Best performance is not a guide to future returns. The value of units can go down as well as up. Please note that pension fund and life fund performance differs from unit trust/OEIC performance due to the underlying difference in the taxation treatment.

INVESTMENT OBJECTIVE

The Fund aims to provide a return, from a combination of income and capital growth over the long term. Performance target: To outperform the IA Sterling Strategic Bond sector average, after the deduction of charges, over any 5 year period. The Fund invests in a global portfolio of bonds of any quality, including high yield (non-investment grade) bonds, issued by governments or companies. Where investments are made in assets in currencies other than the base currency of the Fund, the Fund will seek to hedge those assets back to the base currency to remove the risk of currency exchange rate movements. In certain market conditions, the Fund may invest more than 35% of its assets in government bonds issued by any one body. The investment manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently. The Fund is actively managed with reference to the IA Sterling Strategic Bond sector average, which is based on a peer group of...

INVESTMENT OBJECTIVE

The objective of this fund is to maintain capital and to provide a return in line with money market rates, before charges. The fund will generally invest in short term deposits, certificates of deposit, government bonds (predominantly UK) issued in pounds sterling (a type of loan which pays interest) and Repos. Repos are an agreement between two parties to sell or buy an asset and later reverse the trade at an agreed date and price. In stressed market conditions, the fund may be invested up to 100% in government and public securities issued by a single issuer. The maximum maturity of the instruments the fund invests in is 397 days but the fund must maintain a weighted average maturity of less than 60 days. The bonds that the fund invests in must be investment grade (rated as lower risk). Investment grade bonds are bonds that have achieved a higher credit rating from a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time. The fund may use derivatives (contracts which have a value linked to the price of...)

INVESTMENT OBJECTIVE

We aim to preserve your capital and pay an income by delivering a greater total return than the Bank of England's Base Rate + 0.5%, after fees, over any rolling three-year period. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (interest payments). We use the Bank of England's Base Rate + 0.5% as a target for our fund's return because we aim to provide a return in excess of what you would receive in a UK savings account. This is an investment product, not a cash savings account. Your capital is at risk.

INVESTMENT OBJECTIVE

The Fund aims to increase the value of your investment over the long term. It looks to outperform the FTSE World Europe ex UK Index over rolling 3-year periods, after the deduction of charges. The Fund is actively managed, and invests at least 75% of its assets in a concentrated portfolio of shares of companies domiciled in Continental Europe, or which have significant Continental European business operations. The Fund selects companies in which the fund manager has a high conviction that the current share price does not reflect the prospects for that business. These companies may be chosen from any industry or economic sector, with significant sector and share weightings taken at the fund manager's discretion. There is no restriction on company size, however, investment tends to focus on larger companies, such as those included in the FTSE World Europe ex UK Index. The FTSE World Europe ex UK Index is regarded as providing an appropriate representation of the share performance of large and medium-sized companies across Europe (excluding the UK), currently with approximately 500...
