TOPIX, as stated in Sterling, by at least 1.5% per annum over rolling five-year periods.

Policy

- The Fund will invest at least 90% in shares of Japanese companies of any size and in any sector.
- Japanese companies are companies which are listed, incorporated, domiciled or conduct a significant portion of their business in Japan.
- The Fund will be actively managed.

Other Information

- You can sell some or all of your shares on any business day in the United Kingdom by contacting our Dealing Department by phone or post. Where properly completed documentation is received by post, shares will be sold at the next valuation point following receipt of the instruction.
- For Accumulation shares income will be re-invested. No further shares will be purchased but the reinvestment will be reflected in the price of your existing accumulation shares. You are, however, deemed to have received the income for tax purposes.
- For Income shares any income due to you will be paid into your bank or building society account, paid on the dates specified in the Prospectus.
- For further explanation and information see the investment objective and policy section of the Prospectus, which is available by contacting us.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

- Please note that even the lowest risk class can lose you money and that extreme adverse market circumstances can mean you suffer severe losses in all cases.
- The Fund is classified in the category above because it invests in company shares which generally provide higher rewards and higher risks than other investments such as bonds or cash.
- The indicator does not take into account the following relevant material risks:
 - Investment markets can go down as well as up and market conditions can change rapidly. The value of an investment in the Fund, and any income from it, can fall as well as rise and you may not get back the amount invested.
 - The Fund has exposure to foreign currencies and changes in the rates of exchange will cause the value of any investment, and income from it, to fall as well as rise and you may not get back the amount invested.
 - Custody of assets involves a risk of loss if the custodian becomes insolvent or breaches duties of care.
 - The Fund's exposure to a single market and currency may increase share price movements.
 - Where possible, charges are taken from the Fund's revenue. Where there is insufficient revenue, the remainder will be taken from capital. This will reduce the capital value of the Fund.
 - The process for the UK to exit the European Union introduces elements of political uncertainty and may have practical consequences for the Fund. Developments will be closely monitored.
 - Infectious viruses may pose significant threats to human health and may be highly disruptive to global economies and markets. The economic and market disruptions caused by infectious viruses could impact the value of the investments of a Sub-fund.

BlackRock Emerging Markets Fund

Class D Accumulating GBP

ISIN: GB00B4R9F681

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) over the long term (5 or more consecutive years beginning at the point of investment).
- ▶ The Fund invests at least 70% of its total assets in the equity securities (e.g. shares) of companies incorporated or listed on a stock exchange in emerging market countries.
- ▶ The Fund may indirectly invest in emerging markets by investing in American Depository Receipts (ADRs) and Global Depository Receipts (GDRs), which are listed or traded on stock exchanges and regulated markets outside emerging markets. ADRs and GDRs are investments issued by financial institutions which give exposure to underlying equity securities.
- ▶ The Fund has the flexibility to invest outside of the asset class and sector set out above.
- ▶ The Fund is actively managed and the IA has discretion to select the Fund's investments. In doing so, the IA will refer to the MSCI Emerging Markets Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The IA is not bound by the components or weighting of the Index when selecting investments. The IA may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by unitholders to compare the performance of the Fund.
- ▶ The investment adviser (IA) may use derivatives (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective.
- ▶ The Fund may, via derivatives, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
 - ▶ The risk category shown is not guaranteed and may change over time.
 - ▶ The lowest category does not mean risk free.
 - ▶ The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
- Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments to the Fund.
 - Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 27 December 2019. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 1993. The unit class was launched in 2011.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

† MSCI Emerging Markets Index (GBP)

Emerging Markets Fund

a sub-fund of Fidelity Institutional Funds

W Accumulation Shares (ISIN: GB00B9SMK778)

This fund is managed by FIL Investment Services (UK) Limited

Objectives and Investment Policy

- The fund aims to increase the value of your investment over a period of 5 years or more.
- The fund will invest at least 70% in companies in countries experiencing higher levels of economic growth within Africa, the Indian sub-continent, Latin America, East and South East Asia, Central and Eastern Europe (including Russia) and the Middle East. This includes countries considered to be emerging markets as determined by the investment manager at its sole discretion.
- Emerging markets are countries progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body.
- The companies will be either listed, incorporated, domiciled, or have significant business activities in the region.
- The remainder will be invested in companies outside of the region detailed above and in other investment types such as cash and derivatives.
- Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment.
- The fund is actively managed. The Investment Manager identifies suitable opportunities for the fund utilising in-house research and investment capabilities.
- The Investment Manager will, when selecting investments for the fund and for the purposes of monitoring risk, consider the MSCI Emerging Markets (Net Total Return) Index.
- The Investment Manager has a wide degree of freedom relative to the index and may take larger, or smaller, positions in companies, and/or may invest outside the index, to take advantage of investment opportunities. This means the fund's investments and therefore performance may vary significantly from the index.
- Income earned by the fund is paid into the fund and reflected by an increase in the value of each share.
- Shares can usually be bought and sold each business day of the fund.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
- Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.
- Liquidity is a measure of how easily an investment can be converted into cash. Under certain market conditions assets may be more difficult to sell.
- Emerging markets may be more volatile and it could be harder to sell or trade securities. There may be less supervision, regulation and less well-defined procedures than in more developed countries. Emerging markets can be sensitive to political instability, which can result in greater volatility and uncertainty, subjecting the fund to the risk of losses.
- In some emerging markets, such as Russia, the safekeeping provisions for securities benefit from less governed standards.

Charges for this fund (ISIN: GB00B9SMK778)

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge N/A

Exit charge N/A

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges 0.96%

Charges taken from the fund under certain specific conditions

Performance fee N/A

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor. The ongoing charges figure is based on expenses for the year ending 30/06/2019. This figure may vary from year to year. It excludes:

- performance fees (where applicable);
- portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on 28/07/1997. This class was launched on 13/05/2013. Past performance has been calculated in GBP.

The performance of the Benchmark is also included in the graph for comparative purposes.

If applicable, events in the fund's life which may have affected the performance history are highlighted as an '*' in the chart, which may include changes to the fund's objective and details of such events can be found on our website or by requesting it from your appointed representative or your usual Fidelity contact. If applicable, the Investment Objective section shall refer to a benchmark and information on previous benchmarks may be found in the Annual Report and Accounts.

