Allianz UK & European Investment Funds - Allianz Gilt Yield Fund Share Class I (Inc) (GBP)

Managed by Allianz Global Investors GmbH, part of Allianz Global Investors

ISIN: GB0031383390

Objectives and Investment Policy

The objective of the Fund is to maximise total return primarily through investment in UK Government Securities. Investors should be aware that the Fund's capital is at risk and there is no guarantee that the Fund will achieve its investment objective over any particular period or at all.

We may invest in gilts, overseas government bonds, government guaranteed bonds, supranational bonds, deposits, money market instruments, derivatives, collective investment schemes. At least 80% of the Fund's value will be invested in gilts. Up to 20% of the Fund's value may be invested in Sterling denominated (or hedged back to Sterling) debt securities, which are not issued by, but with a rating the same or higher than that of, the UK Government.

The Fund may use derivative instruments such as futures, options, options on swaps and swap agreements (e.g. interest rate swaps). The Fund may use the derivative instruments listed above for hedging purposes and/or for investment purposes.

Comparator Benchmark of the fund is FTSE Actuaries UK Conventional Gilts All Stocks Midday Index.

Due to its investment strategy we expect a high volume of transactions which results in higher transactions costs reducing the return of the fund.

Although the Fund will invest primarily in gilts which constitute the benchmark, the Fund is actively managed and may deviate from the benchmark and invest in securities that are not included in the benchmark. It will be constrained to a limited extent only by the benchmark.

You may redeem shares of the fund usually on each business day by 12:00.

We usually distribute the income of the fund on a semiannual basis.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and Reward Profile

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the fund.

The categorisation of the fund is not guaranteed and may change in the future.

Even the lowest category 1 does not mean a risk-free investment.

Why is the fund in this category?

Funds of category 4 have shown in the past a medium volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 4 might be subject to medium price fluctuations based on the historical volatilities observed.

We may invest directly or indirectly a significant portion of the fund into bonds or money markets instruments. If the issuer may fall into insolvency or may suffer economical problems the interest and/or the capital of these assets may not or may not be completely paid and/or the price of the assets may drop.

Charges

These charges are used to pay the costs of running the fund, including the costs of marketing and selling. They reduce the potential growth of your investment.

One-off charges deducted before or after you invest

Entry Charge	0.00%
Exit Charge	0.00%

This is the maximum charge that might be taken out of your money before it is invested or before the proceeds of your investments are paid out.

Charges taken from the fund over a year

Ongoing Charges	0.32%
-----------------	-------

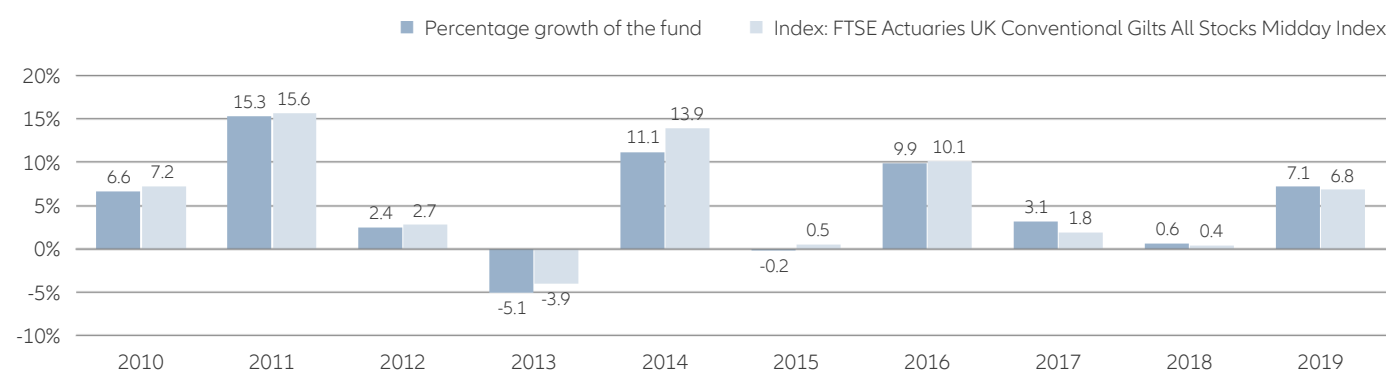

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find actual entry and exit charges from your financial adviser.

The ongoing charges shown are based on the fund's last financial year ending 31.08.2019. It may vary from year to year. It does not include transaction costs incurred when we buy or sell assets for the fund.

A dilution levy may be charged on purchases and redemptions of shares to protect the remaining investors against the costs incurred by the fund in buying or redeeming its investments. This levy may be charged where the fund is experiencing large levels of net purchases/redemptions and on "large deals" (i.e. deals of 2% or more of the value of the fund). The amount of any such dilution levy is calculated by reference to the estimated costs of dealing in the underlying investments using the rates calculated for the preceding quarter.

You will find more details about the calculation of the charges in the prospectus.

Past Performance

Past performance is not a reliable guide to future performance.

The past performance shown here takes account of all charges and costs with the exception of the entry and exit charge.

Allianz UK & European Investment Funds -Allianz Strategic Bond Fund Share Class C (Inc) (GBP)

Managed by Allianz Global Investors GmbH, part of Allianz Global Investors

ISIN: GB00B06T9362

Objectives and Investment Policy

The Fund aims to maximise total return primarily through investment directly in debt securities or by gaining exposure indirectly through the use of derivatives. The Fund will invest globally although at least 80% of its assets shall be invested in GBP denominated (or hedged back to GBP) debt securities. Investors should be aware that the Fund's capital is at risk and there is no guarantee that the Fund will achieve its investment objective over any particular period or at all.

We may invest up to 100% of the Fund's assets into conventional fixed income securities and indirectly through the use of derivatives. Up to 50% of the fund's assets may be in high yield securities and unrated securities of similar credit quality. More than 35% of the value of the property of the Fund may be invested in securities issued or guaranteed by the following states; the UK, Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, Liechtenstein, Luxembourg, Netherlands, Norway, Portugal,

Spain, Sweden, Switzerland and the United States of America. Up to 30% of the fund's assets may be in China via RMB currency exposure. We may also invest up to a maximum of 10% of the Fund in collective investment schemes. The Fund will make extensive use of derivatives for investment purposes and for efficient portfolio management (including for hedging).

Due to its investment strategy we expect a high volume of transactions which results in higher transactions costs reducing the return of the fund.

You may redeem shares of the fund usually on each business day by 12:00.

We usually distribute the income of the fund on a semiannual basis.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Funds of category 4 have shown in the past a medium volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 4 might be

subject to medium price fluctuations based on the historical volatilities observed.

We may invest directly or indirectly a significant portion of the fund into bonds or money markets instruments. If the issuer may fall into insolvency or may suffer economical problems the interest and/or the capital of these assets may not or may not be completely paid and/or the price of the assets may drop.

The fund contains a material proportion of assets which either have a low level of liquidity or which, under certain circumstances, may have a low level of liquidity. As a result, it is possible that these assets cannot be sold or can only be sold at a significant discount. Consequently, a high level of redemptions may lead to an increased risk of redemptions being suspended. For this reason we may not be able to pay your money back, or not immediately, and/or the fund price may fall.

RISK AND REWARD PROFILE

- The fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the fund.
- The risk category has been calculated using historic data and may not be a reliable indicator of the fund's future risk profile.
- A risk indicator of "1" does not mean that the investment is "risk free".

The risk indicator may not fully take into account the following risks and the following may affect fund performance:

- **Market volatility risk:** The value of the fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- **Currency risk:** The fund's assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the fund's value.
- **Derivatives risk:** The fund may invest in derivatives with the aim of profiting from falling ('shorting') as well as rising prices. Should the asset's value vary in an unexpected way, the fund value will reduce.
- **Credit risk:** Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.
- **Bond liquidity risk:** The fund holds bonds which could prove difficult to sell. As a result, the fund may have to lower the selling price, sell other investments or forego more appealing investment opportunities.

