Fidelity Index Emerging Markets Fund

a sub-fund of Fidelity Investment Funds

P Accumulation Shares (ISIN: GB00BHZK8D21)

This fund is managed by FIL Investment Services (UK) Limited

Objectives and Investment Policy

- The fund aims to track the performance (before fees and expenses are applied) of the MSCI Emerging Markets (Net Total Return) Index, thereby seeking to increase the value of your investment over 5 years or more.
- The fund uses an index tracking (passive) investment approach whereby it aims to replicate the composition of the index. However, for practical reasons and/or to reduce the dealing costs of the fund, it may not invest in every company share in the index or at its weighting within the index.
- As well as investing directly in company shares, the fund will achieve exposure indirectly using derivatives, such as exchange traded index futures, for example at the time of cash inflows to remain fully invested or to reduce transaction costs.
- Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment.
- To manage the cash position, the fund may invest in other investment types such as liquidity funds (including those managed by Fidelity).
- Income earned by the fund is paid into the fund and reflected by an increase in the value of each share.
- Shares can usually be bought and sold each business day of the fund.
- Note: The funds described herein are indexed to an MSCI index. The MSCI Emerging Markets Index captures large and mid cap representation across Emerging Markets countries. The funds or securities referred to herein are not sponsored, endorsed, or promoted by MSCI, and MSCI bears no liability with respect to any such funds or securities or any index on which the funds or securities are based. The Prospectus contains a more detailed description of the limited relationship MSCI has with Fidelity and any related funds.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
- Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.
- Fidelity International's partial swing pricing policy can cause differences in the fund's performance versus the index.
- A fund's performance tracking may be affected if the times at which a fund and its benchmark index are priced are different. The fund is priced at midday UK time, and the index is priced when the relevant stock markets close. This can cause apparent differences in the fund's performance versus that of the index than if the fund and the index were priced at the same time.

American Index Fund

a sub-fund of HSBC Index Tracker Investment Funds, (the "OEIC");
managed by HSBC Global Asset Management (UK) Limited

Class: Accumulation C
ISIN: GB00B80QG615

Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on our website: <http://www.assetmanagement.hsbc.com>.

Objectives and Investment Policy

- The Fund aims to provide **growth** over the long term, which is a period of 5 years or more, by tracking the performance of the S&P 500 Index (the "Index").
 - The Index is made up of the 500 largest stock market listed companies in the United States of America, as defined by the Index provider.
 - The Fund will invest directly in shares (**equities**) of all of the companies that make up the Index and in the same or very similar proportions in which they are included in the Index.
 - However, there may be circumstances when it is not possible or practical for the Fund to invest in shares of all the companies of the Index. The Fund may not invest in all the companies of the Index to manage transaction costs or to reflect market conditions, regulations or HSBC's banned weapons policy.
 - The Fund may hold cash and other funds, including funds managed by the **HSBC Group**, to manage day-to-day cash flow requirements.
 - The anticipated **tracking error** for the Fund is expected to be up to 0.20%.
- Use of derivatives**
- The Fund may invest in different types of **derivatives** for **efficient portfolio management**, including **hedging**. In particular the Fund may use **derivatives** to help it manage cash flows and dividend payments with the aim of generating **returns** that are consistent with the Index. The use of **derivatives** will be consistent with the risk profile of the Fund.
 - Income is reinvested.
 - You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
 - Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 5 because its price or simulated data has shown medium to high fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly

reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

- Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- Index Tracking Risk** To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

Charges

iShares 100 UK Equity Index Fund (UK)