Practical Information

First State Asia Focus Fund (Fund)
Class B (Accumulation) GBP (Share Class)

ISIN GB00BWNGXJ86

a sub-fund of First State Investments ICVC (the Company)

First State investments (UK) Limited, the authorised corporate director of the Company

Objectives and investment policy

Objective: The Fund aims to grow your investment.

Policy: The Fund invests at least 80% in shares of companies based in, operating in, or have their economic activity mainly in the Asia Pacific region including Australia and New Zealand (excluding Japan). The Fund may also invest up to 20% in shares of companies around the world.

The Fund invests in shares of large and mid-sized companies in the region. These companies generally have a total stock market value of at least US\$1 billion.

The Fund may invest up to 10% in other funds.

The Fund may use derivatives to reduce risk or to manage the Fund more efficiently.

The Fund is managed with a view to remaining within the Asia Pacific Ex Japan Investment Association Sector.

The Fund is actively managed meaning that the manager uses expertise to pick investments rather than tracking a benchmark.

The Fund's performance is compared against the value of the MSCI AC Asia Pacific ex Japan Index.

Investment of the Fund's assets is not constrained by the benchmark composition and the manager has complete discretion within the Fund's investment policy to invest in assets without regard to the benchmark.

You can buy and sell shares in the Fund on any business day. As long as we receive your instruction before 12 noon (UK time), shares will be bought at that day's price.

The Fund's manager may use its discretion when deciding which investments should be held by the Fund.

You will not receive any income from your investment. Any income will be rolled up into the value of shares in the Fund.

In addition to the charges set out in the charges section, the Fund will incur portfolio transaction costs which are paid from the assets of the Fund.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment but describes how much the value of the Share Class has gone up and down in the past. Where a Share Class has not yet launched, the SRRI is calculated using representative data.
- The SRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the Share Class.
- We cannot guarantee that the rating of the Share Class will remain the same; it may change over time.
- Even the lowest rating 1 does not mean a risk free investment.
- On a scale of 1 (less risky) to 7 (more risky), this Share Class has a rating of 5 due to its past performance (or representative data) and the nature of its investments. Shares with a rating of 5 might have higher risks, but also higher returns.
- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss.
- The value of the Fund and its return is not guaranteed and may fall as well as

rise. You may get back significantly less than you originally invested.

Material risks not adequately captured by the SRRI:

- **Emerging market risk:** emerging markets may not provide the same level of investor protection as a developed market; they may involve a higher risk than investing in developed markets.
- **Currency risk:** the Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund.

For further information on risks, please refer to the Risk Factors section in the Company's prospectus.

Franklin UK Equity Income Fund

Class W (acc) • ISIN GB00B7DRD638 • A sub-fund of Franklin Templeton Funds
The management company is Franklin Templeton Fund Management Limited

Objectives and Investment Policy

Franklin UK Equity Income Fund's (the "Fund") primary aim is to generate an income that is higher than that of the FTSE All-Share Index, together with investment growth over a three to five-year period after all fees and costs are deducted.

The Fund invests at least two thirds (but typically significantly more) in the shares of companies listed on the London Stock Exchange. These companies are incorporated/domiciled in the UK or which have significant business operations in the UK.

The Fund can invest to a lesser extent in:

- equity securities of companies that are not included in the FTSE 100 Index
- other asset classes.

Typically, the number of holdings in the Fund will vary between 40 to 60 company shares and most of these will be the shares of large (such as those making up the FTSE 100 Index) companies

The Fund's managers try to help manage risk by making sure no single company share dominates the Fund's investments. Normally they try to keep shareholdings in any individual large company to no more than 5% of the Fund's total value, while a shareholding in any individual medium- and small-sized company would typically be no more than 2%.

The Fund can use derivatives for efficient portfolio management (managing the fund in a way that is designed to reduce risk or cost and/or generate extra income or growth).

You may request the sale of your shares on any UK business day.

The income received from the Fund's investments is accumulated and included in the value of the shares.

For further information on the Objectives and Investment Policy of the Fund, please refer to the "Investment Objectives and Policies of the Funds" section of the current prospectus of Franklin Templeton Funds.

Terms to Understand

Equity securities: Securities that represent an ownership stake in a company.

FTSE 100 Index: This index comprises the 100 largest companies listed on the London Stock Exchange. The Index is used to assess the change in value of the securities which comprise it.

FTSE All Share Index: This index comprises almost every company listed on the London Stock Exchange and is generally considered to be the best performance measure of the overall London equity market.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

As the share class has no sufficient historical data available, simulated data

based on a representative portfolio model or benchmark have been used instead.

Why is the Fund in this specific category?

The Fund invests mainly in equity securities listed on the London Stock Exchange, but may to a lesser extent also invest in debt securities or convertible securities of UK issuers. Such securities have historically been subject to price movements due to company-specific factors and movements in the equity and fixed income markets of the UK generally. As a result, the performance of the Fund can fluctuate considerably over time.

Risks materially relevant not adequately captured by the indicator:

Equity risk: prices of equities may be affected by factors such as economic, political, market, and issuer-specific changes. Such changes may adversely affect the value of the equities regardless of company-specific performance.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Factors" section of the current prospectus of Franklin Templeton Funds.

*This share class is only available through certain financial advisers which may apply their own charges. You may find more information about charges from your financial adviser.

The ongoing charges are based on the expenses for the year ending 31 December 2019. This figure may vary from year to year.

For detailed information about charges, please refer to the "Fees and Charges" section of the current prospectus of Franklin Templeton Funds.

Past Performance

- Past performance is not a guide to future performance.
- The past performance shown here includes all the ongoing charges.
- Past performance is calculated in GBP
- The Fund was launched in 2011 and the present share class on 31/05/2012.
- We measure performance against the Fund's performance target the FTSE All-Share Index, as it is widely available and reflects investments in the UK stock market.

The Franklin UK Equity Income Fund was launched on 17/10/11 to receive the assets of Rensburg UK Equity Income Trust. Past performance from the start of the performance chart has been simulated and is based on mid-price of the Trust and from 17/10/11 up to the launch date of the share class has been simulated by taking the performance of another existing share class of the Fund, which does not differ materially in the extent of its participation in the assets of the Fund.