Please refer to the fund's prospectus for full details of these and other risks which are applicable to this fund.

- For further explanation and information see the investment objective and policy section of the Prospectus, which is available by contacting us.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

- Please note that even the lowest risk class can lose you money and that extreme adverse market circumstances can mean you suffer severe losses in all cases.
- The Fund is classified in the category above because it invests in company shares which generally provide higher rewards and higher risks than other investments such as bonds or cash.
- The indicator does not take into account the following relevant material risks:
 - Investment markets can go down as well as up and market conditions can change rapidly. The value of an investment in the Fund, and any income from it, can fall as well as rise and you may not get back the amount invested.
 - The Fund has exposure to a foreign currency and changes in the rates of exchange will cause the value of any investment, and income from it, to fall as well as rise and you may not get back the amount invested.
 - Custody of assets involves a risk of loss if the custodian becomes insolvent or breaches duties of care.
 - The Fund's exposure to a single market and currency may increase share price movements.
 - Where possible, charges are taken from the Fund's revenue. Where there is insufficient revenue, the remainder will be taken from capital. This will reduce the capital value of the Fund.
 - The process for the UK to exit the European Union introduces elements of political uncertainty and may have practical consequences for the Fund. Developments will be closely monitored.
 - Infectious viruses may pose significant threats to human health and may be highly disruptive to global economies and markets. The economic and market disruptions caused by infectious viruses could impact the value of the investments of a Fund.

Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

BMO UK Property Feeder Fund

Share Class: 2 Acc, (ISIN GB00BWZMHM55).
This Fund is managed by BMO Fund Management Ltd.

Objectives and investment policy

The investment objective of the Fund is to provide income and capital growth.

The Fund will invest all or substantially all of its assets in the shares of the BMO UK Property Fund ICVC. To the extent that the Fund is not fully invested in the BMO UK Property Fund ICVC the Fund will hold its remaining assets in cash. The BMO UK Property Fund ICVC is a property authorised investment fund which invests mainly in a diversified portfolio of commercial property.

Any income earned by this unit class will be reinvested back into the unit class to grow the value of your investment.

There is no minimum holding period for this Fund. However, it may not be appropriate for investors who plan to withdraw their money in under 5 years.

You may buy or sell units daily on demand (but not weekends or UK bank holidays or other days when the Fund is not open for dealing). Orders to buy or sell must be received by 12 noon (UK time) to receive the price calculated at that day's valuation point.

Risk and reward profile

Historical data may not be a reliable indicator of the Fund's future risk and reward profile. The value of your investment may fall as well as rise.

You need to be aware of the following risks before investing:

Property Risk: the value of such investments is likely to reflect valuations of property assets as determined by professional valuers. Such valuations are the opinion of the valuer at a particular time, may not be supported by recent transactions and are liable to revision, up or down.

Fund Liquidity Risk: the ability of the Fund to meet redemptions within normal settlement terms depends on the readily realisable assets held in the Fund. If properties have to be sold quickly this could result in lower prices being obtained for them.

Liquidity Risk: the ability to buy and sell assets at a favourable price may be affected by a low level of counterparties willing to enter into a transaction with the Fund.

Restricted Diversification: investments are concentrated in direct property in the UK. These investments are limited to a relatively narrow segment of the economy. Performance may differ in direction and degree from that of the stock market.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

Emerging Markets Fund

a sub-fund of Fidelity Institutional Funds

W Accumulation Shares (ISIN: GB00B9SMK778)

This fund is managed by FIL Investment Services (UK) Limited

Objectives and Investment Policy

- The fund aims to increase the value of your investment over a period of 5 years or more.
- The fund will invest at least 70% in companies in countries experiencing higher levels of economic growth within Africa, the Indian sub-continent, Latin America, East and South East Asia, Central and Eastern Europe (including Russia) and the Middle East. This includes countries considered to be emerging markets as determined by the investment manager at its sole discretion.
- Emerging markets are countries progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body.
- The companies will be either listed, incorporated, domiciled, or have significant business activities in the region.
- The remainder will be invested in companies outside of the region detailed above and in other investment types such as cash and derivatives.
- Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment.
- The fund is actively managed. The Investment Manager identifies suitable opportunities for the fund utilising in-house research and investment capabilities.
- The Investment Manager will, when selecting investments for the fund and for the purposes of monitoring risk, consider the MSCI Emerging Markets (Net Total Return) Index.
- The Investment Manager has a wide degree of freedom relative to the index and may take larger, or smaller, positions in companies, and/or may invest outside the index, to take advantage of investment opportunities. This means the fund's investments and therefore performance may vary significantly from the index.
- Income earned by the fund is paid into the fund and reflected by an increase in the value of each share.
- Shares can usually be bought and sold each business day of the fund.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
- Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.
- Liquidity is a measure of how easily an investment can be converted into cash. Under certain market conditions assets may be more difficult to sell.
- Emerging markets may be more volatile and it could be harder to sell or trade securities. There may be less supervision, regulation and less well-defined procedures than in more developed countries. Emerging markets can be sensitive to political instability, which can result in greater volatility and uncertainty, subjecting the fund to the risk of losses.
- In some emerging markets, such as Russia, the safekeeping provisions for securities benefit from less governed standards.

Franklin UK Equity Income Fund

Class W (acc) • ISIN GB00B7DRD638 • A sub-fund of Franklin Templeton Funds
The management company is Franklin Templeton Fund Management Limited

Objectives and Investment Policy

Franklin UK Equity Income Fund's (the "Fund") primary aim is to generate an income that is higher than that of the FTSE All-Share Index, together with investment growth over a three to five-year period after all fees and costs are deducted.

The Fund invests at least two thirds (but typically significantly more) in the shares of companies listed on the London Stock Exchange. These companies are incorporated/domiciled in the UK or which have significant business operations in the UK.

The Fund can invest to a lesser extent in:

- equity securities of companies that are not included in the FTSE 100 Index
- other asset classes.

Typically, the number of holdings in the Fund will vary between 40 to 60 company shares and most of these will be the shares of large (such as those making up the FTSE 100 Index) companies

The Fund's managers try to help manage risk by making sure no single company share dominates the Fund's investments. Normally they try to keep shareholdings in any individual large company to no more than 5% of the Fund's total value, while a shareholding in any individual medium- and small-sized company would typically be no more than 2%.

The Fund can use derivatives for efficient portfolio management (managing the fund in a way that is designed to reduce risk or cost and/or generate extra income or growth).

You may request the sale of your shares on any UK business day.

The income received from the Fund's investments is accumulated and included in the value of the shares.

For further information on the Objectives and Investment Policy of the Fund, please refer to the "Investment Objectives and Policies of the Funds" section of the current prospectus of Franklin Templeton Funds.

Terms to Understand

Equity securities: Securities that represent an ownership stake in a company.

FTSE 100 Index: This index comprises the 100 largest companies listed on the London Stock Exchange. The Index is used to assess the change in value of the securities which comprise it.

FTSE All Share Index: This index comprises almost every company listed on the London Stock Exchange and is generally considered to be the best performance measure of the overall London equity market.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

As the share class has no sufficient historical data available, simulated data based on a representative portfolio model or benchmark have been used

instead.

Why is the Fund in this specific category?

The Fund invests mainly in equity securities listed on the London Stock Exchange, but may to a lesser extent also invest in debt securities or convertible securities of UK issuers. Such securities have historically been subject to price movements due to company-specific factors and movements in the equity and fixed income markets of the UK generally. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods.

Risks materially relevant not adequately captured by the indicator:

Equity risk: prices of equities may be affected by factors such as economic, political, market, and issuer-specific changes. Such changes may adversely affect the value of the equities regardless of company-specific performance.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Factors" section of the current prospectus of Franklin Templeton Funds.