A sub-fund of BlackRock Collective Investment Funds

Class D Accumulating GBP

ISIN: GB00B7W4GQ69

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) by tracking closely the performance of the FTSE 100 Index, the Fund's benchmark index.
- ▶ The Fund invests in equity securities (e.g. shares) of companies that make up the benchmark index.
- ▶ The benchmark index measures the performance of equity securities of the largest 100 companies listed in the United Kingdom. The benchmark index is a free float-adjusted market capitalisation weighted index. Free float-adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the benchmark index. Free float-adjusted market capitalisation is the share price of a company multiplied by the number of shares readily available in the market.
- ▶ The Fund is passively managed and the investment manager has limited discretion to select the Fund's investments and in doing so will take into consideration the benchmark index.
- ▶ The Fund intends to replicate the benchmark index by holding the equity securities, which make up the benchmark index, in similar proportions to the benchmark index.
- ▶ The Fund may also engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
 - ▶ The risk category shown is not guaranteed and may change over time.
 - ▶ The lowest category does not mean risk free.
 - ▶ The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.

- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 26 June 2020. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

Practical Information

- ▶ The trustee and depositary of the Fund is The Bank of New York Mellon (International) Limited, which also acts as custodian.
- ▶ Further information about the Fund can be obtained from the latest annual report and half-yearly reports of the BlackRock Collective Investment Funds (BCIF). These documents are available free of charge in English. These can be found, along with other information, such as unit prices, on the BlackRock website at www.blackrock.com, on the iShares website at www.ishares.com or by calling Investor Services on 0800 44 55 22.
- ▶ Investors should note that the tax legislation that applies to the Fund may have an impact on the personal tax position of your investment in the Fund.
- ▶ The Fund is a sub-fund of BCIF, an umbrella structure comprising different sub-funds. This document is specific to the Fund and unit class stated at the beginning of this document. However, the prospectus, annual and half-yearly reports are prepared for the umbrella.
- ▶ BlackRock Fund Managers Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Fund's prospectus.
- ▶ The assets of the Fund are held on trust for its unitholders under English trust law which means that its assets cannot be used to discharge the liabilities of other sub-funds within BCIF. In addition, the Fund's assets are held separately from the assets of other sub-funds.
- ▶ Investors may switch their units in the Fund for units in another sub-fund within BCIF, subject to meeting certain conditions as set out in the prospectus.
- ▶ The Remuneration Policy of the Management Company, which describes how remuneration and benefits are determined and awarded, and the associated governance arrangements, is available at www.blackrock.com/Remunerationpolicy or on request from the registered office of the Management Company.

iShares Corporate Bond Index Fund (UK)

A sub-fund of BlackRock Collective Investment Funds

Class D Accumulating GBP

ISIN: GB00B84DSW83

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets) by tracking closely the performance of the Markit iBoxx GBP Non-Gilts Overall TR Index, the Fund's benchmark index.
- ▶ The Fund is passively managed and the investment manager has limited discretion to select the Fund's investments and in doing so may take into consideration the benchmark index. The Fund invests in fixed income securities (such as bonds) that make up the benchmark index and, at the time of purchase, comply with the credit rating requirements of the benchmark index.
- ▶ The benchmark index measures the performance of fixed income securities denominated in Sterling issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) but excludes gilts (i.e. bonds) issued by the UK government. These may include fixed income securities which pay income according to a fixed rate of interest and will be investment grade (i.e. meet a specified level of credit worthiness) at the time of inclusion in the benchmark index.
- ▶ The Fund uses techniques to achieve a similar return to its benchmark index. These techniques may include the strategic selection of certain securities that make up the benchmark index or other fixed income securities which provide similar performance to certain constituent securities. They may also include the use of derivatives (i.e. investments the prices of which are based on one or more underlying assets).
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due. If a financial institution is unable to meet its financial obligations, its financial assets may be subject to a write down in value or converted (i.e. "bail-in") by relevant authorities to rescue the institution.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 26 June 2020. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

Legal & General Global Inflation Linked Bond Index Fund Class I Accumulation - ISIN: GB00BBHXNN27

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited.