I Class Shares in Fundsmith Equity Fund

Accumulation Shares (ISIN: GB00B41YBW71)

Income Shares (ISIN: GB00B4MR8G82)

The fund is managed by Fundsmith LLP

Objectives and investment policy

The fund's objective is to achieve long-term growth in value, investing in shares of companies on a global basis. The fund's approach is to be a long-term investor in its chosen stocks and it will not adopt short-term trading strategies. The fund aims to invest in businesses:

- that can sustain a high return on operating capital employed;
- whose advantages are difficult to replicate;
- which do not require significant borrowing to generate returns;
- with a high degree of certainty of growth from reinvestment of their cash flows at high rates of return;
- that are resilient to change, particularly technological innovation;
- whose valuation is considered to be attractive;

The fund will not invest in derivatives nor hedge any currency exposure. The fund will not borrow money, except in unusual circumstances. The fund does not track a particular benchmark.

An investor, or prospective investor, may buy or sell their shares on demand each business day in the UK. Instructions to buy or sell received before noon will be implemented that day; instructions received after noon or on a non-business day will be implemented at noon on the next business day.

For the Accumulation Shares, the dividends are reinvested in the fund. For the Income Shares, the dividends are paid out to you from the fund.

Recommendation: This fund invests for the long-term and may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

The risk category reflects the significance of the fund's share price fluctuations based on historical data. Historical data may not be a reliable indication of the future risk profile of the fund. The risk category of the fund is not guaranteed and may change over time. Further, the lowest category of risk does not mean risk free.

Generally, the higher the risk category, the greater the potential for higher returns but also the higher the risk of losing money. The fund is in Category 5 reflecting the risks inherent in the fund's investment portfolio, including that of capital losses. The underlying investments are, however, in large companies with shares that are, in most cases, highly liquid.

There are a number of other risks that are not covered by the indicator above. A full description is contained in the prospectus under the heading "Risk Factors". The most material are:

Currency risk: The fund's portfolio is a global share portfolio and many of the investments are not denominated in Sterling. There is no currency hedging in place and the price of shares in the fund may therefore rise or fall purely on account of exchange rate movements.

Concentration risk: The investment criteria adopted by the fund significantly limits the number of potential investments. The fund generally holds 20 to 30 stocks and so it is more concentrated than many other funds. This means that the performance of a single stock within the portfolio has a greater effect on the price of the shares of the fund.

Operational risk: Failures or delays in operational processes may negatively affect the fund. There is a risk that any company responsible for the safekeeping of the assets of the fund may fail to do so properly or may become insolvent, which could cause loss to the fund.

Charges

The charges for the fund are shown below. The ongoing charges figure is based on the fund's expenses for the year ended 31 December 2018. This includes all costs borne by the fund except for portfolio transaction costs but, because the portfolio turnover is relatively low, these charges should equally be low.

The ongoing charges are used to pay the costs of running the fund, including the fee payable to Fundsmith LLP, which is 0.90% per annum, and certain other costs including marketing and distributing the fund. These ongoing charges reduce the potential growth of the investment. The overall ongoing charges may vary from year to year.

Past performance

This performance is calculated based on the net asset value per class (which includes all charges) and assuming the income has been re-invested in the fund.

Past performance is not necessarily a guide to future performance. The performance is shown in Pounds Sterling.

The fund was established in November 2010.

JPM Global Macro Opportunities Fund C - Net Accumulation a Share Class of JPM Global Macro Opportunities Fund a Fund of JPMorgan Fund ICVC

ISIN GB00B4WKYF80

The Authorised Corporate Director ("ACD") is JPMorgan Funds Limited

Objective and Investment Policy

Investment Objective: To provide positive investment returns over a rolling 3 year period in all market conditions by investing in securities globally, using financial derivative instruments where appropriate. A positive return is not guaranteed over this or any time period and a capital loss may occur.

Investment Approach:

- ▶ Investment process based on macroeconomic research to identify global investment themes and opportunities.
- ▶ Flexible and focused approach to take advantage of global trends and changes through traditional and non-traditional assets.
- ▶ Fully integrated, risk management framework provides detailed portfolio analysis.

Investment Policy: The Investment Adviser uses an investment process based on macroeconomic research to identify global investment themes and opportunities. The Investment Adviser uses a flexible asset allocation approach, using a broad range of asset classes, instruments and techniques. Allocations may vary significantly and exposure to certain asset classes, markets, sectors or currencies may be concentrated from time to time, in response to market conditions and opportunities.

The Investment Adviser will invest, directly or through the use of Financial Derivative Instruments (derivatives), in global Equity securities (including smaller capitalisation companies), Bonds, (including up to 100% in government and public securities, below investment grade and unrated debt securities), Commodity Index Instruments, currencies, Convertible Securities, collective investment schemes and cash and cash equivalents. Issuers of securities may be located in any country, including Emerging Markets.

The Investment Adviser may have net Long or net Short Position exposure to asset classes, industry sectors, markets and /or currencies depending upon market conditions and opportunities. This may result in

a net short position at the overall Fund level. Long Positions will be achieved directly or through the use of Financial Derivative Instruments, and Short Positions will be achieved via the use of Financial Derivative Instruments only.

The Fund may use Financial Derivative Instruments (derivatives) for investment purposes or Efficient Portfolio Management including hedging, where appropriate.

Although most of the non-Sterling securities will be hedged back into Sterling, the Investment Adviser will also use opportunities in the foreign exchange market to maximise returns.

The Fund may invest in China A-Shares via the China-Hong Kong Stock Connect Programmes.

Portfolio Transaction Costs: A consequence of this investment strategy is that the volume of transactions and, therefore, transaction costs, are material. Portfolio transaction costs are paid from the assets of the fund. They are additional to the charges set out in the Charges section. The chart in the Past Performance section shows the Fund's performance including portfolio transaction costs.

Redemption and Dealing: Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

Benchmark: The benchmark of the Fund is ICE 1 Month GBP LIBOR.

The Fund is actively managed. The Benchmark is a performance comparator however the Fund will be managed without reference to its Benchmark. The Benchmark has been chosen as it reflects the investment strategy for the Fund.