Past Performance

- Past performance is not a guide to future performance.
- The past performance shown here includes all the ongoing charges.
- Past performance is calculated in GBP
- The Fund was launched in 2011 and the present share class on 31/05/2012.
- We measure performance against the Fund's performance target the FTSE All-Share Index, as it is widely available and reflects investments in the UK stock market.

The Franklin UK Equity Income Fund was launched on 17/10/11 to receive the assets of Rensburg UK Equity Income Trust. Past performance from the start of the performance chart has been simulated and is based on mid-price of the Trust and from 17/10/11 up to the launch date of the share class has been simulated by taking the performance of another existing share class of the Fund, which does not differ materially in the extent of its participation in the assets of the Fund.

ABSOLUTE RETURN FIXED INCOME FUND

Class I Acc GBP ISIN: GB00BGK8VR99
 Fund Currency: GBP Share Class Currency: GBP

A sub-fund of Janus Henderson UK & Europe Funds, a UK OEIC managed by Henderson Investment Funds Limited.

Objective and investment policy

Objective

The Fund aims to provide a positive (absolute) return regardless of market conditions, over any 12 month period. A positive return is not guaranteed over this or any other time period, and particularly over the shorter term the Fund may experience periods of negative returns. Consequently your capital is at risk.

Performance target: To outperform the ICE Bank of America ML 3 month Sterling Government Bill Index by at least 2% per annum, before the deduction of charges, over any 5 year period.

Investment policy

The Fund invests at least 80% of its assets in a global portfolio of bonds of any quality, including high yield (non-investment grade) bonds and asset-backed and mortgage-backed securities, issued by governments or companies. The Fund may invest directly or via derivatives (complex financial instruments).

The Fund may also invest in other assets including bonds of other types from any issuer, preference shares, cash and money market instruments. In certain market conditions, the Fund may invest more than 35% of its assets in government bonds issued by any one body. The Fund will not invest more than 15% of its assets in high yield (non-investment grade) bonds and will never invest in bonds rated lower than B- or B3 (credit agency ratings), or if unrated deemed to be of a comparable quality by the investment manager.

The investment manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk, to manage the Fund more efficiently, or to generate additional capital or income for the Fund.

The Fund is actively managed with reference to the ICE Bank of America ML 3 month Sterling Government Bill Index as this forms the basis of the Fund's performance target. The investment manager has a high degree of freedom to choose individual investments for the Fund.

Strategy

The investment manager manages the Fund to act as a 'risk reducer', aiming to provide consistent positive absolute returns in excess of cash with low volatility and capital stability across economic and credit cycles. Exposure to shorter maturity investment grade bonds across global fixed income markets creates steady income generation which is balanced with tactical trades that aim to dampen overall volatility and take advantage of any market mispricing and dislocations. The Fund is benchmark agnostic seeking the best risk adjusted opportunities across sectors and countries.

Distribution policy The Fund offers accumulation shares (shares in which net income is retained within the price) and income shares (shares in which net income may be paid out to investors).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any business day, as defined in the Fund Prospectus.

For an explanation of some of the terms used in this document, please visit the glossary on our website at www.janushenderson.com.

Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 2 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in net asset value in the past 5 years than those in lower categories. The lowest category does not mean risk free.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

Default Risk An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the Fund. If this happens or the market perceives this may happen, the value of the bond will fall.

Interest Rates When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise. This risk is generally greater the longer the maturity of a bond investment.

Prepayment and Extension Callable debt securities, such as some asset-backed or mortgage-backed securities (ABS/MBS), give issuers the right to repay capital before the maturity date or to extend the maturity. Issuers may exercise these rights when favourable to them and as a result the value of the fund may be impacted.

Derivatives and Leverage The Fund may use derivatives towards the aim of achieving its investment objective. This can result in 'leverage', which can magnify an investment outcome and gains or losses to the Fund may be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.

Currency Hedging When the Fund, or a hedged share class, seeks to mitigate exchange rate movements of a currency relative to the base currency, the hedging strategy itself may create a positive or negative impact to the value of the Fund due to differences in short-term interest rates between the currencies.

Liquidity Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Counterparties The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund. For more information please see the Fund Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

** Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Charges taken from the Fund over a year

Ongoing Charges	0.56%
-----------------	-------

The ongoing charges are based on last year's expenses for the year ending 30 June 2019. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

For more information please see the Fund Prospectus.

The past performance is calculated in GBP.

The Fund and the share class were launched in February 2019.

Past performance is not a guide to future performance.

Insufficient data is available to provide past performance figures.

Please note that while the Fund aims to achieve its performance target before the deduction of charges, the chart and table illustrate the actual performance of the Share Class after the deduction of charges.

The Fund does not aim to track the performance of the index.

STRATEGIC BOND FUND

Class I Acc ISIN: GB0007533820
Fund Currency: GBP Share Class Currency: GBP

Janus Henderson
INVESTORS

A sub-fund of Janus Henderson UK & Europe Funds, a UK OEIC managed by Henderson Investment Funds Limited.

Objective and investment policy

Objective

The Fund aims to provide a return, from a combination of income and capital growth over the long term.

Performance target: To outperform the IA Sterling Strategic Bond sector average, after the deduction of charges, over any 5 year period.

Investment policy

The Fund invests in a global portfolio of bonds of any quality, including high yield (non-investment grade) bonds, issued by governments or companies. Where investments are made in assets in currencies other than the base currency of the Fund, the Fund will seek to hedge those assets back to the base currency to remove the risk of currency exchange rate movements.

The Fund may also hold other assets including bonds of other types from any issuer, preference shares, cash and money market instruments. In certain market conditions, the Fund may invest more than 35% of its assets in government bonds issued by any one body.

The investment manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the IA Sterling Strategic Bond sector average, which is based on a peer group of broadly similar funds, as this forms the basis of the Fund's performance target. The investment manager has complete freedom to choose individual investments for the Fund and to vary allocations between different types of bonds.

Strategy

The investment manager follows a flexible strategy that seeks to deliver total returns (capital appreciation and income) from investments across the entire spectrum of fixed income assets. Using careful macroeconomic research and credit analysis, the portfolio managers actively vary the allocation to different types of bonds to suit the prevailing economic environment.

Distribution policy The Fund offers accumulation shares (shares in which net income is retained within the price) and income shares (shares in which net income may be paid out to investors).

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any business day, as defined in the Fund Prospectus.

Risk and reward profile

◆ Potentially lower reward							Potentially higher reward ◆
◆ Lower risk							Higher risk ◆
1	2	3	4	5	6	7	

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 3 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in net asset value in the past 5 years than those in lower categories. The lowest category does not mean risk free.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

Default Risk An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the Fund. If this happens or the market perceives this may happen, the value of the bond will fall.

Interest Rates When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise. This risk is generally greater the longer the maturity of a bond investment.

High Yield Bonds The Fund invests in high yield (non-investment grade) bonds and while these generally offer higher rates of interest than investment grade bonds, they are more speculative and more sensitive to adverse changes in market conditions.

Country or Region If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.

Derivatives and Leverage The Fund may use derivatives towards the aim of achieving its investment objective. This can result in 'leverage', which can magnify an investment outcome and gains or losses to the Fund may be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Currency Hedging When the Fund, or a hedged share class, seeks to mitigate exchange rate movements of a currency relative to the base currency, the hedging strategy itself may create a positive or negative impact to the value of the Fund due to differences in short-term interest rates between the currencies.

Liquidity Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Charges to Capital Some or all of the ongoing charges may be taken from capital, which may erode capital or reduce potential for capital growth.

Counterparties The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund. For more information please see the Fund Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	0.00%
Exit Charge	0.00%**

* The charges shown are maximum figures. In some cases you may pay less.

Past performance

** Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

Charges taken from the Fund over a year

Ongoing Charges	0.68%
-----------------	-------

The ongoing charges are based on last year's expenses for the year ending 30 June 2019. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

For more information please see the Fund Prospectus.