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to provide a combination of growth and income by tracking the Barclays World Government Ex UK Inflation Linked Bonds Hedged GBP Index, the "Index". This objective is after the deduction of charges and taxation.
 - The Fund seeks to replicate as closely as possible the constituents of the Index. The Fund will have at least 90% exposure to assets that are included in the Index.
 - The Index is comprised of bonds (a type of loan which pays interest) issued by governments across all geographical areas (excluding the UK) which are denominated in the local currency of the country and which are linked to the rate of inflation in the country.
 - The Fund may invest in sub-investment grade bonds. The bonds that the Fund invests in will be a mixture of investment grade bonds (rated as lower risk) and sub-investment grade bonds (rated as higher risk). The mix will closely match that of the Index. Investment and sub-investment grade bonds are bonds that have been given a credit rating by a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
 - The Fund may also invest in bonds which are reasonably expected to become part of the Index in the near future or are an alternative to a constituent of the Index, money market instruments (such as treasury bills), cash, deposits and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
 - The Fund will use forward foreign exchange or currency future derivatives in order to manage the currency exposure in line with the Index. The Fund may use other types of derivatives (contracts which have a value linked to the price of another asset) to: • reduce risk or cost; or • generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**
- The Fund is passively managed as it tracks the Index.
 - Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 3.00pm. This is the time we calculate unit prices for this Fund. If you contact us after 3.00pm, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in sterling (British pounds).
 - This Fund may be suitable for investors looking for a combination of growth and income from an investment in global inflation linked bonds excluding those issued by the UK government, as represented by the Index.
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

Lower risk ← → Higher risk
Potentially lower rewards Potentially higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
 - The Fund is in category 3 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.
 - Even a fund in the lowest category is not a risk free investment.
 - The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.
 - Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.
- The risk and reward indicator may not take account of the following risks of investing in the Fund:
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
 - This Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the Fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
 - The Fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the Fund may fall.
 - Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
 - Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
 - There may be differences in performance between the fund's assets and the derivatives used to manage the fluctuation of exchange rates with Sterling. This could result at times in the fund being over protected or under protected against these fluctuations.
 - This fund invests in inflation-linked bonds, which are particularly sensitive to changes in inflation rates. Their values are likely to fall when inflation rates fall.
 - The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%*
Exit charge	0.00%*
This is the maximum that might be taken out of your money before it is invested.	
*The Fund also incurs a unit price spread. See opposite.	
Charges taken from the fund over a year	
Ongoing charge	0.25%
Charges taken from the fund under certain specific conditions	
Performance fee	None

- There are no entry or exit charges.
 - The ongoing charges figure is based on the latest available expenses at April 2020. This figure may vary from year to year.
 - This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
 - The ongoing charges are taken from the income of the Fund.
- Other costs:**
- **Unit price spread:** each day there are two prices for this Fund: a higher price you pay to buy units and a lower price you receive when you sell units. The Fund manager calculates these prices. The difference between these prices is called the 'spread'.
 - The spread is separate to the ongoing charges shown in this section.
 - This Fund's spread reflects the difference between the buying and selling prices of the assets it holds and costs associated with buying and selling the assets. The spread can change at any time and by any amount. As an example, the buying price for units in this Fund was 0.15% higher than the selling price at January 2020.
 - For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in Sterling (British Pounds).
- The Fund will not replicate the performance of the Index perfectly due to the expenses, tax and transaction costs incurred by the Fund, which are not included in the Index.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 2013.
- This unit class launched in 2013.

Royal London Short-Term Money Market Fund (Accumulation - Class Y Shares)

A sub-fund of Royal London Bond Funds ICVC ISIN: GB00B8XYYQ86
Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective The Fund's investment objective is to preserve capital and provide an income over rolling 12-month periods by investing at least 80% in cash and cash equivalents.

The Fund's performance target is to outperform, after the deduction of charges, the Bank of England Sterling Overnight Interbank Average (SONIA) over rolling 12-month periods. For further information please refer to the Prospectus.

Policy At least 80% of the Fund will be invested in eligible instruments as permitted by the Money Market Funds Regulation. These will include cash, time deposits, certificates of deposit, commercial paper, floating-rate notes, and short-dated government bonds.