Distribution Policy: This Share Class will reinvest income.

Risk and Reward Profile

Lower risk

Higher risk

Potentially lower reward

Potentially higher reward

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and the volatility which is consistent with the risk limit of the Sub-Fund.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 5 because its Net Asset Value has shown medium to high fluctuations historically and this category is consistent with the risk limit of the Sub-Fund.

Other material risks:

- ▶ The value of your investment may fall as well as rise and you may get back less than you originally invested.
- ▶ The Fund aims to provide a positive return in any market conditions over a rolling 3 year period, although this is not guaranteed.
- ▶ The Fund can use sophisticated investment techniques that differ from those used in traditional equity funds.
- ▶ The Fund should not be used as a substitute for liquidity funds or cash accounts.
- ▶ The Sub-Fund uses financial derivative instruments for investment purposes. The value of financial derivative instruments can be volatile and may result in gains or losses in excess of the amount required initially to establish a position in the derivative. The ACD is required to disclose in Appendix A of the Prospectus the sum of the gross notional exposure of the financial derivative instruments used (including those used for hedging or efficient portfolio management) as the expected level of leverage. However, this figure does not take

into account whether the instrument increases or decreases investment risk and so may not be representative of the overall level of investment risk in the Sub-Fund.

- ▶ Some financial derivative instruments (derivatives) traded on an exchange may be illiquid, and as a result, may need to be held until the derivative contract position expires. This may have an adverse impact on the return of the Fund.
- ▶ The value of equity and equity-linked securities may fluctuate in response to the performance of individual companies and general market conditions.
- ▶ The value of bonds and other debt securities may change significantly depending on market, economic and interest rate conditions as well as the creditworthiness of the issuer. Issuers of bonds and other debt securities may fail to meet payment obligations (default) or the credit rating of bonds and other debt securities may be downgraded. These risks are typically increased for below investment grade and certain unrated securities, which may also be subject to higher volatility and be more difficult to sell than investment grade securities.
- ▶ The Fund invests opportunistically and exposure to the markets may vary substantially over a short period of time depending on market conditions. Therefore the Fund may not be fully invested in rising markets; conversely the Fund could be more than fully invested in a falling market. In both circumstances the performance of the Fund would suffer.
- ▶ To the extent that any underlying assets of the Fund are denominated in a currency other than Sterling and are not hedged back to Sterling, movements in currency exchange rates can adversely affect the return of your investment. The currency hedging that may be used to minimise the effect of currency fluctuations may not always be successful.

- ▶ The value of securities in which the Fund invests may be influenced by movements in commodity prices which can be very volatile.
- ▶ Emerging markets may be subject to increased political, regulatory and economic instability, less developed custody and settlement practices, poor transparency and greater financial risks. Emerging market currencies may be subject to volatile price movements. Emerging market securities may also be subject to higher volatility and be more difficult to sell than non-emerging market securities.
- ▶ The Fund may invest in China A-Shares through the China-Hong Kong Stock Connect Programmes which are subject to regulatory change, quota limitations and also operational constraints which may result in increased counterparty risk.

- ▶ The Fund invests in securities of smaller companies which may be more difficult to sell, more volatile and tend to carry greater financial risk than securities of larger companies.
- ▶ The possible loss from taking a short position on a security (using financial derivative instruments) may be unlimited as there is no restriction on the price to which a security may rise. The short selling of investments may be subject to changes in regulations, which could adversely impact returns to investors.
- ▶ The Fund may be concentrated in a limited number of securities, industry sectors or countries and as a result, may be more volatile than more broadly diversified funds.
- ▶ Further information about risks can be found in "Part 11: Risk Warnings" of the Prospectus.

Legg Mason IF RARE Global Infrastructure Income Fund

Class X Accumulation (Hedged)

ISIN: GB00BD3FVT86

A sub-fund of: Legg Mason Funds ICVC (the "Company")

Managed by: Legg Mason Investment Funds Limited, part of the Legg Mason group of companies.

Objectives and Investment Policy

Objective

The fund's goal is to provide income. Growth of the fund's value in the long term is a secondary goal. The fund seeks to outperform, on an average annualised basis, the OECD G7 Inflation Index by 5.5% over an investment time frame of 5 years (gross of fees).

Investment Policy

- The fund invests at least 80% of its assets in shares of global listed infrastructure companies. However the fund may hold more or less of other permitted assets in extreme market conditions.
- The fund invests in a number of infrastructure sectors such as gas, electricity and water utilities, toll roads, airports, rail and communications.
- The fund invests in shares of infrastructure companies from around the world, including up to 20% from emerging market countries.
- The fund will usually invest in a concentrated portfolio, typically 30 to 60 companies.
- The fund may also invest up to 10% in global infrastructure companies that are not presently listed on an exchange, but are expected to be listed within 12 months of purchase, and in derivatives (financial instruments whose value is derived from the value of other assets).
- The fund may invest in derivatives to help try to achieve the fund's objective as well as to reduce risk or cost or to generate additional growth or income for the fund.

Share Class Policy

- For this share class, the fund will use derivatives to help to reduce the risk of movements in exchange rates between the currencies that are significant to the fund's investment strategy and the currency of the share class (hedging). Hedging transactions can expose the share class to additional risks which may result in loss to your investment.

Benchmark: The performance target to outperform the OECD G7 Inflation Index by 5.5%, on an average annualised basis over an investment time frame of 5 years, was chosen as it sets a reasonable performance target benchmark for the fund to achieve, taking into account a number of factors such as the measure of inflation across the G7 countries. Please refer to the prospectus for further information.

Manager's Discretion: The fund is actively managed. The investment manager has discretion in selecting investments within the fund's objective and investment policies. The benchmark does not constrain the investment manager's management of the fund.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Dealing Frequency: You can buy, sell and switch your shares on each day that the London Stock Exchange is open for business.

Minimum Initial Investment: For this share class the minimum initial investment is GBP 100,000.

Treatment of Income: Income and gains from the fund's investments are not paid but instead are reflected in the fund's share price.