The past performance is calculated in GBP.

The Fund was launched in October 1986 and the share class was launched in May 2000.

Past performance is not a guide to future performance.

The past performance shown in the chart takes into account all charges except one-off charges.

The Fund does not aim to track the performance of the index.

JPM Global Macro Opportunities Fund C - Net Accumulation a Share Class of JPM Global Macro Opportunities Fund a Fund of JPMorgan Fund ICVC

ISIN GB00B4WKYF80

The Authorised Corporate Director ("ACD") is JPMorgan Funds Limited

Objective and Investment Policy

Investment Objective: To provide positive investment returns over a rolling 3 year period in all market conditions by investing in securities globally, using financial derivative instruments where appropriate. A positive return is not guaranteed over this or any time period and a capital loss may occur.

Investment Approach:

- ▶ Investment process based on macroeconomic research to identify global investment themes and opportunities.
- ▶ Flexible and focused approach to take advantage of global trends and changes through traditional and non-traditional assets.
- ▶ Fully integrated, risk management framework provides detailed portfolio analysis.

Investment Policy: The Investment Adviser uses an investment process based on macroeconomic research to identify global investment themes and opportunities. The Investment Adviser uses a flexible asset allocation approach, using a broad range of asset classes, instruments and techniques. Allocations may vary significantly and exposure to certain asset classes, markets, sectors or currencies may be concentrated from time to time, in response to market conditions and opportunities.

The Investment Adviser will invest, directly or through the use of Financial Derivative Instruments (derivatives), in global Equity securities (including smaller capitalisation companies), Bonds, (including up to 100% in government and public securities, below investment grade and unrated debt securities), Commodity Index Instruments, currencies, Convertible Securities, collective investment schemes and cash and cash equivalents. Issuers of securities may be located in any country, including Emerging Markets.

The Investment Adviser may have net Long or net Short Position exposure to asset classes, industry sectors, markets and /or currencies depending upon market conditions and opportunities. This may result in

a net short position at the overall Fund level. Long Positions will be achieved directly or through the use of Financial Derivative Instruments, and Short Positions will be achieved via the use of Financial Derivative Instruments only.

The Fund may use Financial Derivative Instruments (derivatives) for investment purposes or Efficient Portfolio Management including hedging, where appropriate.

Although most of the non-Sterling securities will be hedged back into Sterling, the Investment Adviser will also use opportunities in the foreign exchange market to maximise returns.

The Fund may invest in China A-Shares via the China-Hong Kong Stock Connect Programmes.

Portfolio Transaction Costs: A consequence of this investment strategy is that the volume of transactions and, therefore, transaction costs, are material. Portfolio transaction costs are paid from the assets of the fund. They are additional to the charges set out in the Charges section. The chart in the Past Performance section shows the Fund's performance including portfolio transaction costs.

Redemption and Dealing: Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

Benchmark: The benchmark of the Fund is ICE 1 Month GBP LIBOR.

The Fund is actively managed. The Benchmark is a performance comparator however the Fund will be managed without reference to its Benchmark. The Benchmark has been chosen as it reflects the investment strategy for the Fund.

Distribution Policy: This Share Class will reinvest income.

Risk and Reward Profile

Lower risk

Higher risk

Potentially lower reward

Potentially higher reward

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and the volatility which is consistent with the risk limit of the Sub-Fund.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 5 because its Net Asset Value has shown medium to high fluctuations historically and this category is consistent with the risk limit of the Sub-Fund.

Other material risks:

- ▶ The value of your investment may fall as well as rise and you may get back less than you originally invested.
- ▶ The Fund aims to provide a positive return in any market conditions over a rolling 3 year period, although this is not guaranteed.
- ▶ The Fund can use sophisticated investment techniques that differ from those used in traditional equity funds.
- ▶ The Fund should not be used as a substitute for liquidity funds or cash accounts.
- ▶ The Sub-Fund uses financial derivative instruments for investment purposes. The value of financial derivative instruments can be volatile and may result in gains or losses in excess of the amount required initially to establish a position in the derivative. The ACD is required to disclose in Appendix A of the Prospectus the sum of the gross notional exposure of the financial derivative instruments used (including those used for hedging or efficient portfolio management) as the expected level of leverage. However, this figure does not take

into account whether the instrument increases or decreases investment risk and so may not be representative of the overall level of investment risk in the Sub-Fund.

- ▶ Some financial derivative instruments (derivatives) traded on an exchange may be illiquid, and as a result, may need to be held until the derivative contract position expires. This may have an adverse impact on the return of the Fund.
- ▶ The value of equity and equity-linked securities may fluctuate in response to the performance of individual companies and general market conditions.
- ▶ The value of bonds and other debt securities may change significantly depending on market, economic and interest rate conditions as well as the creditworthiness of the issuer. Issuers of bonds and other debt securities may fail to meet payment obligations (default) or the credit rating of bonds and other debt securities may be downgraded. These risks are typically increased for below investment grade and certain unrated securities, which may also be subject to higher volatility and be more difficult to sell than investment grade securities.
- ▶ The Fund invests opportunistically and exposure to the markets may vary substantially over a short period of time depending on market conditions. Therefore the Fund may not be fully invested in rising markets; conversely the Fund could be more than fully invested in a falling market. In both circumstances the performance of the Fund would suffer.
- ▶ To the extent that any underlying assets of the Fund are denominated in a currency other than Sterling and are not hedged back to Sterling, movements in currency exchange rates can adversely affect the return of your investment. The currency hedging that may be used to minimise the effect of currency fluctuations may not always be successful.

- ▶ The value of securities in which the Fund invests may be influenced by movements in commodity prices which can be very volatile.
- ▶ Emerging markets may be subject to increased political, regulatory and economic instability, less developed custody and settlement practices, poor transparency and greater financial risks. Emerging market currencies may be subject to volatile price movements. Emerging market securities may also be subject to higher volatility and be more difficult to sell than non-emerging market securities.
- ▶ The Fund may invest in China A-Shares through the China-Hong Kong Stock Connect Programmes which are subject to regulatory change, quota limitations and also operational constraints which may result in increased counterparty risk.

- ▶ The Fund invests in securities of smaller companies which may be more difficult to sell, more volatile and tend to carry greater financial risk than securities of larger companies.
- ▶ The possible loss from taking a short position on a security (using financial derivative instruments) may be unlimited as there is no restriction on the price to which a security may rise. The short selling of investments may be subject to changes in regulations, which could adversely impact returns to investors.
- ▶ The Fund may be concentrated in a limited number of securities, industry sectors or countries and as a result, may be more volatile than more broadly diversified funds.
- ▶ Further information about risks can be found in "Part 11: Risk Warnings" of the Prospectus.

Legal & General Cash Trust Class I Accumulation - ISIN: GB00B0CNHB64

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited.

OBJECTIVES AND INVESTMENT POLICY

- The objective of this Fund is to maintain capital and to provide a return in line with money market rates, before charges.
 - The Fund will generally invest in short term deposits, certificates of deposit, government bonds (predominantly UK) issued in pounds sterling (a type of loan which pays interest) and Repos. Repos are an agreement between two parties to sell or buy an asset and later reverse the trade at an agreed date and price.
 - In stressed market conditions, the Fund may be invested up to 100% in government and public securities issued by a single issuer.
 - The maximum maturity of the instruments the Fund invests in is 397 days but the Fund must maintain a weighted average maturity of less than 60 days.
 - The bonds that the Fund invests in must be investment grade (rated as lower risk). Investment grade bonds are bonds that have achieved a higher credit rating from a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
 - The Fund may also invest in other fixed income securities, other money market instruments and collective investment schemes.
- Other information:**
- The Fund is actively managed as the Manager uses their expertise to pick investments to achieve the Fund's objective.
 - There is no representative target or constraining benchmark available for this Fund.
 - The Fund is a short-term variable net asset value money market fund.
 - Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in sterling (British pounds).
 - This Fund is designed for investors looking to preserve their money from an investment in deposits and short term instruments.
 - This Fund may be appropriate for investors looking to invest for a short period of time.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

Lower risk ← Higher risk
Potentially lower rewards ← Potentially higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 1 as it invests in instruments which are very liquid, have short maturities which have a high credit rating and are considered lower risk than longer maturing securities.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- This Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
- The Fund has money on deposit with companies such as banks or other financial institutions and invests in bonds which are issued by the government. If these companies or the government experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the fund may fall.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- When interest rates are low and if the fund's income is not enough to pay charges, the fund's capital will be used instead. This may cause the value of the fund to fall.
- We may take some or all of the ongoing charges from the Fund's capital rather than the fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest

Entry charge 0.00%*

Exit charge 0.00%*

This is the maximum that might be taken out of your money before it is invested.

