INVESTMENT OBJECTIVE

The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) by tracking closely the performance of the FTSE 100 Index, the Fund's benchmark index. The Fund invests in equity securities (e.g. shares) of companies that make up the benchmark index. The benchmark index measures the performance of equity securities of the largest 100 companies listed in the United Kingdom. The benchmark index is a free float-adjusted market capitalisation weighted index. Free float-adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the benchmark index. Free float-adjusted market capitalisation is the share price of a company multiplied by the number of shares readily available in the market.

The Fund's benchmark index measures the performance of fixed income securities issued by governments of countries (excluding the United Kingdom). The fixed income securities will pay income according to a fixed rate of interest and will have a credit rating which reflects that of the relevant government. They will have a minimum remaining time to maturity (i.e. the time until they become due for repayment) of 1 year.

INVESTMENT OBJECTIVE

The objective of this fund is to provide a mixture of income and growth (if the income is reinvested) by tracking the performance of the Barclays World Government Ex UK Inflation Linked Bonds TR Hedged GBP Index. The fund will invest between 80% and 100% in bonds (a type of loan which pays interest) included in the Index. These bonds will have a pre-set rate of income (either set at a fixed level or varying in a predetermined way). The fund's investments will closely match those that make up the Index and this will be achieved through investing in a sample selection of the bonds in the Index. The bonds are issued in the relevant national currency by governments around the world (excluding the UK). The interest and capital returns on these bonds will be linked to local inflation rates. The bonds that the fund invests in will be a mixture of investment grade bonds (rated as lower risk) and sub-investment grade bonds (rated as higher risk). The mix will closely match that of the Index. Investment and sub-investment grade bonds are bonds that have been given a credit rating by a rating...

Past performance is not a guide to future performance. The value of units can go down as well as up. Please note that pension fund and life fund performance differs from unit trust/OEIC performance due to the underlying difference in the taxation treatment.