Risk and Reward Profile

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is in its risk/reward category because a concentrated investment (the fund holds fewer investments than many other funds) in shares of infrastructure companies from various countries and sectors have historically been subject to relatively large fluctuations in value.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Investment in company shares: The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

Investment in infrastructure: The fund invests in shares of infrastructure companies, and the value of these shares can be negatively affected by economic or regulatory occurrences affecting their industries. Investments

in new infrastructure projects carry risks where they may not be completed within the budget, agreed timeframe or specifications. Operational and supply disruptions can also have a negative effect on the value of the company's shares.

Emerging markets investment: The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries.

Concentrated fund: The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses.

Hedged class currency: The value of your investment may fall due to changes in the exchange rates between the currencies that are significant to the fund's investment strategy and the currency of your share class, pound sterling. The investment manager will try to protect the value of your investment against such changes, but it may not succeed.

Derivatives: The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

Charges from capital: The fund's fees and expenses may be taken from its capital (rather than income). This will result in an increase in income available for distribution to investors. However, this will forego some of the capital that the share class has available for future investment and potential growth.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the prospectus.

Charges

One-off charges taken before or after you invest	
Entry charge	none
Exit charge	none
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charge	1.04%
Charges taken from the fund under certain specific conditions	
Performance fee	none

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

Entry and exit charges shown are the maximum that might be taken out of your money. In some cases, you might pay less and you should speak to your financial adviser about this.

The ongoing charge is based on expenses for the 12 month period ending December 2019. This figure may vary over time.

For more information about charges, please see the 'Fees and Expenses' section in the fund's prospectus and relevant appendix.

Past Performance

The fund was launched on 1 July 2016 and the share class began issuing shares on 7 September 2016.

Past performance has been calculated in GBP.

The performance reflects all fees and charges payable by the fund but does not reflect any entry or exit charge that might be payable.

Past performance is no guide to future returns and may not be repeated.

LF Miton European Opportunities Fund, Class B Accumulation, a fund within LF Miton Investment Funds 3 (ISIN: GB00BZ2K2M84)

The fund is managed by Link Fund Solutions Limited, part of the Asset Services Division of Link Administration Holdings Limited.

Objective and investment policy

Objective

To achieve a combination of income and growth.

Investment Policy

To invest at least 80% in the shares of European companies with a bias toward medium sized companies with a market capitalisation of between £2 billion and £15 billion. The fund may also invest in large and small sized companies, other funds and cash.

Essential features of the fund:

- The fund has the discretion to invest without the need to adhere to a particular benchmark.
- You can buy and sell shares in the fund on each business day.
- Income from the fund will be added to the value of your investment.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- Derivatives may be used to manage the risk profile of the fund, reduce costs or generate additional income.

Risk and reward profile

- This indicator shows how much a fund may have risen and fallen in the past, and therefore how much a fund's returns may have varied. It is a measure of a fund's volatility. As the fund has less than 5 years price history, this calculation incorporates the volatility of an appropriate benchmark index. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 5 because its volatility has been measured as above average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time.

- Currency Risk: As the fund invests in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Liquidity Risk: Smaller companies' securities are often traded less frequently than those of larger companies which means they may be more difficult to buy and sell. Their prices may also be subject to significant short term swings (both up and down).
- Counterparty Risk: As the fund may enter into currency hedging arrangements there is a risk that other parties may fail to meet their obligations. This may lead to delays in receiving amounts due to the fund receiving less than is due or receiving nothing.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

LIONTRUST

SPECIAL SITUATIONS FUND

KEY INVESTOR
INFORMATION
DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Special Situations Fund is an Authorised Unit Trust and categorised as a UCITS scheme. This document is based upon Institutional class units (I Inc Class) (ISIN: GB00B57H4F11). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- The Fund aims to deliver capital growth over the long term (5 years or more).

Policy

- The Fund will invest at least 90% of its assets in companies which are incorporated, domiciled or conduct significant business in the United Kingdom (UK).
- The Fund will typically invest 90% (minimum 80%) of its assets in equities or equity related derivatives but may also invest in collective investment schemes (up to 10% of Fund assets), corporate debt securities, other transferable securities, money market instruments, warrants, cash and deposits.
- The Fund is permitted to use derivatives for the purposes of efficient portfolio management and for investment purposes. Please refer to the Derivatives sections in the prospectus for further details.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell units on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk.

Investment process

- A fundamental principle of competitive markets is that profits regress to the mean. The fund managers believe the secret to successful investing is to identify those few companies that have a durable Economic Advantage which allows them to defy this principle and sustain a higher than average level of profitability for longer than expected.
- Economic Advantage is the collection of distinctive characteristics of a company that competitors struggle to reproduce even if those competitors have understood the benefits arising from those characteristics. In the fund managers' experience, the hardest to replicate characteristics fall into the following three categories of intangible assets:
 - Intellectual property
 - Strong distribution channels
 - Significant recurring business
- Other less powerful but nonetheless important intangible strengths include: franchises and licenses; good customer databases and relationships; effective procedures and formats; strong brands and company culture. These intangible assets produce barriers to competition, protect margins and are capable, in the opinion of the fund managers, of reaping a financial advantage in the form of cash flow returns in excess of the cost of capital. The market rewards excess profitability, particularly when it is higher than consensus expectations.
- To be included in portfolios, companies must possess at least one of the main advantages: intellectual property, strong distribution or recurring business (at least 70% of annual turnover).
- Every smaller company held in the Economic Advantage funds has at least 3% of its equity held by senior management. Companies are also assessed for employee ownership below the board and changes in equity ownership are monitored.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 5 for its exposure to UK companies.
- The SRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - any company which has high overseas earnings may carry a higher currency risk;
- The Fund may encounter liquidity constraints from time to time. In addition the spread between the price you buy and sell units will reflect the less liquid nature of the underlying holdings.
- The Fund may invest in companies listed on the Alternative Investment Market (AIM) which is primarily for emerging or smaller companies. The rules are less demanding than those of the official List of the London Stock Exchange and therefore companies listed on AIM may carry a greater risk than a company with a full listing.
- The Fund may, under certain circumstances, make use of derivative instruments but it is not intended that their use will materially affect volatility.
- Counterparty risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

- The entry and exit charges** shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser or fund platform if you are not using a financial adviser.
- The ongoing charges** figure is based on expenses as at 31 December 2019. This figure may vary from year to year. It excludes:
 - portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units/shares in another collective investment undertaking.
- For more information about charges, please see the Charges and Expenses section of the Fund's prospectus, which is available electronically at www.liontrust.co.uk.