*The Fund also incurs a unit price spread. See opposite.

Charges taken from the fund over a year

Ongoing charge 0.15%

Charges taken from the fund under certain specific conditions

Performance fee None

- There are no entry or exit charges.
 - The ongoing charges figure is based on the latest available expenses at December 2019. This figure may vary from year to year.
 - This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
 - The ongoing charges are taken from the income of the Fund.
- Other costs:**
- **Unit price spread:** on any day, the prices for buying or selling units in this Fund are the same. However, there are maximum and minimum prices we can charge for units, reflecting the difference between the buying and selling prices of the assets in the Fund and costs associated with buying and selling the assets. From day to day we will set the unit price between the maximum and minimum depending on whether money is coming into or leaving the Fund.
 - The difference between the maximum and minimum price, which is the most the price can change, can vary but as an example, the maximum price for units in this Fund was 0.00% higher than the minimum price at January 2020.
 - For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in Sterling (British Pounds).
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 1992.
- This unit class launched in 2005.
- To assess the performance of the Fund, it can be compared to the IA sector, Short Term Money Market (referred to as the "Comparator" in the chart opposite).
- **Please note that performance up to 2015 shown in this graph was achieved under a different investment approach which no longer applies. Performance after 2015 is under the current investment approach, which started on 28 April 2016.**

Legal & General Global Inflation Linked Bond Index Fund Class I Accumulation - ISIN: GB00BBHXNN27

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited.

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to provide a combination of growth and income by tracking the Barclays World Government Ex UK Inflation Linked Bonds Hedged GBP Index, the "Index". This objective is after the deduction of charges and taxation.
 - The Fund seeks to replicate as closely as possible the constituents of the Index. The Fund will have at least 90% exposure to assets that are included in the Index.
 - The Index is comprised of bonds (a type of loan which pays interest) issued by governments across all geographical areas (excluding the UK) which are denominated in the local currency of the country and which are linked to the rate of inflation in the country.
 - The Fund may invest in sub-investment grade bonds. The bonds that the Fund invests in will be a mixture of investment grade bonds (rated as lower risk) and sub-investment grade bonds (rated as higher risk). The mix will closely match that of the Index. Investment and sub-investment grade bonds are bonds that have been given a credit rating by a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
 - The Fund may also invest in bonds which are reasonably expected to become part of the Index in the near future or are an alternative to a constituent of the Index, money market instruments (such as treasury bills), cash, deposits and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
 - The Fund will use forward foreign exchange or currency future derivatives in order to manage the currency exposure in line with the Index. The Fund may use other types of derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**
- The Fund is passively managed as it tracks the Index.
 - Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 3.00pm. This is the time we calculate unit prices for this Fund. If you contact us after 3.00pm, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in sterling (British pounds).
 - This Fund may be suitable for investors looking for a combination of growth and income from an investment in global inflation linked bonds excluding those issued by the UK government, as represented by the Index.
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 3 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- This Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the Fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
- The Fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the Fund may fall.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- There may be differences in performance between the fund's assets and the derivatives used to manage the fluctuation of exchange rates with Sterling. This could result at times in the fund being over protected or under protected against these fluctuations
- This fund invests in inflation-linked bonds, which are particularly sensitive to changes in inflation rates. Their values are likely to fall when inflation rates fall.
- The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%*
Exit charge	0.00%*
This is the maximum that might be taken out of your money before it is invested.	
*The Fund also incurs a unit price spread. See opposite.	
Charges taken from the fund over a year	
Ongoing charge	0.25%
Charges taken from the fund under certain specific conditions	
Performance fee	None

- There are no entry or exit charges.
 - The ongoing charges figure is based on the latest available expenses at April 2020. This figure may vary from year to year.
 - This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
 - The ongoing charges are taken from the income of the Fund.
- Other costs:**
- **Unit price spread:** each day there are two prices for this Fund: a higher price you pay to buy units and a lower price you receive when you sell units. The Fund manager calculates these prices. The difference between these prices is called the 'spread'.
 - The spread is separate to the ongoing charges shown in this section.
 - This Fund's spread reflects the difference between the buying and selling prices of the assets it holds and costs associated with buying and selling the assets. The spread can change at any time and by any amount. As an example, the buying price for units in this Fund was 0.15% higher than the selling price at January 2020.
 - For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in Sterling (British Pounds).
- The Fund will not replicate the performance of the Index perfectly due to the expenses, tax and transaction costs incurred by the Fund, which are not included in the Index.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 2013.
- This unit class launched in 2013.

Legg Mason IF ClearBridge Global Infrastructure Income Fund

Class X Accumulation (Hedged)

ISIN: GB00BD3FVT86

A sub-fund of: Legg Mason Funds ICVC (the "Company")

Managed by: Legg Mason Investment Funds Limited, part of the Legg Mason group of companies.

Objectives and Investment Policy

Objective

The fund's goal is to provide income. Growth of the fund's value in the long term is a secondary goal. The fund seeks to outperform, on an average annualised basis, the OECD G7 Inflation Index by 5.5% over an investment time frame of 5 years (gross of fees).

Investment Policy

- The fund invests at least 80% of its assets in shares of global listed infrastructure companies. However the fund may hold more or less of other permitted assets in extreme market conditions.
- The fund invests in a number of infrastructure sectors such as gas, electricity and water utilities, toll roads, airports, rail and communications.
- The fund invests in shares of infrastructure companies from around the world, including up to 20% from emerging market countries.
- The fund will usually invest in a concentrated portfolio, typically 30 to 60 companies.
- The fund may also invest up to 10% in global infrastructure companies that are not presently listed on an exchange, but are expected to be listed within 12 months of purchase, and in derivatives (financial instruments whose value is derived from the value of other assets).
- The fund may invest in derivatives to help try to achieve the fund's objective as well as to reduce risk or cost or to generate additional growth or income for the fund.

Share Class Policy

- For this share class, the fund will use derivatives to help to reduce the risk of movements in exchange rates between the currencies that are significant to the fund's investment strategy and the currency of the share class (hedging). Hedging transactions can expose the share class to additional risks which may result in loss to your investment.

Benchmark: The performance target to outperform the OECD G7 Inflation Index by 5.5%, on an average annualised basis over an investment time frame of 5 years, was chosen as it sets a reasonable performance target benchmark for the fund to achieve, taking into account a number of factors such as the measure of inflation across the G7 countries. Please refer to the prospectus for further information.

Manager's Discretion: The fund is actively managed. The investment manager has discretion in selecting investments within the fund's objective and investment policies. The benchmark does not constrain the investment manager's management of the fund.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Dealing Frequency: You can buy, sell and switch your shares on each day that the London Stock Exchange is open for business.

Minimum Initial Investment: For this share class the minimum initial investment is GBP 100,000.

Treatment of Income: Income and gains from the fund's investments are not paid but instead are reflected in the fund's share price.