The Fund may also make use of reverse repurchase agreements. The Fund may also hold a small amount of the portfolio in derivatives (investments that derive their value from another closely related underlying investment) for the purposes of efficient portfolio management.

Money market instruments will have a minimum rating of A-1, P-1 or F1 or long-term equivalent. Held assets will have 397 days or less to maturity. The weighted average maturity of the Fund will not exceed 60 days and the weighted average life will not exceed 120 days.

The Fund's holdings are also subject to predefined ethical criteria, which are reviewed on a quarterly basis. The Fund will not invest in the bonds or other securities of companies or other organisations that generate more than 10% of their turnover from either one or a combination of the following:

- 1) Armaments – The manufacture of armaments, nuclear weapons or associated strategic products
 - 2) Tobacco – The growing, processing or selling of tobacco products
- Full details of the Fund's ethical criteria are available on request and can be found on our website. For more information on investment terms used in this document please refer to the glossary on our website: <https://www.rlam.co.uk/Home/Intermediaries/Supplementary-links/Glossary/>.

Recommendation Investors who seek current income, protection of capital (but not guaranteed) or a short-term investment option.

Concepts to understand

Money market instruments Money-market instruments are short-term, liquid investments issued by public institutions or companies.

Rolling 12 month Period A rolling 12 month period is any period of twelve months, no matter which day you start on.

Reverse repurchase agreements Agreeing to sell a purchased security at a specified later date.

Efficient Portfolio Management A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

Ratings Credit-rating agencies rate bonds based on the likelihood of them defaulting and being unable to repay their debt.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

Typically lower rewards

Typically higher rewards

The fund is shown in risk category 1 because its share price has shown a very low level of volatility historically. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. As an investment, money market instruments are typically less volatile than bonds and shares.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Counterparty Risk Market counterparties could become unable to make interest payments or repay debt. As such the value of the Fund will fall in the event of a counterparty default. In general investments that pay a higher level of income usually reflect a lower counterparty credit rating because of the increased risk of default.

Interest Rate Risk Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Liquidity Risk In difficult market conditions the value of certain fund investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:

Entry charge	None
--------------	------

Exit charge	None
-------------	------

Charges taken from the fund over a year:

Ongoing charge	0.10%
----------------	-------

Charges taken from the fund under specific conditions:

Performance fee	None
-----------------	------

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Ongoing charge is based on the Fund Management Fee (FMF), which is the periodic fee paid to the ACD to cover the expenses of the Fund. This figure does not include portfolio transaction costs. Ongoing charges are the same for all investors in the share class.

For more about charges, see the expenses section in the full Prospectus and supplement (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/)

Past performance

The graph shows fund performance over the past 10 years where available. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.

The Fund was launched on 22 July 1999 as a unit trust and converted to an open-ended investment company (OEIC) on 30 April 2010. The share class was launched on 26 November 2012.

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested. The chart shows performance in British pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance.

Vanguard FTSE U.K. Equity Income Index Fund (the "Fund")

A sub-fund of Vanguard® Investments Funds ICVC

GBP Acc

ISIN: GB00B59G4H82

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

Objectives and investment policy

- The Fund seeks to track the performance of the FTSE U.K. Equity Income Index (the "Index").
- The Fund is a passive fund.
- The Index consists of common shares of companies listed on the London Stock Exchange's main market, that are expected to pay dividends that generally are higher than average.
- The Fund attempts to:
 1. Track the performance of the Index by investing in all constituent shares of the Index in the same proportion as the Index.
 2. Remain fully invested except in extraordinary market, political or similar conditions.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The currency of the share class is GBP.
- The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- The Fund may not be appropriate for short-term investment.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the prospectus) by submitting an application in writing or by telephone. A full list of the days on which shares in the Fund cannot be sold is available on <https://global.vanguard.com/portal/site/loadPDF?country=global&docId=11627>

For further information about the objectives and investment policy of the Fund, and Vanguard's limited relationship with the Index provider, please see Appendix 1 and the "Disclaimers" section of the Vanguard Investments Funds ICVC prospectus (the "prospectus") on our website at <https://global.vanguard.com>

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 6 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.