Past performance

- Past performance is not a guide to future performance. It has been calculated on the basis that any distributable income of the Fund has been reinvested. The past performance shown in the chart takes into account all charges except entry and exit charges.
- The Fund launched on 10 November 2005.
- The I Inc share class was launched on 01 November 2010.
- The base currency of the Fund is pounds sterling.
- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Man GLG Undervalued Assets Fund Professional Accumulation Shares (Class C)

(ISIN:GB00BFH3NC99) Man GLG Undervalued Assets Fund (the 'Fund') is a sub-fund of Man UK ICVC (the 'Company').

Man Fund Management UK Limited, part of Man Group plc, is the Authorised Corporate Director.

Objectives and investment policy

- The Fund seeks to outperform (net of fees) the FTSE All Share Total Return Index ("FTSE Index") over the long-term (over 5 year rolling periods). To achieve this objective, the Fund will invest at least 80% of its assets, directly or indirectly, in UK equities relating to companies that either have their registered office in the UK; carry out a predominant proportion of their business activity in the UK market; and/or are listed on a UK stock exchange.
- The Fund may invest in equities which are not UK equities, American Deposit Receipts ('ADR') and other equity linked instruments including (without limitation) exchange traded or "over the counter" (traded via broker-dealer network) financial derivative instruments (as described below) such as stock options, equity swaps and contracts for differences. The Fund may also invest in transferable money market securities (including certificates of deposit, commercial paper and bankers acceptances), fixed and floating rate government and corporate bonds, bonds convertible into common stock, preferred shares and other fixed income investments. Further, the Fund may hold cash, near cash and other ancillary liquid assets such as time deposits and may use currency transactions, including forward currency contracts, currency swaps and foreign currencies to alter the exposure characteristics of the transferable securities held by the Fund. Fixed income investments may be issued by any government, company or international agency.
- The Investment Adviser uses the FTSE Index as a guide for selecting assets for the Fund, however the Fund is actively managed, meaning that the Investment Adviser will use its expertise to pick investments to achieve the Fund's objective. The Investment Adviser seeks to identify companies trading below the Investment Adviser's estimation of the value of their tangible assets (physical and measurable assets that are used in a company's operations such as property, plant, and equipment) or their replacement cost, or whose profit streams (which focuses on the cash generated for shareholders) the Investment Adviser considers to be undervalued.
- *Use of financial derivative instruments ("FDI")*. The Fund may use FDI extensively to achieve the investment objective and for efficient portfolio management purposes to hedge (a technique using investments to reduce risk) against anticipated movements in a market or security, or where it is more economically effective than directly holding the underlying asset.
- *Benchmarks*. The Fund is managed with reference to benchmarks. The Fund's performance target (as detailed above) has been chosen on the basis that the ACD considers it to set a reasonable performance target for the Fund to achieve, taking into account a number of factors including (for instance) the investment strategy pursued by the Investment Adviser, and the assets in which the Fund will principally invest. Whilst the Investment Adviser may deviate from the FTSE Index, in terms of holdings selection, the index is used for investment purposes (which can include construction of the Fund's portfolio universe and/or to assist with the management of risk in the Fund).
- *Dealing*. Shares can be bought and sold on each Dealing Day, as detailed in the Fund prospectus.
- *Investment Horizon*: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- *Treatment of income*. Income earned on investments will be added to the value of investors' shares.

Risk and reward profile

- The lowest category does not mean 'risk free'.
- The risk and reward profile is not guaranteed and may change over time.
- Historical data may not be a reliable indication for the future.
- The risk category for this share class is 5 as funds of this nature engage in strategies that typically have a moderate to high volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.

The following risks may not be fully captured by the risk and reward profile:

- The use of FDI involves additional risks: (i) FDI may be highly sensitive to price movements of the asset on which they are based; (ii) a counterparty to a non-exchange traded FDI may not meet its payment obligations in the event of default; (iii) the use of FDI may result in increased leverage (investing borrowed money). These risks may lead to significant losses.
- Liquidity characteristics of non-exchange listed investments can be irregular, and may result in higher than anticipated costs to liquidate the investment.
- The Fund is a specialist country-specific fund which, as a result, may carry greater risk than a more internationally diversified portfolio.
- The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets.
- The value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.

A complete description of risks is set out in the prospectus section entitled 'Risk Factors'.

Charges

The charges you pay are used to pay the costs of running the Fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	0.90%
------------------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
------------------------	------

The entry and exit charges shown are maximum figures and in some cases you might pay less. Please refer to your financial advisor or the distributor for the actual charges.

The ongoing charges figure is based on expenses for the year ending 28/02/2019.

This figure may vary from year to year. It excludes performance fees (where applicable) and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another sub-fund.

If you switch between different sub-funds of the Company you may pay a switching charge on your subscription to the new sub-fund. This charge may be an amount equal to the entry charge of the new sub-fund.

For detailed information on charges and fees please see the 'Fees and Expenses' section of the prospectus.

Past performance

- The Fund was authorised in 2013. This share class was launched on 15 November 2013.
- The past performance chart shows the annual performance, calculated in GBP, for each full calendar year since launch.
- The performance in this table includes all fees and expenses, excluding any entry or exit charges, and shows percentage year-on-year changes in Fund value.
- Please be aware that past performance is not a reliable indicator of, or guide to, future performance.
- The Fund is not an index-tracker and does not seek to track the benchmark shown in the past performance chart. The benchmark performance data is shown for performance comparison purposes only.