Risk and Reward Profile

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is in its risk/reward category because a concentrated investment (the fund holds fewer investments than many other funds) in shares of infrastructure companies from various countries and sectors have historically been subject to relatively large fluctuations in value.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Investment in company shares: The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

Investment in infrastructure: The fund invests in shares of infrastructure companies, and the value of these shares can be negatively affected by economic or regulatory occurrences affecting their industries. Investments

in new infrastructure projects carry risks where they may not be completed within the budget, agreed timeframe or specifications. Operational and supply disruptions can also have a negative effect on the value of the company's shares.

Emerging markets investment: The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries.

Concentrated fund: The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses.

Hedged class currency: The value of your investment may fall due to changes in the exchange rates between the currencies that are significant to the fund's investment strategy and the currency of your share class, pound sterling. The investment manager will try to protect the value of your investment against such changes, but it may not succeed.

Derivatives: The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

Charges from capital: The fund's fees and expenses may be taken from its capital (rather than income). This will result in an increase in income available for distribution to investors. However, this will forego some of the capital that the share class has available for future investment and potential growth.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the prospectus.

Charges

One-off charges taken before or after you invest	
Entry charge	none
Exit charge	none
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charge	0.86%
Charges taken from the fund under certain specific conditions	
Performance fee	none

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

Entry and exit charges shown are the maximum that might be taken out of your money. In some cases, you might pay less and you should speak to your financial adviser about this.

The ongoing charge is based on expenses for the 12 month period ending May 2020. This figure may vary over time.

For more information about charges, please see the 'Fees and Expenses' section in the fund's prospectus and relevant appendix.

Past Performance

The fund was launched on 1 July 2016 and the share class began issuing shares on 7 September 2016.

Past performance has been calculated in GBP.

The performance reflects all fees and charges payable by the fund but does not reflect any entry or exit charge that might be payable.

Past performance is no guide to future returns and may not be repeated.

The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

LF Miton European Opportunities Fund, Class B Accumulation, a fund within LF Miton Investment Funds 3 (ISIN: GB00BZ2K2M84)

The fund is managed by Link Fund Solutions Limited, part of the Asset Services Division of Link Administration Holdings Limited.

Objective and investment policy

Objective

To achieve a combination of income and growth.

Investment Policy

To invest at least 80% in the shares of European companies with a bias toward medium sized companies with a market capitalisation of between £2 billion and £15 billion. The fund may also invest in large and small sized companies, other funds and cash.

Essential features of the fund:

- The fund has the discretion to invest without the need to adhere to a particular benchmark.
- You can buy and sell shares in the fund on each business day.
- Income from the fund will be added to the value of your investment.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- Derivatives may be used to manage the risk profile of the fund, reduce costs or generate additional income.

Risk and reward profile

- This indicator shows how much a fund may have risen and fallen in the past, and therefore how much a fund's returns may have varied. It is a measure of a fund's volatility. As the fund has less than 5 years price history, this calculation incorporates the volatility of an appropriate benchmark index. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 6 because the volatility has been measured as above average to high, based on the calculation methodology noted above.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time.

- Currency Risk: As the fund invests in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Liquidity Risk: Smaller companies' securities are often traded less frequently than those of larger companies which means they may be more difficult to buy and sell. Their prices may also be subject to significant short term swings (both up and down).
- Counterparty Risk: As the fund may enter into currency hedging arrangements there is a risk that other parties may fail to meet their obligations. This may lead to delays in receiving amounts due to the fund receiving less than is due or receiving nothing.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

Charges for this Fund

LIONTRUST

SPECIAL SITUATIONS FUND

KEY INVESTOR
INFORMATION
DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Special Situations Fund is an Authorised Unit Trust and categorised as a UCITS scheme. This document is based upon Institutional class units (I Inc Class) (ISIN: GB00B57H4F11). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- The Fund aims to deliver capital growth over the long term (5 years or more).

Policy

- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund will invest at least 90% of its assets in companies which are incorporated, domiciled or conduct significant business in the United Kingdom (UK).
- The Fund will typically invest 90% (minimum 80%) of its assets in equities or equity related derivatives but may also invest in collective investment schemes (up to 10% of Fund assets), corporate debt securities, other transferable securities, money market instruments, warrants, cash and deposits.
- The Fund is permitted to use derivatives for the purposes of efficient portfolio management and for investment purposes. Please refer to the Derivatives sections in the prospectus for further details.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell units on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk.

Investment process

- A fundamental principle of competitive markets is that profits regress to the mean. The fund managers believe the secret to successful investing is to identify those few companies that have a durable Economic Advantage which allows them to defy this principle and sustain a higher than average level of profitability for longer than expected.
- Economic Advantage is the collection of distinctive characteristics of a company that competitors struggle to reproduce even if those competitors have understood the benefits arising from those characteristics. In the fund managers' experience, the hardest to replicate characteristics fall into the following three categories of intangible assets:
 - Intellectual property
 - Strong distribution channels
 - Significant recurring business
- Other less powerful but nonetheless important intangible strengths include: franchises and licenses; good customer databases and relationships; effective procedures and formats; strong brands and company culture. These intangible assets produce barriers to competition, protect margins and are capable, in the opinion of the fund managers, of reaping a financial advantage in the form of cash flow returns in excess of the cost of capital. The market rewards excess profitability, particularly when it is higher than consensus expectations.
- To be included in portfolios, companies must possess at least one of the main advantages: intellectual property, strong distribution or recurring business (at least 70% of annual turnover).
- Every smaller company held in the Economic Advantage funds has at least 3% of its equity held by senior management. Companies are also assessed for employee ownership below the board and changes in equity ownership are monitored.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 5 for its exposure to UK companies.
- The SRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - any company which has high overseas earnings may carry a higher currency risk;
- The Fund may encounter liquidity constraints from time to time. In addition the spread between the price you buy and sell units will reflect the less liquid nature of the underlying holdings.
- The Fund may invest in companies listed on the Alternative Investment Market (AIM) which is primarily for emerging or smaller companies. The rules are less demanding than those of the official List of the London Stock Exchange and therefore companies listed on AIM may carry a greater risk than a company with a full listing.
- The Fund may, under certain circumstances, make use of derivative instruments but it is not intended that their use will materially affect volatility.
- Counterparty risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

Fund Name	Global Technology Fund , a sub-fund of Polar Capital Funds plc
Share Class	Class I Sterling Share Class
ISIN	IE00B42W4J83

Objectives and investment policy

Objectives

The objective of the Fund is to achieve long term capital appreciation by way of investing in a globally diversified portfolio of technology companies.

Investment policy

At least two-thirds of the Fund's assets are invested in technology-related companies. These may include computer software and equipment, internet software and systems, electronic technology and other technology-related companies.

The Fund may have significant exposure to companies in the USA and Canada.

The Fund may invest in financial derivatives (complex instruments based upon the value of underlying assets) for hedging, to reduce risk, to manage the Fund more efficiently, or to gain exposure to securities in a more efficient way.

The Fund may invest in emerging markets (developing countries).

The Fund is actively managed and uses the Dow Jones Global

Technology Net Total Return Index (GBP) benchmark for performance comparison purposes and to calculate the performance fee.

Any income which the Fund generates may be paid out in the form of an annual dividend at the sole discretion of the Directors.

You may sell your shares on days which banks are normally open for business in Dublin and London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

Why is this fund in category 6?

The Fund has a high risk rating because it invests in equities, the value of which can move up and down over time to a greater extent than some other investments.

In addition to the risk captured by the indicator, the overall fund value may be considerably affected by:

Strategy Risk - investments in technology companies may be subject to greater price fluctuations than investments in other sectors. Rapid changes in technology and/or government regulation of use in certain countries may affect the value of the Fund's investments. The Fund may be less diversified than other investment funds.

Investment Risk - the Fund invests in equities globally, share prices can rise or fall due to a number of factors affecting global stock markets.

