INVESTMENT OBJECTIVE

The Fund aims to provide a return, from a combination of income and capital growth over the long term. Performance target: To outperform the IA Sterling Strategic Bond sector average, after the deduction of charges, over any 5 year period. The Fund invests in a global portfolio of bonds of any quality, including high yield (non-investment grade) bonds, issued by governments or companies. Where investments are made in assets in currencies other than the base currency of the Fund, the Fund will seek to hedge those assets back to the base currency to remove the risk of currency exchange rate movements. In certain market conditions, the Fund may invest more than 35% of its assets in government bonds issued by any one body. The investment manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently. The Fund is actively managed with reference to the IA Sterling Strategic Bond sector average, which is based on a peer group of...

INVESTMENT OBJECTIVE

The Fund seeks to outperform (net of fees) the FTSE All-Share (NDTR) Index ("FTSE Index") over the long-term (over 5 year rolling periods). To achieve this objective, the Fund will invest at least 80% of its assets, directly or indirectly, in equities relating to companies that either have their registered office in the UK; carry out a predominant proportion of their business activity in the UK market; and/or are listed on a UK stock exchange. The Investment Adviser seeks to identify companies trading below the Investment Adviser's estimation of the value of their tangible assets (physical and measurable assets that are used in a company's operations such as property, plant, and equipment) or their replacement cost, or whose profit streams (which focuses on the cash generated for shareholders) the Investment Adviser considers to be undervalued.