Practical information

- The Fund is a sub-fund of the Company which is an umbrella scheme comprising a number of sub-funds.
- The Bank of New York Mellon (International) Limited is the depositary of the Company. The Fund's assets are treated as being segregated from the assets of other sub-funds of the Company.
- Additional information related to the Fund is located in the prospectus which is produced in an official language of the jurisdictions in which the Fund is registered for public sale. The prospectus is available together with the most recent financial statements, information on other share classes and the latest prices of shares free of charge at www.man.com.
- The Fund is subject to taxation legislation in the UK, which may have an impact on your personal tax position as an investor in the Fund.
- Man Fund Management UK Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for the Fund.
- You may switch shares in the Fund for shares in any other sub-fund of the Company. Further information and provisions are in the prospectus.
- Details of Man Fund Management UK Limited's Remuneration Policy are available at www.man.com/mfm-remuneration-policy, including: (a) a description of how remuneration and benefits are calculated; and (b) the identity of persons responsible for awarding remuneration and benefits. A paper copy of these details may be obtained, free of charge, at Man Fund Management UK Limited at Riverbank House, 2 Swan Lane, London, EC4R 3AD, United Kingdom.
- The Funds are not in any way connected to or sponsored, endorsed, sold or promoted by the London Stock Exchange Group plc and its group undertakings (collectively, the "LSE Group"). The LSE Group does not accept any liability whatsoever to any person arising out of the use of the Fund or the underlying data. See: <https://www.man.com/indices-disclaimer> for full disclaimers.

Fund Name	Global Insurance Fund , a sub-fund of Polar Capital Funds plc
Share Class	Class I GBP Accumulation Shares
ISIN	IE00B5339C57

Objectives and investment policy

Objectives

The objective of the Fund is to provide a total return (capital growth and income), by investing worldwide in the shares of insurance-related companies.

Investment policy

The Fund invests in the shares of companies that are involved in various sectors of the insurance industry. These may include general insurance, reinsurance, life assurance, insurance brokerages and support service companies.

The Fund may invest in financial derivatives (complex instruments based upon the value of underlying assets) for hedging, to reduce risk, to manage the Fund more efficiently, or to gain exposure to securities in a more efficient way.

The Fund is actively managed and uses the MSCI Daily TR World Net Insurance Index (GBP) benchmark as a performance target and to calculate the performance fee.

There is no intention to pay dividends in respect of the Accumulation Share Classes.

You may sell your shares on days which banks are normally open for business in Dublin and London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

Why is this fund in category 5?

The Fund has a high risk rating because it invests in equities, the value of which can move up and down over time to a greater extent than some other investments.

In addition to the risk captured by the indicator, the overall fund value may be considerably affected by:

Concentration Risk - the Fund invests in a relatively concentrated number of companies based on the insurance sector. This focused strategy can produce high gains but can also lead to significant losses. The Fund may be less diversified than other investment funds.

Investment Risk - the Fund invests in equities globally, and share prices can rise or fall due to a number of factors affecting global stock markets.

Derivative Risk - certain derivatives may result in gains or losses that are greater than the original amount invested. Derivatives also involve counterparty risk, which is the risk that a counterparty to the derivative contract cannot meet its contractual obligations.

Currency Risk - the Fund invests in assets denominated in currencies other than the Fund's base currency. Changes in exchange rates may have a negative impact on the Fund's investments.

What do these numbers mean?

The risk indicator was calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. A category 1 fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a category 7 fund, the risk of losing your money is high but there is also a chance of making high gains. The numerical scale is complex, for example, 2 is not twice as risky as 1.

For a more detailed explanation of risks, please refer to the "Risk Factors" section of the Prospectus.

Charges

One-off charges taken before or after you invest

Entry charge	Up to 5.00%

Objectives and investment policy

Objectives

The objective of the Fund is to achieve long term capital appreciation by way of investing in a globally diversified portfolio of technology companies.

Investment policy

At least two-thirds of the Fund's assets are invested in technology-related companies. These may include computer software and equipment, internet software and systems, electronic technology and other technology-related companies.

The Fund may have significant exposure to companies in the USA and Canada.

The Fund may invest in financial derivatives (complex instruments based upon the value of underlying assets) for hedging, to reduce risk, to manage the Fund more efficiently, or to gain exposure to securities in a more efficient way.

The Fund may invest in emerging markets (developing countries).

The Fund is actively managed and uses the Dow Jones Global

Technology Net Total Return Index (GBP) benchmark for performance comparison purposes and to calculate the performance fee.

Any income which the Fund generates may be paid out in the form of an annual dividend at the sole discretion of the Directors.

You may sell your shares on days which banks are normally open for business in Dublin and London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

Why is this fund in category 6?

The Fund has a high risk rating because it invests in equities, the value of which can move up and down over time to a greater extent than some other investments.

In addition to the risk captured by the indicator, the overall fund value may be considerably affected by:

Strategy Risk - investments in technology companies may be subject to greater price fluctuations than investments in other sectors. Rapid changes in technology and/or government regulation of use in certain countries may affect the value of the Fund's investments. The Fund may be less diversified than other investment funds.

Investment Risk - the Fund invests in equities globally, share prices can rise or fall due to a number of factors affecting global stock markets.

Derivative Risk - certain derivatives may result in gains or losses that are greater than the original amount invested. Derivatives also involve counterparty risk, which is the risk that a counterparty to the derivative contract cannot meet its contractual obligations.

Currency Risk - the Fund invests in assets denominated in currencies other than the Fund's base currency. Changes in exchange rates may have a negative impact on the Fund's investments.

Emerging Markets Risk - emerging market countries face more political, economic or structural challenges than developed countries. Investments in such countries may offer higher potential for gains or losses, and markets may be less liquid.

What do these numbers mean?

The risk indicator was calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. A category 1 fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. Royal London UK Equity Income Fund (Accumulation - Class M Shares)

A sub-fund of Royal London Equity Funds ICVC ISIN: GB00B8Y4ZB91
Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective The Fund's investment objective is to achieve a total return over the medium term (3-5 years) by investing at least 80% in the shares of UK medium-sized companies listed on the London Stock Exchange.

The Fund's performance target is to outperform, after the deduction of charges, the FTSE All-Share Total Return GBP Index (the "Index") over rolling 3-year periods. The Fund also aims to produce an income in excess of the Index's income over rolling 3-year periods. For further information on the Fund's index, please refer to the Prospectus.

The Fund is actively managed.

Policy At least 50% of the Fund will be invested in the shares of UK companies, which are those domiciled in the UK, or which have significant UK business operations. Up to 30% of the Fund's assets may be invested in the shares of companies that are not UK companies (as defined above), but which are listed in the UK.