Derivative Risk - certain derivatives may result in gains or losses that are greater than the original amount invested. Derivatives also involve counterparty risk, which is the risk that a counterparty to the derivative contract cannot meet its contractual obligations.

Currency Risk - the Fund invests in assets denominated in currencies other than the Fund's base currency. Changes in exchange rates may have a negative impact on the Fund's investments.

Emerging Markets Risk - emerging market countries face more political, economic or structural challenges than developed countries. Investments in such countries may offer higher potential for gains or losses, and markets may be less liquid.

What do these numbers mean?

The risk indicator was calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. A category 1 fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a category 7 fund, the risk of losing your money is high but there is also a chance of making high gains. The numerical scale is complex, for example, 2 is not twice as risky as 1.

Charges

One-off charges taken before or after you invest

Entry charge	Up to 5.00%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charge	1.13%
----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	10.00% a year of any returns the Fund achieves above the benchmark for these fees, the Dow Jones Global Technology Net Total Return Index. No performance fee was charged during 2019.
-----------------	--

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The **entry** and **exit charges** shown are maximum figures. In some cases you might pay less. You can find this out from your financial adviser or distributor.

The ongoing charges figure shown here is an estimate of the charges. The Fund's annual report for each financial year will include detail on the exact charges made.

You can find out more details about the charges by looking at the "**Fees and Expenses**" section of the Fund's prospectus, which is available at www.polarcapital.co.uk.

Past performance

Past performance is not a reliable indicator of future performance.

The past performance shown does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the "**Charges**" section.

The performance of this class is calculated in British Pounds.

The Fund launched on 19 October 2001. This class started to issue shares on 4 September 2009.

Practical information

Rathbone High Quality Bond Fund (I-class)

Fund Manager: Rathbone Unit Trust Management Limited

Accumulation shares ISIN: GB00BD5DN500

Income shares ISIN: GB00BD5DN492

Objectives and investment policy

We aim to preserve your capital and pay an income by delivering a greater total return than the Bank of England's Base Rate + 0.5%, after fees, over any rolling three-year period. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (interest payments). We use the Bank of England's Base Rate + 0.5% as a target for our fund's return because we aim to provide a return in excess of what you would receive in a UK savings account.

This is an investment product, not a cash savings account. Your capital is at risk.

We will invest at least 80% of our fund in government and corporate bonds with high credit ratings. We define a high credit rating as A- and above, based on the average of the three largest rating agencies (Standard & Poor's, Moody's and Fitch). We can invest up to 20% of our fund in a mixture of investment grade government and corporate bonds with lower credit ratings (BBB+ to BBB-) or no rating at all. Up to 10% of the fund can be invested directly in contingent convertible bonds. These specialist bonds, typically issued by banks and insurers, are forcibly replaced with shares if the issuer experiences heavy losses. If a bond's rating falls below BBB-, otherwise known as high yield, we will sell it within six months.

At least 80% of the portfolio will be invested in sterling bonds or in overseas assets whose value we have hedged back to sterling. Hedging means we buy a financial instrument to swap the value of these assets into sterling to protect our investment from changes in the price of foreign currencies.

We actively manage our fund, which means we can choose what we invest in as long as it's in line with the investment objective and policy. Because of this, our fund's performance can diverge significantly from its benchmark over shorter periods of time and therefore isn't appropriate for investors who plan to withdraw their money within three years.

Our fund is designed for investors with a basic knowledge of bonds who seek to protect their capital and receive income. You should intend to invest for longer than three years, understand the risks of our fund and have the ability to bear a capital loss.

You can buy and sell shares on each business day of the fund between 9am and 5pm.

The fund offers accumulation shares (shares in which any income payable by the fund is reinvested) and income shares (shares in which any income received in the fund will be paid to the shareholder).

Risk and reward profile

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

The risk indicator for this fund reflects the following:

– As an asset class, bonds have greater risk than money market instruments, but less risk than shares.

– As this fund is less than five years old, the indicator is not based solely on actual performance.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your shares.

During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

Counterparty risk: A company that we deal with may renege on its obligations, costing you money.

Currency risk: We own assets valued in a currency other than sterling. Changes in the price of foreign currencies can result in gains or losses, even if underlying asset prices stay the same.

Credit risk: Bonds that we own can become more or less creditworthy and will fluctuate in value resulting in gains or losses. Bonds that we own may fail to meet their legal obligations, such as missing an interest payment. This is known as a 'default' and will result in a loss.

Liquidity risk: Some assets become hard to sell at their expected price. This could mean we have to sell assets below their expected price resulting in a loss. In extreme circumstances, we may suspend the fund to protect your investment, resulting in you being unable to access your money.

Management risk: People make the investment decisions for our fund. If they make unfavourable decisions, you could lose money.

Operational risk: We rely on complex systems to ensure that trades are completed, our fund's assets are accounted for and that you can buy or sell our fund. If our systems fail, you could be inconvenienced or lose money.

Interest rate risk: Most bonds pay us a fixed amount over an agreed period of time. If interest rates rise these bonds become less valuable and we may be locked into an unfavourable investment. If interest rates fall these bonds become more valuable.

Charges for this fund

The fund manager receives an annual fee, which is included in the ongoing charges shown below. You may be eligible for lower entry charges than the maximum shown; ask your financial adviser. Ongoing charges are the same for all investors in the same class. The ongoing charges figure has been capped at launch.

One-off charges taken before or after you invest:

Entry charge	none
Exit charge	none

Charges taken from the fund over a year:

Ongoing charges	0.47% (Acc shares); 0.48% (Inc shares)

Royal London Cash Plus Fund (Accumulation - Class Y Shares)

A sub-fund of Royal London Bond Funds ICVC ISIN: GB00BMNR1H58
Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective The Fund's investment objective is to achieve a total return over rolling 12-month periods by mainly investing in cash and cash equivalents and government securities.

The Fund's performance target is to outperform, before the deduction of charges, the Bank of England Sterling Overnight Interbank Average (SONIA) by 0.50% per annum over rolling 12-month periods.

Policy A minimum of 50% of the Fund will be invested in a combination of money market instrument, including cash, time deposits, certificates of deposit and commercial paper and floating rate notes. Government bonds are also included in this segment of the Fund. In exceptional circumstances the Fund may invest up to 100% in money market instruments.

The Fund will also invest in a range of securities, including corporate bonds and supranational & agency bonds, asset backed securities and/or transferable securities. The Fund may also make use of reverse repurchase agreements. The Fund may also hold a small amount of its portfolio in derivatives.

Money market instruments used by the Fund will have a minimum rating of A-1, P-1 or F1. Bonds must have a minimum rating of AA-, Aa3 or AA-. Assets may exceed 397 days to maturity. There are no weighted average maturity or weighted average life constraints on the Fund.

The Fund's holdings are also subject to predefined ethical criteria. The Fund's manager will not consider the bonds or other securities of companies or other organisations that generate more than 10% of their turnover from either one or a combination of the following: Armaments, Tobacco or Fossil Fuels.

Full details of the Fund's ethical criteria are available on request and can be found on our website.

Recommendation Investors who seek income or a short-term investment option.

Concepts to understand

Bonds Securities that represent an obligation to repay a debt, with interest. Investment grade bonds are high quality bonds that are viewed as being highly likely to make all scheduled payments of interest and principal. Low quality bonds carry higher risk but also typically pay higher rates of interest.

Derivative A financial instrument whose price is dependent upon or derived from one or more underlying asset.

Efficient Portfolio Management An investment technique that allows the use of derivatives for at least one of the following purposes: to increase the value of the Fund; to protect the value of the Fund or to reduce the risks of certain investments.

Money market instruments Investments that pay interest, have a short duration and are designed to maintain a stable value.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

The fund is shown in risk category 1 because its share price has shown a very low level of volatility historically. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Counterparty Risk Market counterparties could become unable to make interest payments or repay debt. As such the value of the Fund will fall in the event of a counterparty default. In general investments that pay a higher level of income usually reflect a lower counterparty credit rating because of the increased risk of default.