For further information on risks please see the "Risk Factors" section of the prospectus on our website at <https://global.vanguard.com>

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. Any charges to the investor will be taken from capital, not income. This may increase the level of income paid but will result in capital erosion and will constrain growth.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	0.14%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures and in some cases you might pay less. Investors can find out the actual entry and exit charges from their financial adviser.

The ongoing charges figure is based on expenses for the year ended 31 December 2019. This figure may vary from year to year. It excludes portfolio transaction costs.

For further information about charges please see the sections entitled "Buying Shares", "Redeeming Shares", "Charges and Expenses", "Dilution Adjustment" and Appendix 1 of the prospectus on our website at <https://global.vanguard.com>

Past performance

• Past performance:

1. **Is not a reliable indication of future performance.**
 2. Includes ongoing charges and the reinvestment of income. It excludes entry and exit fees.
 3. Has been calculated in GBP.
- Shares in the Fund were first issued in 2009. This share class was launched in 2009.

Practical information

- **Depository:** The Vanguard Investments Funds ICVC ("VIF") depository is State Street Trustees Limited.
- **Documents, prices of shares and further information:** You can obtain copies of the prospectus and the latest annual and semi-annual report and accounts for VIF, along with the latest published prices of shares and other information on the Fund, from our website at <https://global.vanguard.com>.
- **Sub-funds:** VIF is an umbrella fund with segregated liability between sub-funds. This means that the assets of the Fund are maintained separately under law from the assets of the other sub-funds of VIF, and each sub-fund is insulated from any liabilities or claims associated with the other sub-funds.
- **Prices:** The last published prices of units in the Fund are also available from the FT's website www.ft.com or <https://global.vanguard.com>
- **Shares:** The Fund is part of VIF and has both accumulation and income shares. You may switch some or all of your shares of one type, to shares of another type within the same Fund, or between other funds of VIF. An entry charge may apply. Details of switching are provided in the prospectus.
- **Tax:** UK tax legislation may have an impact on your personal tax position. You are recommended to consult your professional tax adviser.
- **Liability:** VIUK may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for this Fund.
- **Remuneration policy:** Details of the Vanguard European Remuneration Policy are available at <https://global.vanguard.com/portal/site/portal/ucits-investment-information> including: (a) a description of how remuneration and benefits are calculated; and (b) the identities of persons responsible for awarding remuneration and benefits, including the composition of Vanguard's European Remuneration Committee. Vanguard U.K. Government Bond Index Fund (the "Fund")

A sub-fund of Vanguard Investment Series Plc

GBP Acc

ISIN: IE00B1S75374

Manager: Vanguard Group (Ireland) Limited ("VGIL")

Objectives and investment policy

- The Fund employs a passive management – or indexing – investment approach and seeks to track the performance of the Bloomberg Barclays U.K. Government Float Adjusted Bond Index (the "Index").
- The Index includes UK government bonds denominated in UK pounds sterling with maturities greater than one year.
- The Index is a market-weighted index designed to reflect the total universe of pound sterling denominated United Kingdom treasury and government-related securities with maturities greater than one year.
- The Fund attempts to:
 - Track the performance of the Index by investing in a portfolio of securities that, insofar as possible and practicable, consists of a representative sample of the component securities of the Index.
 - Remain fully invested except in extraordinary market, political or similar conditions.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The currency of the share class is GBP.
- The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- The Fund may not be appropriate for short-term investment.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the prospectus) by submitting an application in writing. A full list of the days on which shares in the Fund cannot be sold is available on <https://global.vanguard.com/portal/site/loadPDF?country=global&docId=11630>

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 4 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of bonds and fixed income-related securities is affected by influential factors such as interest rates, inflation, credit spreads and volatility which, in turn, are driven by other factors including political, economic news, company earnings and significant corporate events.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.

For further information on risks please see the "Risk Factors" section of the prospectus on our website at <https://global.vanguard.com>