A limited amount of the Fund's assets may be invested in exchange-traded funds, money market instruments, deposits and other transferable securities (including both government and public securities).

The Fund may also invest a small amount of its portfolio in derivatives (investments that derive their value from another closely related underlying investment) for the purposes of efficient portfolio management (EPM).

It will typically hold a low level of cash (around 5% or less of assets).

Recommendation The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Concepts to understand

Total Return A total return is a combination of capital growth and income. Capital growth is defined as the rise in an investment's value over time and income as the payment an investment generates, such as dividends or bond coupons.

Rolling 3 Year Period A rolling 3-year period is any period of three years, no matter which day you start on.

Efficient Portfolio Management A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so.

Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

The fund is shown in risk category 5 because its share price has shown a medium to high level of volatility historically. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. As an investment, shares are typically more volatile than money market instruments and bonds.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Liquidity Risk In difficult market conditions the value of certain fund investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.

For more about fund risks, see the "Risk Factors" section in the Prospectus (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/)

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:

Entry charge None

Exit charge None

Charges taken from the fund over a year:

Ongoing charge 0.72%

Charges taken from the fund under specific conditions:

Performance fee None

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Ongoing charge is based on the Fund Management Fee (FMF), which is the periodic fee paid to the ACD to cover the expenses of the Fund. This figure does not include portfolio transaction costs. Ongoing charges are the same for all investors in the share class.

For more about charges, see the expenses section in the full Prospectus and supplement (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/)

Past performance

The graph shows fund performance over the past 10 years where available. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.

The Fund was launched on 11 April 1984 as a unit trust and converted to an open-ended investment company (OEIC) on 11 April 1984. The share class launched on 26 November 2012.

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

TB Amati UK Smaller Companies Fund, a sub-fund of the TB Amati Investment Funds B Accumulation, ISIN: GB00B2NG4R39

The Authorised Corporate Director of this Fund is: T. Bailey Fund Services Limited.

Objectives and Investment Policy

The Fund aims to provide long term capital growth over periods of 5 years or longer.

At least 80% of the Fund will typically be invested in shares, equity-related securities or bonds in or issued by UK smaller companies. For these purposes, UK companies are companies incorporated or domiciled in the UK, or companies that are listed in the UK and have the majority of their economic activity in the UK. Smaller companies are companies which form the bottom 10% of the UK equity market by market capitalisation.

The Fund may also invest (up to 20%) in shares, equity-related securities or bonds in or issued by companies which are not UK smaller companies, money market instruments, cash or near cash. There may be occasions when the Investment Manager chooses to hold large degrees in these asset classes in order to protect returns in certain market conditions (e.g. severe market downturns).

Up to 10% of the Fund may be invested in collective investment schemes (which may include those managed or operated by the ACD and its associates).

The Fund is actively managed, taking into account the Investment Manager's views on growth opportunities and prevailing market conditions.

Derivatives may be used for Efficient Portfolio Management purposes to reduce risk or cost or to generate additional capital or income.

The Fund is not managed to generate an income. Any income arising from the Fund is reinvested. In other words all units are accumulation units.

Investors can redeem units on demand, at the daily valuation point of 12 noon (UK time) when this is a normal business day in the UK.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money in the short-term (within 5 years). The Fund should be viewed as a medium to long-term investment only.

Risk and Reward Profile

The Risk and Reward Indicator below demonstrates in a standard format where the Fund ranks in terms of its potential risk and reward. It is based on historical performance data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking. The higher the rank the greater the potential reward but the greater the risk of losing money.

- The Fund is in the above risk category because it invests in shares.
- Smaller companies' securities are often traded less frequently than those of larger companies, this means they may be more difficult to buy and sell. Their prices may also be subject to short term swings.
- The lowest category does not mean a fund is a risk free investment.
- The value of investments may go down as well as up in response to general market conditions and the performance of the assets held. Investors may not get back the money which they invested.
- There is no guarantee that the Fund will meet its stated objectives.
- The movements of exchange rates may lead to further changes in the value of investments and the income from them.
- There is a risk that any company providing services such as safe keeping of assets or acting as counterparty to derivatives may become insolvent, which may cause losses to the Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

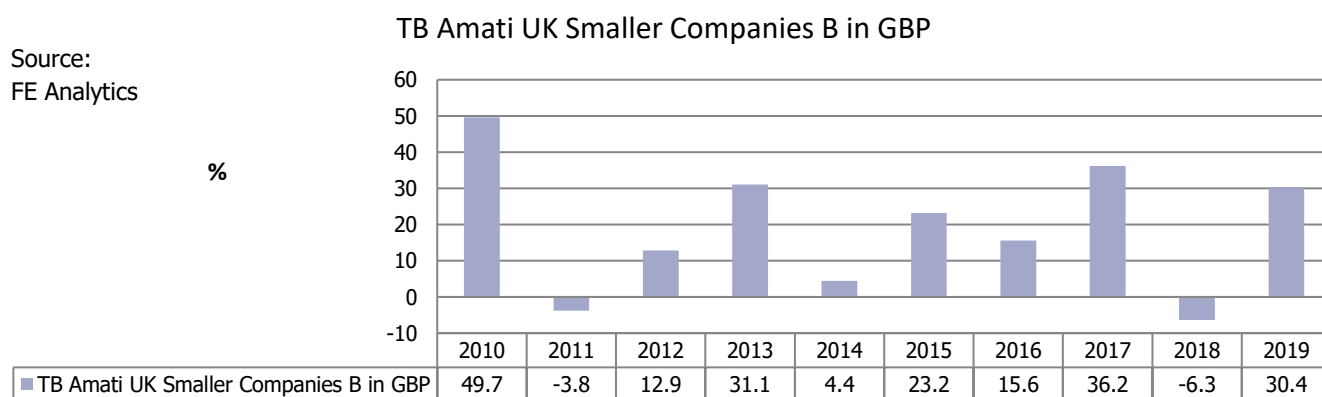

One-off charges taken before or after you invest	
Entry charge	nil
Exit charge	nil
This is the maximum that might be taken out of your money before it is invested/ before the proceeds of your investment are paid out.