Interest Rate Risk Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

For more about fund risks, see the "Risk Factors" section in the Prospectus (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/)

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:

Entry charge None

Exit charge None

Charges taken from the fund over a year:

Ongoing charge 0.15%

Charges taken from the fund under specific conditions:

Performance fee None

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

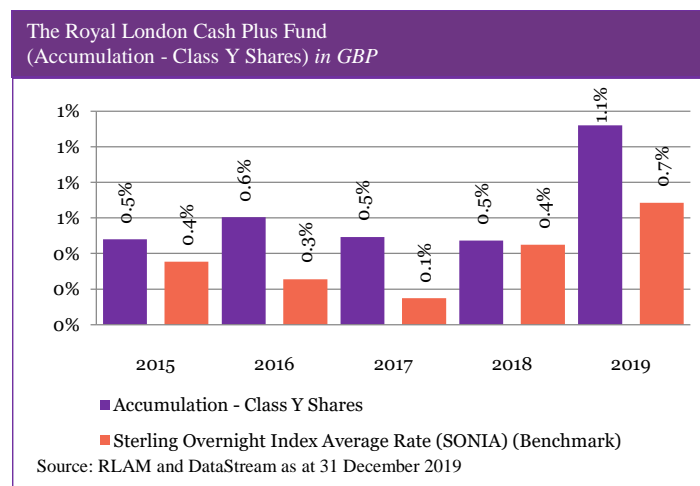

Ongoing charge is based on the Fund Management Fee (FMF), which is the periodic fee paid to the ACD to cover the expenses of the Fund. This figure does not include portfolio transaction costs. Ongoing charges are the same for all investors in the share class.

For more about charges, see the expenses section in the full Prospectus and supplement (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/)

Past performance

The graph shows fund performance over the past 5 years where available. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.

The Fund was launched on 15 June 2011 and the share class on 12 June 2014.

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance.

Royal London Sustainable Managed Income Trust (Accumulation - Class C Shares)

ISIN: GB00B8HNKY10
Managed by RLUM Limited

Objectives and investment policy

Objective The Fund's investment objective is to achieve an income over a 12-month period that consistently exceeds typical cash deposit rates (measured by SONIA), paid out on a monthly basis, by predominantly investing in sterling-denominated bonds that are deemed to make a positive contribution to society.

Investments in the Fund will adhere to the Manager's ethical and sustainable investment policy.

The Fund is actively managed.

Policy Typically, 80% of the Fund's assets will be invested in a diversified portfolio of sterling-denominated bonds or bonds hedged back to sterling (there is no formal restriction).

The remainder of the Fund's assets may be invested in a range of securities, including government bonds, index-linked bonds, securitisations, supranational bonds, agency bonds, preference shares, floating-rate notes, asset-backed securities and bonds denominated in currencies other than sterling.

The Fund focuses on the sustainability of the products and services of the companies it invests in, as well as their standards of environmental, social & governance (ESG) management, alongside financial analysis. For further details of the Manager's ethical and sustainable investment policy please refer to the Prospectus. Investors can view the current policy at <https://www.royallondon.com/existing-customers/yourproducts/manage-your-isa-or-unit-trust/rlum-isa-overview/>.

The Fund may invest up to 10% in other investment funds, known as collective investment schemes. Typically only a small portion of assets will be invested in cash.

The Fund may also invest a small amount of its portfolio in derivatives (investments that derive their value from another closely related underlying investment) for investment purposes and efficient portfolio management (EPM).

For more information on investment terms used in this document please refer to the glossary on our website:

<https://www.rlam.co.uk/Home/Intermediaries/Supplementary-links/Glossary/>.

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within five years. You should aim to keep your units for at least five years, although you can sell them at any time.

Concepts to understand

Income Income is defined as the payment an investment generates, such as dividends or bond coupons.

Bonds are defined as fixed-income investments issued as debt by companies and public bodies to raise finance. Investors in bonds receive a previously agreed, non-variable interest payment until the investment matures. Corporate bonds are those issued by companies to raise finance.

Environmental, social and governance A list of predefined criteria that determines how a company operates in terms of sustainability and overall corporate governance.

Efficient Portfolio Management A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

Typically lower rewards

Typically higher rewards

The fund is shown in risk category 3 because its unit price has shown a medium to low level of volatility historically. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments.

This Fund invests in bonds but doesn't invest in shares.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe. The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Concentration Risk Funds which invest in a smaller number of securities can carry more risk than funds spread across a larger number of companies. To the extent that the Fund has exposure to an issuer, geographical area or type of security that is heavily affected by an event, either positive or negative, its value may rise or fall.

Credit Risk Issuers of certain fixed income securities could become unable to make income or capital payments on their debt. As such the value of a security will fall in the event of a rating downgrade or default of the issuer. In general fixed income securities that pay a higher level of income usually have a lower credit rating because of the increased risk of default.

Interest Rate Risk Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Liquidity Risk In difficult market conditions the value of certain fund investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.

Derivative Risk Investing in derivatives, including commodity derivatives, carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the Fund being leveraged (where economic exposure, and thus the potential for loss by the Fund exceeds the amount it has invested) and in these market conditions leverage may magnify losses.

For full details of the Fund's risks, please see the prospectus which may be obtained from (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/)

Vanguard Global Credit Bond Fund (the "Fund")

A sub-fund of Vanguard Investment Series Plc

Investor "GBP" Hedged Accumulation Shares ISIN: IE00BYV1RG46

Manager: Vanguard Group (Ireland) Limited ("VGIL")

Objectives and investment policy

- The Fund seeks to provide a moderate and sustainable level of current income by investing in a diversified portfolio of global credit bonds.
- The Fund employs an "active management" strategy, and while the Fund will invest substantially in components of the Bloomberg Barclays Global Aggregate Credit Index, its investment manager will follow distinct approaches in managing the Fund's assets.
- The Fund invests in investment grade global credit bonds, primarily made up of corporate and non-corporate obligations with a rating of the equivalent of Baa3 and above by Moody's or another independent rating agency or, if unrated, are determined to be of comparable quality by the Fund's investment manager.
- The Fund may use derivatives, including for investment purposes, in order to reduce risk or cost and/or generate extra income or growth. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The Investment Manager may in its discretion restrict the extent to which the Fund's holdings deviate from the Index constituents on a security selection and fixed income sector basis. The Fund may take active fixed income sector views with the focus on bond specific selection. The extent to which the Fund can outperform the Index may be restricted by constraints applied by the Investment Manager which limit the potential volatility of the difference between the return of the Fund and the return of the Index. Such constraints may change or be removed from time to time at the Investment Manager's discretion and depending on market environments.
- The currency of the share class is GBP.
- The Fund invests in securities which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments. Currency hedging techniques are used to minimise the risks associated with movements in currency exchange rates but these risks cannot be eliminated entirely. As this document relates to a share class where such techniques are used, for the purposes of the "Past performance" section below, the performance of this share class is shown against the Bloomberg Barclays Global Aggregate Credit Index in GBP (the "Hedged Index"), which is a currency hedged version of the Index.
- The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- The Fund may not be appropriate for short-term investment.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in the prospectus) by submitting an application in writing. A full list of the days on which shares in the Fund cannot be sold is available on <https://global.vanguard.com/portal/site/loadPDF?country=global&docId=11630>

Risk and reward profile

- | | | | | | | |
|---|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
|---|---|---|---|---|---|---|
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
 - The risk category shown is not guaranteed and may change over time.
 - The lowest category does not mean "risk free".
 - The Fund is rated 4 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of bonds and fixed income-related securities is affected by influential factors such as interest rates, inflation, credit spreads and volatility which, in turn, are driven by other factors including political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment. Currency hedging may be used but is not guaranteed to completely eliminate currency risk.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.
